General Information Textured glass to obscure the view (of the barren court)*

"two or three windows in a lower hall, looking out into a barren court. - - - - - metal casements in pairs , with 7/8 inch metal divisions,- one vertical and four horizontal each. 2-7/8 inches between pairs. Each panel about (8"x 10")--sight size

He is also considering, for some time in the future, two or three windows in a lower hall, looking out into a barren court. These are metal casements in pairs, with 7/8 inch metal divisions,- one vertical, and four horisontal each. 2-7/8 inches between pairs. Each panel about 8 x 10, sight. They are now clear and they want to obscure the view by introducing textures glases and symbols.

We should send samples of this sort of thing, and rough sketches, with possible cost.
