Ordered 11/67
Following the idea of devoting the northern windows to Church history, we have represented Robert Hunt and the First Communion in America at Jamestown, and the consecration of Bishop Seabury by Bishops Skimmer, Petrie and Kilgour.

Robert Hunt stands with the Chalice before the communicants at the rude rail built from the limb of a tree, under the sail-cloth. Seabury kneels for the laying on of hands by the three Bishops.

We have planned these windows in a full color palette, but sufficiently light to admit abundant illumination to the northern.

Designed in this manner, they would cost eight hundred dollars each panel. The same subjects could be designed in smaller scale, in colorful medallions set in light fields, for as little as six hundred dollars each panel.
