Bomarc Studies

The 25 interception runs mentioned in the last ~~SECRET~~ biweekly were analysed, and 2 errors were found in the program; one was a programming error, the other was due to omission of a particular situation. Both have been corrected since, and 37 runs were made. Of these, 26 resulted in success. Failure was due to maneuvers; there was one doubtful run which resulted in failure, the cause of which is still obscure.
