BOSTON

T-M  
R

# MASSACHUSETTS INSTITUTE OF TECHNOLOGY.

---

## RULES OF THE FACULTY.

*Revised to August, 1903.*

---

### OFFICERS, MEETINGS, ELECTIONS.

1. The officers of the Faculty shall be the President of the Institute, who is *ex officio* President of the Faculty, a Secretary, a Dean, a Registrar, and a Recorder; the Secretary and the Dean shall be elected from the Faculty annually by ballot. The Registrar and the Recorder are to be appointed in such manner as the Corporation may determine.

2. Special and Standing Committees may be appointed by the Faculty, and may act with power, if so authorized by the Faculty.

3. The annual election of the Secretary, the Dean, and the Standing Committees of the Faculty shall take place on the first Wednesday in May, but their terms of office shall begin on August 1.

4. The regular Faculty meetings shall take place at such times as the Faculty shall each year appoint. Special meetings may be held whenever the Faculty or the President shall appoint. A special meeting shall be called by the Secretary whenever a written request to do so is presented, signed by three members of the Faculty.

## DUTIES OF THE OFFICERS.

## 5. It shall be the duty of the Secretary :

To coöperate with the President in the general conduct of Faculty business and administrative work, and to have general oversight of the work of the Registrar and the Recorder.

To give written notice to each member of the Faculty of the time and place of each Faculty meeting, and of the special business to be transacted. In the absence of the President from a Faculty meeting, to call to order and entertain the motion for a Chairman *pro tem*. To record the proceedings of each meeting, and to read the same at the next meeting.

To place on file all important communications and correspondence, as well as all petitions and reports of committees.

To submit all petitions, before Faculty action, to the proper instructors or committees. To give to the chairman of every committee appointed by the Faculty notice of the constitution and purpose of such committee.

To prepare in consultation with the head of each department a list of fourth-year students who are probable candidates for graduation; to examine personally each candidate's entire record; and to report any deficiencies to the respective departments before January of each year. To make a similar report after the semi-annual examinations.

To notify students, in writing, of all Faculty action affecting them individually or collectively.

The Secretary shall be chairman of the Committees on Petitions, on Entrance Examinations, and on the Tabular View and Room Scheme. He shall be a member of the Committee on Appointment of Graduates.

## 6. It shall be the duty of the Dean :

To coöperate with the President in matters relating to the general welfare of students, including discipline.

To have a general oversight of first-year work in consultation with heads of departments.

To act as a general consulting officer for all students.

The Dean shall be Chairman of the Committees on the Conduct of Examinations and on First-Year Students; he shall be a member of the Committees on Petitions, on Undergraduate Scholarships, on Provisional Students, and on Recommendation of Graduates for Appointment. He shall also appoint Advisers from the officers of instruction to act under his direction.

7. It shall be the duty of the Registrar, under the general direction of the Secretary:

To pass upon the attendance cards of students, in consultation with members of the Faculty. To furnish to every instructor, as early as possible in each term, and thereafter on the first of every month (if so requested), a list of students entitled to admission to his classes. To inform students reported to be neglecting their work that, in the absence of satisfactory explanation, they may be required to drop the subjects in question; and to report such cases to the Dean when necessary.

To make to the parent or guardian of every minor student a report of absence whenever, in his judgment, irregularity of attendance is excessive, or when requested by the instructor in any subject.

To notify the guardians of minors whose time is not fully occupied of such deficiency in their courses.

To coöperate with the Committees on the Conduct of Examinations, on the Tabular View and Room Scheme, and on Undergraduate Scholarships in carrying out the provisions of Rules 12, 28 and 29.

To obtain twice during each term the individual opinion of each teacher of the first and second-year classes as to the progress of each student in his class; and to transmit such information to the parent or guardian of every student not of age.

To present to the Standing Committee on Provisional Students as soon as practicable after the first intermediate examinations of each term, and thereafter whenever necessary, the cases of all students admitted to any work "provisionally" or placed "on probation."

