

624 D

Mrs. R. J. Mercur, Dowal, Quebec.

Church in Towanda, Bradford County, Pa.

Get size of entrance porch from Rodney Mercur, Towanda, Pa/

Church is of stone, and tree suggested to express the dignity of Mr Mercur's life. He was a strong character.

C.J.C. made following suggestions in his letter of January 3.
"Ordinarily entrance porch small in size, and it would be necessary to have the ornamental features correspondingly small in scale. To serve in this relation I would suggest a wide ornamental border all around the window, and small details in the delineation of the tree itself, which should be kept stiff throughout."

The panels or scrolls containing inscriptions should be treated like ornamental units, so as to be coherent and beautiful parts of the design.

\$300 would be adequate for the window. Additional sum for setting it in place.

February 10, 1916.

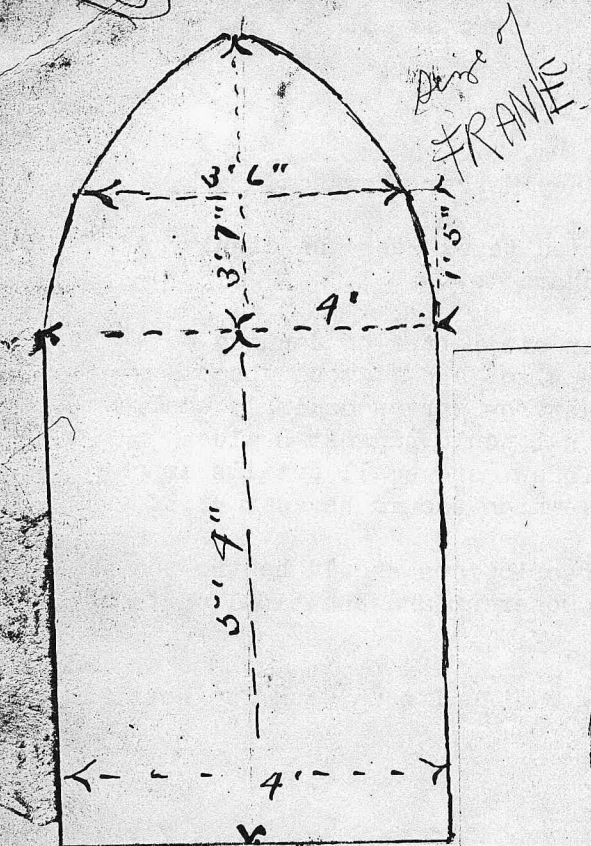

Actual dimensions of the interior porch 13 feet 9 inches by 7 ft. 6 in.

Send pencil sketch, subject, and information about principal colors to Rodney A. Mercer, to submit committee.

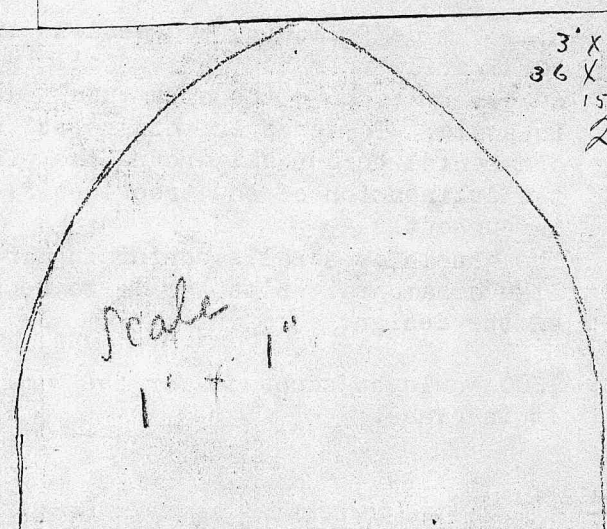

Is the window set in stone? *No* No. Sizes given are site sizes quarter or half inch hidden by frame.
What is the depth of the groove?

No Ornamentation

ack - in stone?
 What groove or rebate
