General Information Window must be set so inscription can be read from the church (There is more light in tower)

~~We are confident we can develop this window as a cost of three thousand dollars.~~

~~We are also working a design for the lunette over the door from the tower to the church, devoted to the musical theme of Saint Cecilia with the organ and the song books of the church in conventional style forms.~~

~~For the door panels below, we have suggested musical instruments, and flowers, an ancient type of harp and the harp. They should be kept brilliant to take advantage of all the available illumination.~~