To present to the Faculty after each semi-annual and annual examination the records of all students having two marks of D or F, or one of FF, and also of all fourth-year students who are candidates for graduation, and of any others who may be designated by a member of the Faculty. To send to the head of each department, in advance of the Faculty meeting appointed for the consideration of records, the records of students in his department as follows: at the end of the first term, the records of all fourth-year students who are expected to be candidates for graduation, and of all second and third-year students who have marks of F or D; at the end of the year, the records of all third and fourth-year students and of all second-year students who have marks of F or D.

To communicate to the student, or to his parent or guardian, if the student be not of age, the reports of his standing for each term, except for a candidate for graduation in his final half-year, and for any other fourth-year student nearly eligible for graduation.

To see that certificates and diplomas awarded by the Faculty and Corporation are properly filled out and delivered to the persons entitled to receive them, and to record such award and delivery.

To keep on file a list of text-books in use in the different departments, and also copies of all formal examinations, and of present and former schemes of the several courses.

To keep a Subject Schedule showing how, when, to whom, and by whom every study or exercise is given, and the preparation required.

8. It shall be the duty of the Recorder:

To assist the Secretary in the care of Faculty business, and under his general direction to keep a detailed record of each student, based on his attendance cards and the reports of his instructors, showing, in such form that his exact status may be readily found, his full name, age, parentage, manner of admission, and standing throughout his course, together with such Faculty votes as he may have received. These records shall be open to inspection by members of the Instructing Staff and the Registrar only.

## COMMITTEES.

9. The Standing Committees shall be the following, viz. : a Committee on Advanced Degrees and Fellowships; Committees on the several Buildings; a Committee on the Conduct of Examinations; a Committee on Engineering Research; a Committee on Entrance Examinations; a Committee on First-Year Students; a Committee on Five-Year Courses; a Committee on Graduation Exercises; a Committee on Military Exercises; a Committee on Periodicals and Libraries; a Committee on Petitions; a Committee on Provisional Students; a Committee on Publications; a Committee on Recommendation of Graduates for Appointment; a Committee on Relations with Secondary Schools; a Committee on Special Students; a Committee on Summer Courses; a Committee on Summer Reading; a Committee on the Tabular View and Room Scheme; a Committee on Undergraduate Scholarships. These committees, except that on first-year students, shall be elected annually by ballot.

10. The Committee on Advanced Degrees and Fellowships shall have general charge of all matters relating to graduate courses of study, and to graduate scholarships and fellowships, except as provided in Rule 13. It shall make recommendations to the Faculty in regard to the acceptance of candidates for the degrees of Master of Science and Doctor of Philosophy, the approval of their courses of study, and, when these have been completed, their qualifications for the degree. It shall have the power to appoint special committees which shall exercise supervision over individual courses of study and which shall report to the Committee or the Faculty the manner in which these have been carried out.

11. The Committees on Buildings shall have charge of the Rogers, the Walker, the Engineering, the Henry L. Pierce and the Augustus Lowell Buildings, and of any others that may be erected.

12. The Committee on the Conduct of Examinations shall submit to the Faculty, at least four weeks before

the end of each term, a scheme of hours and rooms for the formal examinations, and shall cause such scheme, when approved, to be printed for the information of officers and students. It shall make all necessary arrangements in regard to the conduct of these examinations, see that they are properly carried on, and report to the Faculty all delinquencies of those in charge.

13. The Committee on Engineering Research shall have general charge of the Graduate School of Engineering Research, of which it shall be the Council, including the courses of study and qualifications of candidates for the degree of Doctor of Engineering.

14. The Committee on Entrance Examinations shall consider questions relating to requirements for admission. It shall have charge of the preparation of examination papers and of the conduct of entrance examinations, and shall act with power on records of such examinations.

15. The Committee on First-Year Students shall consist of those members of the Faculty giving instruction in first-year subjects, and of the Dean. It shall make recommendations to the Faculty, as soon as practicable after the intermediate examinations of each term, in regard to students requiring special attention, except as such students are provided for under Rule 21. It shall also consider all semi-annual and annual marks of first-year students, and shall make suitable recommendations to the Faculty when such marks are presented to the latter.

