M-2050

SUBJECT: BI-WEEKLY REPORT, May 9, 1950

1.0 GENERAL

(C. R. Wieser)

This bi-weekly is the first of a new series (classified - Confidential) in which we will report on the redirected 6673 work. The previous 6673 bi-weekly report, which is classified Restricted, will be continued by Welchman, Linvill, Israel, and Orden until their work on the common system of air traffic control is completed.

During the past period, a proposal, M-2047, has been written to outline a method of inserting radar data into WWI through one of the flip-flop storage registers.
