General Information Window to be designed as a fitting companion to harmonize
and complement our earlier one - with another historical form of the Cross.
The one now in place is east. on Grisaille field.

(not exactly like the old one, but it would have the same general
character, with interesting variations.) Use same general pattern, with
slight variations in pattern and tone of glass. If anything, they would like it
lighter.

July 23. O.E.S. wrote: "I have discovered that the corner of a porch roof
immediately outside the window, casts some shadow over the upper left
corner of the window. This may not be too serious a matter, but it would
certainly be better if the shadow could be eliminated..." (Wrote Mrs.

THIS WILL BE ELIMINATED.

Burge about this) also about possibility of extra cost of frame.

*Mrs. Burge is going to see if a local carpenter will make and fit the
frame and send it to us to fill. New frame now here.

For addresses of those to be notified as window progresses, see other side.
