in Church:

Height from floor: 

Protection: Metal Aluminum Frame

Groove: Stone

Rabbet: Wood

Exposure: 

Inscription: 

Design wanted: 

Staging: 

Templates: 

Blueprints: Yes.

General Information: Consult about simple Cathedral glass to use in the large front window opposite the chancel and the side windows. - A large gable window in front, wooden frames; about 6 side windows - four on one side and two on the other.

Lightish brown ceiling and a little lighter woodwork. They will have brown pews.

Suggested some neutral tones, perhaps warm grays, probably German Cathedrals with textures and shading - the large pieces in the front window are 30" x 42½", full glass size. They may have leaded inserts later on.

Sent samples, etc. See letter of December 14, 1960.
