Papers, July - Sept. 1865

W. B. ROGERS
MC 1

Luxemburg
July 1. 1865.

My dear Sir.

Your kind note of
the 23rd ult. found me
in my Country home
a few days since.

It will give me
pleasure to comply with
the invitation of the
State teachers Assocⁿ. as
tendered by you, if
you think I can meet

the occasion without
the labour of preparing
a written discourse.

We shall be opening
our Institute School
about the same time,
as I hope in the new
building, & I shall
of course be much
occupied, but I
am very desirous of
profiting by the
instructive meetings
of your association

& of becoming personally
acquainted with its
members.

Hoping to see you
in the course of the
week I remain
W. B. Rogers

J. D. Philbrick Esq

To.

J. D. Philbrick

July 1. 1865.

accepting invitation.

28]

Luxemburg Mass:

July 4. 1865.

To Genl. Secy. Cooper W. C.

My dear Sir,

We are preparing to open the several Schools of the Institute in our new building next Autumn, and as you were pleased some time ago to express a favorable purpose in regard to the Department of "Geology & Mining" embraced in our plan, I take the liberty of addressing you on the subject.

The Institute as you probably know includes in its plan scope a "Society of Arts" a "School of Industrial Science" a polytechnic school & a "Museum of practical Arts".

The first of these Depart^{ts} which was set on foot three years ago has had great

182
Success is now firmly
established.

The School of Industrial
Science was initiated last winter
by a preliminary course which
has just closed, and which
has served the double ^{purpose} ~~object~~
of testing our method and
of preparing a number of
pupils for the regular courses
of the school to be set in
operation next October.

Of the success of this
Department we have the
assurance which is inspired
by the results of our prelimi-
nary trial, by the fact that
many other students are
preparing to enter the
school in the autumn &
by the further evidences
we receive of a widespread

interest in the plan & objects, &
in the early establishment of
our school.

Some of the students of
our previous course will
pursue the studies suited to
the profession of the Mining
Engineer & practical Geologists,
others will aim to prepare themselves
for the several vocations of
the Civil Engineer, Mechanical
Engineer - Architect &
practical Chemist. We are
enjoying pupils in all these
departments or in the studies
preparatory to them, at the
opening of our regular courses
next autumn, and it will
be our aim to provide the
apparatus & laboratories as
well as the teachers necessary
for their instruction in those
all.

To comprehend a plan
wide of course demands large
resources. In some of the

Departments satisfactory provision
at Harvard and in my home the Harvard students to
make a beginning as far as the students of Harvard are concerned.
I have been hoping

School of Mining Engineering
& Geology, we have been hoping
that perhaps your liberality
might supply an adequate
foundation.

Should your views in relation
to the Institute continue to be
as favorable as formerly, and
should you desire any further
information of our plans &
purposes, it will give me the
greatest pleasure to
communicate with you in
person or by letter.

I remain with great respect

Yours very truly
William B Rogers

as a matter of course with the Department of the Ins. & to furnish the details of this
dept. I shall personally take charge of part of the instruction
in our school of Mines until Mr. Jones, started.

From the Secretary of the Institute

Boston July 5th 1865
 Prof. W^m B. Rogers.
 (Lunenburg Mass.)
 My Dear Sir.

Your favor of the 1st. inst. did not, as you anticipated it would, reach me on Monday morning, but for some reason by me inexplicable, remained afloat, or more probably snugly moored in some unknown haven, until to day, when in company with yours of the 4th. it reached its destined port.

I notified a Building Committee meeting for 12 M. this day as agreed upon. Mr. Rolf made his appearance, and after he left, Mr. Davies called. I told them there was nothing of special moment requiring the Committee's action at this time, and that I was glad you remained away, as it would be for your benefit, and consequently for the eventual advantage of the Institute.

Indeed I trust you will soon abandon the idea of making regular weekly visits to the City during the hot term.

