General Information Bishop Tuttle Window.....

IMPORTANT. On June 7, 1932, Dr. Cross wrote us the following letter, "Will you please revise the sizes of these side-aisles to the following: 20 3/4" x 59 1/2"? I had forgot to let you know that in the previous windows we had had to solder on extra leading to make the windows fit. Also, please know that "t" joints are to be provided for the remaining windows with wire for attachment at joints."

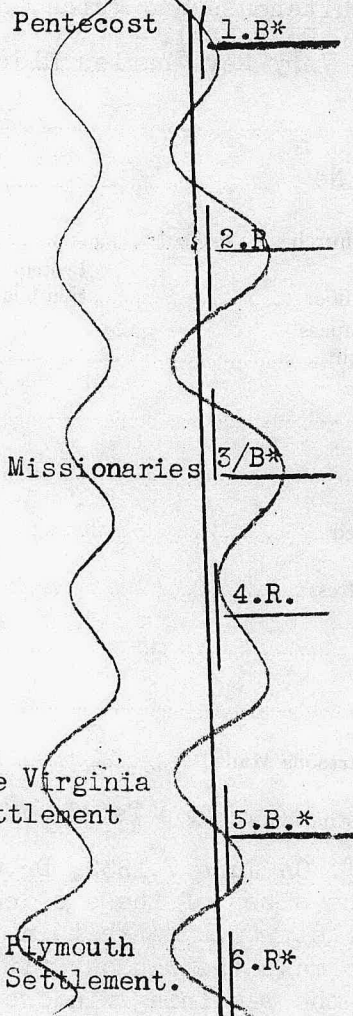

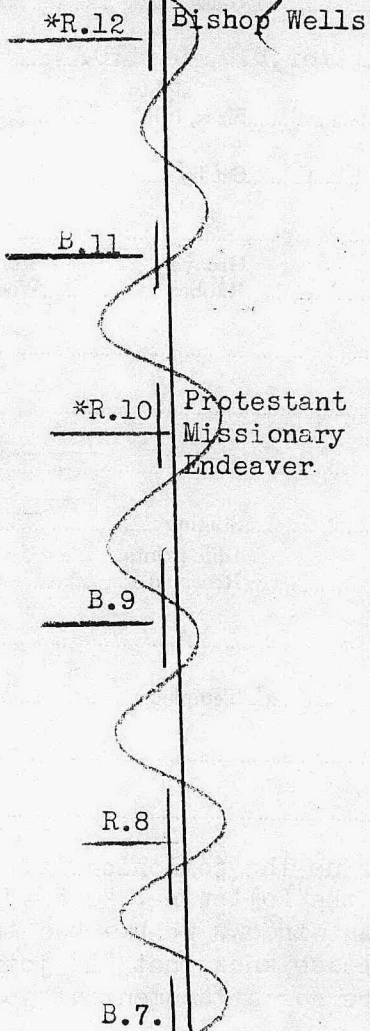

Be sure to refer to the photographs of the windows already in place - and sketches already made for the remaining windows.

July 23, 1941. Bishop Cross wrote: "...use the window...for such men as Whipple, Tuttle and Hare...."

For addresses of those to be notified as window progresses, see other side.

North	*R.12.	1.B*
	B.11	2.R. South
	R.10	3.B
	B.9	4.R.
	R.8	5.B*
	B.7	6.R*

*Window now in place.
 The aisle windows begin at transept south side, and go toward the entrance; they continue on the north side toward the transept. The R. and B. refer to the scheme of color - Red and Blue.
