General Information Steel casements in all bottom tier openings.

The upper medallions are 12" in diameter inside of the leads. The leads are 5/8" wide and the circles are true.

Nine Large Medallions and small inserts.

Note: C.J.C. says these windows "get a brilliant light, and those things don't want to be too harsh. The blacks ought to be quite important".

For addresses of those to be notified as window progresses, see other side.
