the whites as on the other side. This could well be done on account of the stronger light this west window receives.

See floor plan in file.

This window is devoted to Martin and Mary - the sisters of Lazarus as an eloquent symbol of the Active and the Contemplative elements in the Christian Life.

At the right is Northa - "and a certain woman heard Martha received Him into her house". At the left is Hary - "and she had a sister called Hary who also set at Jesus' feet and heard His word".

Saint Martha holds a bashet of fruit, and the keys at her side symbolize - the Keeper of the House. The table set -ready to serve - symbolizes material hospitality, while the prie-dieu and capille near Saint Mary suggest spiriturl hospitality. Mary, with long fair hair, holds the box of cintment.

The rose vine forms the colorful border pattern and enriches the tracery members with red and white blossoms - red, the traditional color symbolism of divine love, and the white of parity.

Across the base is the memorial inscriptions

"Given by Susia idams in memory of her mother Enlly S. Beale - Sept. 23,1847 - June 10,1925."

Note: Set out the prie-dieu and the table in some pleasant manner - perhaps with matts and textures, the actual character of the glass, and textures of gold stain.

Feb.3. "We have gone over the color design, strengthening the blues - not only introduced the light blue throughout the field, but intensified the blue in the border and garments. In the window probably accent some of the pieces of the light blue field to even greater extent - especially in the left panel - to balance the robe of St.Martha.