16. The Committee on Five-Year Courses shall confer with students proposing to take the same, and shall arrange, in consultation with the heads of the respective departments, appropriate course schemes. It shall consider the attendance cards of five-year students, supervise their work, and present to the Faculty any cases requiring action.

17. The Committee on Graduation Exercises shall have charge of the arrangement and conduct of these exercises in all respects, but the programme of the same shall be subject to the approval of the Faculty.

18. The Committee on Military Exercises shall have charge of regulations in regard to military exercises; shall confer with students applying for excuse from drill; and shall have power to act on such applications so far as the latter shall meet the requirements of Rule 47.

19. The Committee on Periodicals and Libraries shall have general supervision of the Libraries, and shall attend to the subscription for periodicals and their distribution.

20. The Committee on Petitions shall consist of the Secretary and the Dean, *ex officio*, and of five others, including, so far as practicable, representatives of the Standing Committees on Special Students, on Five-Year Students, on Provisional Students, and of the principal professional departments. This committee shall hold meetings once a week throughout the school year, and shall have power to deal, not only with all petitions from students, but with routine business of all kinds — for example, authorization of special examinations, admission of applicants on other grounds than examination, acceptance of recommendations in regard to records or excuse from subjects, recommendations in regard to intermediate reports, and such other business as may from time to time be referred to it by the Faculty. On request of any member of the committee, any matter coming before it shall be referred to the Faculty, and the records of the committee shall be open to inspection by members of the Faculty.

21. The Committee on Provisional Students shall have charge of all students admitted to the school provisionally or placed on probation and shall, so far as possible, supervise the work of such students. It shall also keep informed, so far as possible, as to the character of work being done by all students in subjects to which they may have been admitted provisionally; and shall present to the Faculty any cases requiring action.

22. The Committee on Publications shall prepare and submit to the Faculty for approval, soon after the beginning of the school year, all the matter of the catalogue; it shall also have charge of the printing of the catalogue after the

matter shall have been approved by the Faculty, and of the printing of other official publications.

23. The Committee on Recommendation of Graduates for Appointment shall arrange with the President, and with the heads of the professional departments, for the conduct of correspondence in regard to the employment of graduates.

24. The Committee on Relations with Secondary Schools shall endeavor to promote close relations between the Institute and secondary schools.

25. The Committee on Special Students shall consider and report on the attendance cards of such special students as may be referred to it by the Registrar; and it shall be the duty of this committee, when attendance cards are not approved, to make alternative propositions if practicable, and, in individual cases, to recommend modifications of the requirements for admission to particular subjects. It shall bring to the attention of the Dean the case of any special student who is believed not to be pursuing a sufficient number of subjects to justify his continuing in the school.

26. The Committee on Summer Courses shall have general charge of all arrangements and announcements for such courses, subject to the approval of the Faculty.

27. The Committee on Summer Reading shall have general supervision of the course, and shall prepare, each year, a list of books required to be read by students during the summer.

28. The Committee on the Tabular View and Room Scheme shall prepare and submit to the Faculty before the beginning of each term a tabular view of exercises, showing the hours during which each exercise is to be held. It shall cause the same, when approved, to be printed for the information of instructors and students, and shall regulate the assignment of rooms in which the exercises are to be held.

29. The Committee on Undergraduate Scholarships shall have power to act upon all applications for scholarship aid in

connection with undergraduate work, and shall recommend to the Corporation such students as appear most worthy of assistance, taking into consideration both their standing and their pecuniary needs. The recommendations of the committee shall be reported to the Faculty for record.

30. It shall be the duty of the chairman of a committee to give notice of meetings thereof to members of the committee, and to report the action of such committee to the Faculty in writing.

EXAMINATIONS AND REPORTS OF STANDING.

31. Examinations for admission to the first-year class shall be held on the first Thursday, Friday, and Saturday after June 24, and on the first Tuesday, Wednesday, and Thursday after September 17. Examinations for admission to the Institute may be held at distant points under the direction of the Faculty.

32. Examinations for advanced standing shall be held on the Monday preceding the September entrance examinations, and on the following days.