I succeeded in obtaining a meeting of the Finance Committee on Thursday; the first that has been held since December last. There were present Messrs. Beebe, Bowditch, & Endicott. Mr. Bowditch would not consent to serve as Chairman; and Mr. Beebe was chosen. Mr. Rofs was in attendance. I called attention to the Bonds, & whilst the matter was under consideration, Mr. Bouve called with a letter to Mr. Rofs, which was read to the Committee. In it he expressed an earnest desire to be qualified as an Executor, and stated his willingness, in case of success upon his part, and the want of it upon Dr. Wyman's, to share with the Dr. whatever should be received for services rendered. — Mr. B. also remarked, that he thought there would be no need of further action on the part of friends as he had suggested an arrangement to Messrs. Wheeler, Beal, & Finch (who have qualified themselves) to do the whole business, & pay a certain portion to the other executors. The consequence of

this statement was that the Committee became disinclined to take, or did not see the necessity of taking any action. My own opinion (which may be of little worth) still is that we should make an effort in Dr. M. Wyman's behalf, believing that he exercised a good influence upon Dr. Walker, and that Dr. Walker intended to benefit him, by designating him as an Executor. — I stated that I had but little doubt of my ability to obtain N. Y. Bonds men; but, as above stated, the matter was dropped.

Mr. Rofs called the Committee's attention to the necessity of providing means for the completion of our Building, & stated Mr. Huntington's willingness to loan the Institute \$30,000 at 6 per cent. per annum, it being understood that the Principal would become ours at Mr. H's Death. As has occurred to some of us before, it was suggested there was no certainty of this amount coming eventually into our possession, as the Will might be revoked, or other circumstances prevent. It was finally decided, at the intimation of Mr. Bowditch, that the only satisfactory & sure course for the Institute would be this: viz. for Mr. Huntington to pay the money into the Treasury, and in consideration thereof, that an annuity of \$1,800 be paid him. Mr. Bowditch

was authorized to arrange the preliminaries with Mr. Tuxbury, and the contract will shortly be ready for the signatures of the Pres't & Treas'r.

Mr. Ruggles has gone to his Summer retreat, & did not intend to be here at this day's meeting. I expect him down in the course of the present or ensuing week. He left a message respecting the Hall-seating, which it is unnecessary to send herewith, but shall be duly delivered on your arrival.

I have communicated your wishes to Storer, and will do the same to Watson - the Dr. I mean.

As regards the Scrip fund we shall never realize our early anticipations, unless we take the business in hand ourselves; & perhaps it is too late for this.

I have not been able to see Mr. Shedd since the reception of your Letter, but on learning what progress he has made, will advise you, if necessary. I understood him to say, when last at the Office, that he had seen the Drawings.

With one day's exception, the temperature here has been thus far quite tolerable, & ~~so~~ we have enjoyed the luxury of cool nights.

I heard the Rev. J. M. Manning's Oration on the 4th. it was excellent. I spent the day solitary & alone at the Office; and the evening peacefully & quietly at home. With best regards to Mrs. Rogers & Judge Savage, & kind remembrance to Mr. Dunkle, I remain truly yours, Thomas D. Webb

Lunenburg Mass: (X)
July 6.. 1845.

My dear Sir,

I send you a statement
of your son's standing at the
June examⁿ of the Institute. This
would have been communicated
earlier but for a mistake
improper that I had mentioned
the results to your son in person
the week after the examⁿ.

In Physics	III rd	Division
Chemistry	II nd	"
Geometry	II	"
Trigonometry	IV	"
Algebra	IV	"
French	II	"

He has probably informed you
of his standing at the two preceding
examⁿ. The final examⁿ was

Completion of the whole
Course & therefore ~~more~~ ^{more}
trial than the others.

In Chemistry & Physics
your son has found less
difficulty than in his
Mathematical Studies. Should
you desire his Continuance
in the Institute as a regular
Student - he ought to enter
the 1st year Course in
Mathematics -

His attention to his duties
& his assiduous application have
~~excited~~ ^{excited} the regard of all
his teachers - and

Confidential - To E. P. Culler, Jr.,
Professor & Director, Charleston Prep
Trust that the

July 5. .
In Chemistry Final Exam.
You know how your life
difficultly than he has
in other school studies. I think
you desire his assistance
in the Institute as a regular
student. He thought to enter
the 1st year course in
Mathematics.

The attention to his studies
in the Assembly Department have
satisfied the report of all
his teachers, and

Boston July 8th 1865

Prof. Wm. B. Rogers

My Dear Sir

You have not made a visit to the city as we expected this week, and I am glad for your sake that you did not come as you need repose, and so far as I am informed there has been no need of your presence so far as the Institute is concerned. Mr. Tuxbury has made out some documents connected with Mr. Huntington's gift to the Institute which Mr. Bowditch of the Finance Committee says are satisfactory. Your signature as President is needed to make them complete, this you can attend to next time you come to the city. I have in my hands \$15,000 to pay over to the Treasurer as soon as the papers are signed and \$15,000^{more} as soon as it will be wanted to pay bills.

