Templates Blueprints

General Information

Three Windows in the Sacristy

Sketch with a symbol of the Chalice and Host.

Prefer the simple rectangles in the side windows; and one medallion in the center window.

I am sending a rough sketch of what I'd like to be in the medallion: an open Bible with the inscription "Verbum Dei Manet in Aeternum".

We prefer the thicker glass and the rougher textures. We leave the choice of colors to you simply reminding you that these windows face toward the North and should help to obscure the view of the alley.

The side panels will be the same as the field without the symbol medallion; and we will use more irregular textured glasses to obscure the outer view.

Lettering will be stronger and more carefully designed in the glass.
