General Information: The Ascension of Our Lord.

The central portion of the great West window, including the radiant figure of the Risen Christ, an Angel of Prayer, Christ and Mary Magdalene, and Saint Peter and Saint John.

We can probably increase the scale here over the chancel window, but not too much.

This window is to predominate in red, to contrast with our chancel window, which is predominately blue.

This portion will look rather dark in contrast to its surroundings, but it is the lightest part of the window and we can keep it brilliant.