33. General examinations shall be held each year in January and in May. The examinations in fourth-year subjects finished before the end of the term may be held, with the approval of the Faculty, at the close of the respective courses, but not more than two hours shall be allowed for such examinations, and no reports shall be made to the students until the end of the term. The semi-annual examinations shall be confined to the work of the first term. The annual examination may cover the work of the entire year. In the fourth year a candidate for graduation whose record has been generally poor may be required by the Faculty to pass examinations on professional subjects of the earlier years.

Near the beginning of the term each instructor shall report for the approval of the Faculty as to each of his subjects whether he desires to hold a final examination or to base his records on term work including intermediate examinations.

In exceptional cases an instructor may, with the approval of the Faculty, hold a final examination for particular students.

34. Examinations for conditioned students shall be held as follows: on the Monday preceding the September entrance examinations, and on following days; at the time of the semi-annual and annual examinations. Conditions received in May or June must be made up in the following September; those incurred in September must be made up in the following January; those received in January must be made up in May, except as postponement may be allowed by vote of the Faculty. But failures in drawing or laboratory work shall be made up in accordance with the rule for making up deficiencies (Rule 39). Applications for special examinations during the term shall not be entertained unless made by members of the Faculty.

35. Intermediate examinations may be held in any class at the discretion and under the control of the instructor, in place of the regular exercises of the class; the results of these intermediate examinations shall not be a matter of permanent record, although the instructor may, if he sees fit, take such results into consideration in marking the student at the close of the term. The reports required under Rule 7 need not be based on such examinations.

36. Examinations shall be limited in length to three hours, and in case of brief courses, the length of the examination shall not in general exceed two hours. If in any case a longer time than three hours is desired, the subject of the examination may be divided, and two separate appointments made. Each member of the Faculty is expected to take personal supervision of the semi-annual and annual examinations of the classes taught by him or under his direction, or to provide some representative from his department.

37. Reports of standing shall be made to the Registrar in the terms given below.

C (*passed with credit*) signifies that the record of the student is very satisfactory.

P (*passed*) signifies that the record of the student is clear. This admits him to any studies dependent on the subject in question.

L (*passed with low standing*) does not necessarily condition the student, but warns him that his record is unsatisfactory, and that improvement is necessary. He may, however, be required by the Faculty to obtain a better record, by examination, by repeating the work, or otherwise, for admission to dependent work.

F (*failed to pass*) indicates that the work has been of very unsatisfactory quality and imposes a condition on the student. Absence from an examination, if not satisfactorily explained, or failure to make up a condition at the time appointed, is equivalent to a record of FF.

FF (*failed completely*) indicates that the work has been so unsatisfactory that the student must drop or repeat the subject, and cannot be admitted to subjects dependent thereon.

The mark FF shall not be given as an intermediate record.

D (*deficient*) signifies that a portion of the work required has not been accomplished. The satisfactory completion of such work will be necessary to entitle the student to a clear record. The mark of D is expected to be supplemented so far as practicable by the record to which the student would be entitled on making up the deficiency.

38. Percentages shall be given, so far as practicable, particularly in case of failure, in order to represent a student's standing more definitely than would letters alone. Both figures and letters shall, so far as possible, represent current class work, and not merely the results of examinations. In all cases figures and letters shall be based on the same data.

If a student's record as a whole is poor, he may be required to repeat or do additional work in certain subjects, or to withdraw from the school.

Every report of standing shall be signed by the examiner.

If he be not a member of the Faculty, this report shall be indorsed by that member of the Faculty having charge of the subject. No report shall be accepted from an instructor for any student to whom he has given private instruction in the subject in question, nor shall any examination be given by an instructor in any subject to students to whom he has given private tuition.

39. All marks of D must be removed at a date to be determined by the respective instructors, which date shall not be later than the end of the following November, but in case of subjects which from the character of the work can be pursued only in the second term, the date shall not be later than the end of the following March.

In case a mark of D is not removed at the date thus determined, the student shall be required to discontinue any dependent subjects which he is taking, and can only obtain a clear record by repeating the subject in which the D was given.