Please let me know as soon as convenient how you
will arrange about going to Conway as my wife wants
to accompany her on a picnic with her sisters my absence

There are four or five gentlemen desirous
of going to N. Conway to visit that
Tin mine, if you will go with
us and give us the benefit
of your observations, you will
I think have a pleasant trip
be about say 5 days or more if
necessary, and if the mine is
valuable I have a scheme
in my head to make some
money out of it for the benefit
of our school of mines
you go as the guest of the
company and of course will
have no expenses Mrs. Rogers
is invited also, if she will
do us the favour to be one
of the party we will give ^{you}
as much time to ramble
over the White Mountains as
you choose to take after we
have examined the mine, my
wife will not be able to go with
me but I shall take Waldo

Yours very truly
Wm. D. Bass

I have not made
a visit to the city as my wife
thinks it best to stay at home
for your sake that you may not
be as you were before, and as
I am informed that she has
no more of your presence so far as
the distribution of money, the
has made out some other
committee with the standing order
gift to the children which she
donated to the Government
say an anti-slavery paper
as she is not as usual to
them completely, this you can
not but you come to the city & have
in my hands \$1000 to pay on to the
Government as soon as the paper is signed
and \$1000 as soon as it comes in
concerning to pay

Conway July 2. 1852

I have a few questions
 I am going to be away to visit that
 of your observations you need
 in about 20 days or more if
 necessary, and if the weather is
 in my power to make soon
 of your school of course
 I have no experience of the
 is in the nature of the
 also in the power to be
 of the part we need give
 as much time to remember
 over the White Mountains as
 you have to take after we
 have examined the country, my
 wife need not be able to go with
 me but I shall take Walter
 from my wife
 Mrs. B.

(X)

Dumpleton Mass. Jul. 8. 1865.

Prof. Rogers.

Dear Sir,

Last Spring I addressed you, asking information concerning the School of Industrial Science. I received in reply your letter with the "Scope and Plan". As it is not convenient for me to visit Boston at present I have taken the liberty of addressing you again on the subject.

Will you be kind enough to inform me in what branches students will be examined for admission to the school and when the first term will commence

I would like to know if the
School offers advantage as good
as or better than those of
any other Scientific School
in the Country.

I would thank you for any
other information you may
be pleased to add.

Yours Respectfully,

Edmund G. Hudson
Templeton Mass.

from

Edward J. Hudson

Templeton Mass

July 11. 65

Sussexburg
July 9. 1845-

My dear D.

I write a hurried line
to say that I shall be in
Boston on Tuesday morning -
in time for the Beulah Course;
& that I shall probably postpone
in the City until Wednesday
afternoon - in order to do
up Sunday's stores of Institute
business & other matters.

Mr. Punske will go down
with me & probably remain
until Sunday.

Yours very truly

William B. Pope.

Thanks for your very satisfactory letter.
Kind regards to Miss Pope; Peggles &c.

Student,

about best ropes
July 11. 65,

①

Swanburg Prof.
July 13. 1855.

Edmund J. Hudson Esq.

Dear Sir,

I am happy to
reply to your acceptable letter
of the 8th Inst. forwarded to me
from Boston. but must refer
you for most of the particulars
regarding the opening of the
School to a printed Circular
now in course of preparation
& of which I shall not
fail to send you a copy
as soon as it has been
revised & published.

Meanwhile I can
say that the classes will be
opened early in October, &

that we expect our noble
new building to be sufficiently
advanced to receive them at
that time

For entering the 1st years
Course of the regular Studies
the student will be expected
to have a good acquaintance
with the branches usually
taught in our English Schools,
including familiarity with
the leading rules & operations
of Arithmetic & a ready
use of the Pen. He must
moreover have some knowledge
of Algebra & Geometry, &
the student will be particularly
expected to have a
lower & an upper Division
in the 1st Year's Class. Students
who are not at first qualified

to enter usefully the XIth Upper
Division will have the opportunity
of preparing themselves for that
in the lower Division, for
which they will be advanced
when a higher preliminary
qualification will be
required. In the case of the
upper or lower division

By this somewhat plastic
arrangement at the boys?
the student will be
able to see the progress of
prepar. of students who shall
necess: prep: in a few hours
before the school is closed
necess: prep: in a few
subjects of the last year
to might receive the from the
School - which is the chief
the prep: loss
the subject of prep:
for the Courses.

