## INTRODUCTION

The Aga Khan Program (AKP) Visual Archives preserve and make available the visual documentation generated by the publications and research activities of the Program and contributed by individuals, institutions and firms. Established in 1980, the Archives have acquired approximately 100,000 images illustrating a broad spectrum of Islamic architecture, both historical and contemporary. Predominantly in 35 mm slide format, holdings of the Archives also include black and white photographic prints, drawings and plans, and supporting written documentation.

The following Acquisitions 1980-1990 is a compilation of the 35mm slides available in the AKP Visual Archives. It is grouped alphabetically by country and city. Within each city/site the photographer is numerically arranged by acquisition year. See "Acquisitions Description." Monuments within cities are not listed. Inquiries about specific monuments and views should be directed to the archivist, as well as information about purchasing slide reproductions.

For information about available documentation and/or to order slides from the AKP Archives, please send a written request (letter, telex, or fax) which includes your name, address, and telephone number.

Duplicates are available for \$3.00 per slide, they are placed in plastic mounts and individually identified on labels. Please note that images from the archives are made available for educational and research purposes and may not be reproduced or published without the prior written permission of the Aga Khan Program.

## DESCRIPTION - ACQUISITIONS

The Acquisitions 1980-1990 lists the AKP Archive's 35mm slide collection alphabetically by **COUNTRY** and **CITY** within each country. Sites not identified as cities are followed by their political classification (ie: Villages, Districts, Regions, Provinces, etc.). If an alternative spelling of a city is appropriate to provide, it will follow the established spelling of a city (ie: Dakha/Dacca).

The New York Times Atlas of the World, 7th Comprehensive Edition, 1985, was used for spelling country and city names. If the city was unidentified by the photographer or researcher, the term "unlocated" is used. When a location is not a city, town, or village, the term "vicinity" following the closest established city is used.

In the following acquisitions' list each city has information concerning the quantity of slides (**QTY**) date of acquisition (**YEAR**), and contributor (**PHOTOGRAPHER**). The copyright status (**ST**) is assigned a number code, indicated by the numbers one through four. The number code and copyright status are listed below. **CODE** and **BOX** refer to physical

location of the item in the AKP Visual Archives, these guide the Archivist to quickly access the material. **CODE** identifies the documented country or countries, year, and photographer's name(s). (ie: MA81HO: Mali, 1980, Horton). **BOX** indicates the collection location by Hollinger archival box number or Neumade slide cabinet (Cabnt.).

The following numbers refer to the copyright status (**ST**), 1-4 of the individual archive collections. Information about obtaining duplicate slides of specific sites and monuments is described in the preceding "Introduction".

1. The AKP may copy this image for any educational use, including one-time right to publish granted to others, provided proper credit is given.
2. The AKP may copy this image for educational use in teaching and research, not including the right of further reproduction or publication.
3. The AKP may copy this image for educational use in teaching and research, and may reproduce it in its own publications only.
4. The AKP may not reproduce this image. Permission for its reproduction in any manner must be obtained from the source listed.
