General Information: Crates of glass are in Carpenter shop, where work can be done. They would like the work completed for an exhibition at Easter Time, April 15, at Rhode Island School of Design.

We are to remove the 25 panels of ancient glass from their present settings and remount them in new lead bars containing the steel reinforcing bars. Some of the windows are roundels.

Open some of the boxes and get an idea of the scope of the problem before deciding which leads to use to best frame the ancient panels.

For addresses of those to be notified as window progresses, see other side.
