General Information We gave an estimate of \$625 to Mr. Lawrence for furnishing and installing the ventilators and temporary glass in the 7 nave windows, the leaded clear glass for the similar pair of windows on the stairs near the entrance, and the leaded window in the Sacristy (glass same as the nave), also temporary glass in the long transept window and in the small side transept window if it is needed. Give benefit of any saving. 12/12/52.

Sussman's estimate \$13.50 per ventilator, plus \$5.00 for crating 10/9/52. Lizotte Glass Co., 390 Race St. Holyoke, estimates \$192. for installing 10/9/52.

*Note that this window is not to have ventilators.

Also note that the Sacristy window will be in the same type of light yellow green marine antique as the sample they approved for all the aisle windows. These aisle windows are just to be in sheets - not leaded.

The Sacristy window has a wooden frame, and is hinged to open outward.

over

Doorlights: Suggested \$5.00 each, and possibly we can cut this a little.
There should probably be some clear glass in some of these doorlights,
especially the two center ones from the vestibule into the Church. 12/5/52/
