Blueprints.....

General Information To have lettering near the top "All Saints' Chapel of  
Christ Church"; then a figure of Our Lord in the Crucifixion, with  
a memorial inscription at the bottom. (Like the Glen Ellyn Crucifixion).

Doorlight to be cut in present door. Door is 2 1/2 inches thick.

Opening to be cut in door by Mr. Kenneth E. Bahe, 2340 Nelson Street,  
Chicago 18, Illinois. 7/7/60.

The circle for the door is designed to symbolize the Crucifixion of Our Lord. Figures of the Blessed Virgin Mary and the beloved disciple, Saint John the Evangelist are designed at either side of the cross. Saint John holds the book and pen as Gospel recorder of the event.

The name of the Chapel is included, - "All Saints Chapel of Christ Church"; with a space for the memorial inscription.

In the full size drawings, I believe we will find it better to shorten the arms of the cross, bringing the upper lettering closer together. Probably the memorial inscription might well be in smaller letters than that above, - but we can work this out to best advantage in the full size drawing when we have the text.
