General Information These should be quite simple but carefully planned on account of their height.

Mr. Mitchell wants prices on them installed alone, and with some big window.

Wrote Mr. Mitchell: "it will cost us about \$100 to make each of these and I think that their installation may range between fifty and one hundred dollars each. This suggests cost from \$150 to \$200 each, depending upon the conditions of their installation. I am confident we could keep them down to the lower amount by combining them with other work."

** Mr. Mitchell says they can allow \$100 for the installation of both (not each) 4/25/54.

Be sure to let Mr. Caunt know when the windows can be seen in an interesting stage. He wants to come in.

We are enclosing a rough sketch for one of the crosses at Barmuel.

It is patterned in the grapevine, and suggests a rather warm palette.

The other one might well emphasize the lily or the rose, and have a little cooler quality.

I think these will make lovely accents of color.

I believe it will cost us about one hundred dollars to make each of these, and I think that their installation may range between fifty and one hundred dollars each. This suggests cost from one hundred fifty to two hundred dollars each, depending upon the conditions of their installation.

I am confident we could keep them down to the lower amount by combining them with other work.

Important: Mr. Mitchell wants a color plate of this window.

Also, the donor may be near Boston when the windows are complete, and he would like to see them here. 4/25/54/