40. Reports of standing to students, parents and guardians shall be made by letters only (as above), and not by percentages. In case of entrance examinations P (*passed*) and F (*failed*) shall alone be used. Results of individual examinations shall not be communicated in the case of a student required to withdraw, of a candidate for the degree at his final examination, or of any other fourth-year student nearly eligible for graduation. Final reports of standing shall be communicated to students, parents, or guardians, by the Registrar only.

#### REQUIREMENTS.

41. To be admitted as a regular student to the first-year class, the applicant must have attained the age of seventeen years, and must pass satisfactory examinations at one time, or in two successive years, in Algebra, Plane and Solid Geometry, English, History, French and German, and in such additional subject or subjects as may from time to time be prescribed by the Faculty.

**DIVIDED ENTRANCE EXAMINATIONS.** — Candidates for admission will be allowed, at their option, to divide their entrance examinations between two successive years.

To be admitted to the first divided examination the candidate must be at least sixteen years of age, and he will not be entitled to credit for any examination unless he presents a certificate from his teacher stating that he is qualified for such examination.

Students who have passed the entrance examinations may be admitted in subsequent years upon satisfying the Faculty that their studies have been continued in the meantime.

Applicants from foreign countries may be admitted provisionally, on their own responsibility, without entrance examination.

42. Students coming from colleges or technological schools will be expected to present satisfactory certificates of dismissal; they may be admitted to the school without entrance examinations, and to those courses of instruction for which they shall, by examination or otherwise, satisfy the members of the Faculty in charge that they have the necessary preparation. They may be excused from any work previously taken.

Graduates of colleges may be classed provisionally as regular students in any year for which they shall have approximately the required preparation. Those applying for admission to Course I or Course IV may offer an equivalent for first-year Chemistry.

43. Admission without examination shall in all cases be regarded as provisional until the next formal examinations.

44. Special students may be admitted to the various exercises of the school, on satisfying the Faculty that they are qualified to pursue to advantage the various subjects chosen, and that the proposed scheme of studies will be practicable and useful. A special student making up the necessary requirements shall be classed as regular.

45. Each member of the Faculty shall furnish to the Registrar a list of the requirements for admission to his

classes. These, together with a detailed statement of the requirements for admission to the school, shall be placed on record, and shall be open to the inspection of members of the Faculty.

46. Every first-year student shall be expected, during the first term, to give notice to the Registrar as to the Course he intends to enter. A regular student having no record below P at the end of the first year shall be eligible, as of right, for continuance in any Course. But no student shall be eligible, except by special vote of the Faculty, for admission to second-year professional work:

in Course I (*Civil Engineering*),  
 II (*Mechanical Engineering*),  
 VI (*Electrical Engineering*),  
 and XIII (*Naval Architecture*),

without a record of P or C in Descriptive Geometry and Mathematics;

in Course IV (*Architecture*),

without a record of P or C in Freehand Drawing, Descriptive Geometry, and Mathematics;

in Course III (*Mining Engineering and Metallurgy*),  
 V (*Chemistry*), VIII (*Physics*), X (*Chemical Engineering*), and XI (*Sanitary Engineering*),

without a record of P or C in Chemistry and Mathematics;

in Course VII (*Biology*), and XII (*Geology*),

without a record of P or C in Chemistry;

in Course IX (*General Studies*),

without a record of P or C in English and French (or German).

47. All male students who take a majority of their studies in the first year, except aliens, college graduates, and such as at their entrance are over twenty-one years of age, or pass an examination in the military course, are required to attend exercises in Military Science and Drill. Should a student present to the Faculty satisfactory evidence of physical disability, he shall be excused from attendance

at drill, but shall be required to attend a course in Military Science. All medical certificates intended to show physical disability must be presented within ten days after entrance. For the drill exercises students are required to provide themselves with uniforms prescribed by the Faculty. In the permanent organization of each battalion the cadet officers shall be appointed by the Professor of Military Science and Tactics, subject to the approval of the Faculty. All changes subsequent to this organization shall be left to the judgment of the Professor of Military Science and Tactics, subject to the approval of the President of the Institute.

