General Information ($25. allowance for the design.)
*$7000 allowance for the windows in the Chapel.

Mr. Jamieson wrote: "I am enclosing a print from a drawing made by us at the end of May showing what I had had in mind as the motif and I would appreciate your letting us know whether this indicates the amount of work you anticipate furnishing. In the small circle above the vent our thought had been to introduce a simple Biblical subject."

**The lower part of the opening is a vent to be furnished in each of the side windows, making a totel of 18 in all (8 double side windows and 2 single side windows). (No vents in the north window).

(Footage of large north window 71 feet.
(8 2-lancet clerestory windows, 23' each, or 183 feet in the 8; also

For addresses of those to be notified as window progresses, see other side.

2 single lancet windows with tracery (east), 9 feet each, or 18 feet in the 2).

The walls of the Chapel are lined with akoustical Guastavino tile which will resemble fresh Bedford stone in color, and the wainscoting will be of oak, rather light in color. The windows should contain no figures and nothing pictorial. The donor stipulates with respect to the windows, that they should be brilliant in color, stronger at the bottom and lighter at the top with plenty of red predominating and deep blues." (Mr. Spearl, Aug.24,1937).

Big window:	$2,100	($30 per foot).
8 windows	4,400	($24 per foot). $550 each).
2 single	500	($29 per foot) (250 each).