## DEGREES.

48. The degrees for which candidates may be recommended to the Corporation shall be Bachelor of Science (S.B.), Master of Science (S.M.), Doctor of Philosophy (Ph.D.), Doctor of Engineering (Eng.D.).

49. To receive the degree of Bachelor of Science the student must have attended the Institute not less than one year, which must be that next preceding his graduation, except as postponement may be specially authorized. He must have completed the prescribed studies of the four years, and must, in addition, pass final examinations, if required, on subjects relating particularly to his course. He must, moreover, prepare a dissertation on some subject included in his course of study; or an account of some research made by him; or an original report upon some machine, work of engineering, industrial works, mine, or mineral survey; or an original design accompanied by an explanatory memoir. This thesis or design must be approved by the Faculty. Theses are to be written on one side only of paper of good quality, 8 by 10½ inches in size, with an inch margin on the inner, and a half-inch margin on the outer edges. Theses must be handed to the Secretary of the Faculty not later than the first annual examination.

50. An applicant for the degree of Bachelor of Science in two Courses at the same time must have made application for such candidacy not later than November 1 next preceding his graduation. Such applications shall be granted only in the case of students who have previously anticipated fourth-year subjects in one or both of the Courses in question to such an extent that they have ample time for the work proposed. Every such application shall be referred to a special committee of the Faculty to report as to the eligibility of the candidate, and, in case his application is approved, to have the oversight of all of his work for the remainder of the year, and to report to the Faculty at the close of each term as to the character of the work done. The committee shall decide as to the time and manner of carrying on the thesis work required. No student shall be allowed to present two theses in the same term. A student graduating in more than one Course at the same time shall receive but one diploma, which shall, however, state the several Courses in which he graduates.

51. Any student who does not receive his degree, after having been registered as a candidate, must, in order to obtain the degree in a subsequent year, pursue such studies and pass such examinations as may be required by the Faculty, and must prepare a new thesis, unless otherwise provided by special vote of the Faculty.

52. Recommendations by the Faculty of candidates for the degree of Bachelor of Science shall be submitted to the Corporation at the close of the school year only, unless otherwise provided by special vote of the Faculty.

The names of all graduates shall be inserted in the catalogue under the year in which they receive their degree, unless otherwise provided by special vote of the Faculty.

On the first of March, or at such other date as may be determined by the Faculty, a list shall be made up by the Secretary of all students who are candidates for a degree the following June, which list shall not be subsequently altered except by special vote of the Faculty.

53. An applicant for the degree of Master of Science, Doctor of Philosophy, or Doctor of Engineering, must, except in cases of unusual attainment, have taken his first degree in some scientific school, college, or university of good standing; and his attainments must be substantially equivalent to those required for the Bachelor's degree of the Massachusetts Institute of Technology. He must file with the Secretary, before being accepted as a candidate, a statement of his previous work and present attainments, and of the advanced work which he intends to do at the Institute.

54. The course of study for the degree of Master of Science must consist mainly of advanced study and research. The candidate must pursue his course of study continuously, under the direction and oversight of the Faculty, for at least one full school year after filing his application, exhibiting during that time ability to conduct original investigations. He must pass creditable examinations at such times and on such subjects as may be designated, and finally must present an acceptable thesis. A candidate receiving the Master's degree on the completion of a scheme of studies, including all requirements for the Bachelor's degree in a second Course, shall receive therefor a single Master's diploma, on which it shall be specified that the work done includes the completion of such second Course, and thereby entitles the holder to the Bachelor's degree in that department.

55. The degrees, Doctor of Philosophy and Doctor of Engineering, certify to the creditable completion of an advanced course of study in some branch of science or engineering and to the performance of an original research of high grade bearing upon some scientific or engineering topic. These degrees will be awarded only to candidates who have exhibited the power of dealing with new problems in an independent and efficient manner.

The course of advanced study and research for either of these degrees must be pursued under the direction and oversight of a committee of the Faculty for at least two school

years. The candidate must furnish from time to time such evidences of progress and pass such examinations as the Faculty may require. He must present a thesis embracing the results of his investigation. His attendance must be continuous, except in cases of absence previously approved by the Faculty.

No assistant or instructor in the Institute, who is devoting the larger part of his time to instruction, shall be accepted as a candidate for any advanced degree.

56. All non-resident Fellows and Graduate Scholars shall be required to submit reports of progress on or before the first day of April and the first day of October of each year.

57. No student shall be recommended for any degree upon the record of examinations alone. Regularity of attendance and faithfulness to daily duties shall be considered essential qualifications.

#### REGULATIONS.

58. At the beginning of each term the student shall file an attendance card specifying the course and the studies he wishes to pursue. If he has fulfilled the necessary conditions, this card shall be approved by the Registrar. The student must then attend all exercises in the studies so specified, and, having entered a class, must continue the study until he shall have passed the next formal examination, unless allowed by the Faculty to discontinue it. Instructors shall report to the Registrar the names of all students attending exercises, but not included in the lists furnished by him.

59. For the purpose of giving students the means of readily obtaining friendly advice, each new student shall be assigned to some member of the instructing staff, who shall act as his adviser. This rule is not in any way to affect the authority of the heads of departments or of the standing committees of the Faculty. The Dean shall have power to make the assignments thus provided for.

It is not intended by this rule that instructors shall become in any sense or in any degree the guardians of the students assigned to them; nor does the Faculty by this action assume any responsibility for the conduct and deportment of students outside the halls of the Institute.

60. It is the duty of the instructor in charge of a room to see that order is preserved, and he is authorized to exclude any student from the room for sufficient cause. Such exclusion shall be reported to the Dean.

61. Students are expected to behave with decorum, to obey the regulations of the school, and to pay due respect to its officers. Conduct inconsistent with the general good order of the school, or persistent neglect of work if repeated after admonition, may be followed by dismissal, or, in case the offense be a less serious one, the student may be placed upon probation. The student so placed upon probation may be dismissed if guilty of any further offense. This probation may be removed by the Faculty after a period of continued good conduct on the part of the student. No student shall be required to withdraw from the school for alleged misconduct without an investigation, and an opportunity to be heard by a committee of the Faculty. Such a committee shall in every case make a report in writing.

62. It is the aim of the Faculty so to administer the discipline of the school as to maintain a high standard of integrity and a scrupulous regard for truth. The attempt of any student to present as his own any work which he has not performed, or to pass any examination by improper means, is regarded by the Faculty as a most serious offense, and renders the offender liable to immediate expulsion. The aiding and abetting of a student in any dishonesty is also held to be a grave breach of discipline.

63. No student shall in general be recommended for an undergraduate scholarship until he has attended the school at least one year, and has shown satisfactory evidence as to character and capacity. Exception may be made in the case of the Massachusetts State scholarships.

64. Students leaving the Institute of their own motion before graduation shall be entitled to receive a statement of attendance from the Registrar.

GENERAL RULES.

65. The first term shall begin on the first Wednesday after September 25; the second term shall begin on the first Tuesday after February 4; and graduation exercises shall be held on the first Tuesday after June 3.

66. Exercises and lectures may be held between 9 A.M. and 5 P.M., but on Saturday until 1 P.M. Exercises in Mechanic Arts may begin at 8.50 A.M.

67. All exercises shall begin five minutes after and end five minutes before the hours scheduled, except that exercises may be held from five minutes past twelve until one o'clock.

68. The exercises of the school shall be suspended, and the buildings closed to students, on legal holidays; for one week including Christmas Day, the precise time to be determined by special action each year; during the week preceding the first Tuesday after February 4; and on two days in the second term to be determined by the Faculty. Students engaged in thesis work or other special work may be admitted to the laboratories, drawing-rooms, or libraries, however, by individual permission from the head of the department.

69. A motion to amend these rules shall lie upon the table at least until the next Faculty meeting after its introduction, and final action shall not be taken unless the subject has been announced in the call for the meeting. This rule shall apply also to changes in the several course schedules.

## INDEX.

Absence . . . . .	7
Admission . . . . .	7, 20, 31, 41-46
Age required for . . . . .	41