The public: was the student
sincerely
July last has had great success,
many of the pupils will be
concerned to enter the 2^d year course
near our town & the rest will go

republican to the left division
of the 7th year.

It is the purpose of the set to
offer the means of attainment of
complete education in the applied sciences,
and I am persuaded that in the
method of instruction in the faculty,
for theory & practice it will be
beneficial to the propaganda
Comprehension - practical profession
which it has, set forth.

Aug 13. 65.

Prof.

Spencer.

Dr. E. J. Weston

Lunenburg, Mass. July 13th, 1865.

My dear young Friend:

Your note of the 11th came to hand yesterday as I was preparing to leave the City . I commend your desire to understand the causes of things as well as to know the facts themselves and shall always be happy to help you in such enquiries when I can .

If a rope consisted simply of a bundle of straight parallel fibres, the entrance of water between them would simply force them farther apart and thus swell the rope, and as the wetting of a rope does not necessarily change its length, the bundle would be unaccompanied either by a lengthening or a shortening of the rope .

But in the rope as actually constructed, the component fibres and strands are all spirals . The water entering between these spirals swells or thickens the rope and in doing this must of course enlarge the diameter of each spiral turn . To understand the effect of this in the length of the rope, let A B represent a single spiral fibre or strand of ten turns, and having a length from A to B of 10 inches, while the actual length, following the winds of the fibre is much greater. If now the horizontal breadth of the spiral be increased in each of its turns while the number of its turns remains the same, the turns themselves must become closer together -- and then the 10 turns will occupy a less length than A B or 10 inches . In the same way, the spiral turns of the fibres or strands of a rope must come closer together in consequence of the enlarged breadth due

to the entrance of the water between the fibres, and hence the wetting of a twisted cord or rope must make it shorter .

The shortened and widened spiral will then be as represented in C D .

MADE IN U-S-A

W.S. & B. REGENT LINEN

Heating + Ventilation.

X

Boston July 13 1865

Prof. Wm. V. Rogers
Lunenburg, Mass.

Dear Sir;

It seems to me proper, and no less than just to Mr. Preston, that the Committee on Warming and Ventilation should ask of him a statement of what he intended to do in the way of securing warmth and fresh air to the occupants of the Institute building. This would enable him to put himself right before the government, if his plans are of value; and on the other hand if a description of all his plans for this purpose were safely on record, the Committee might be free from much future annoyance and trouble when their

plans come to be discussed - I should feel at greater liberty in making up a statement of what seems necessary to be done, and we should not be in danger of inferring from the plans and building, one thing, while Mr. Preston could say that he meant another. If such a request on the part of our committee seems to you proper, I should be glad if you would make it, and perhaps Mr. Preston's answer could be made before we meet on Tuesday next -

Yours, very respectfully,
J. Herbert Sheard.

To Mr. Lloyd,

Washington Prof.
July 14. 1865

My dear Sir.

In order to have the
subject fully before them,
the Comm: on Warming & Ventilatⁿ,
appointed by the Gov^t,

request of you a statement
of the means & plans which
you proposed to adopt for
securing warmth & fresh air
to the occupants of the
Gov^t Buildings.

~~The Comm: on Warming & Ventilatⁿ will be
interested in the
questions involved, & will
be pleased to present
the subject to the Gov^t.~~

with all the due
and your great thought
to practical suggestions
such a coming from any
quarter & especially from one
of the Board - large when
you Architect.

I do not know to what
extent you had determined any
plan for working & eventually
but I have rec^d the reference
that you had framed some general
Scheme for effecting these
objects, though perhaps without
working out the details -

Please at your earliest
convenience forward the Com^{tee}
a description of the arrangements
general & specific which
you proposed to adopt, for
the above purpose

148
I have referred to.

I shall be in Boston on
Monday & perhaps by that time
or soon after you may be
able to give this and to the
ingenuity of the Com^{tee}.

I remain yours very respectfully
W. B. R.

To John - Proctor -

July 14, 1865.

Dear Sir,

I have the honor to receive your letter of the 10th inst.

in relation to the proposed scheme for effecting the objects therein mentioned.

I have read the same with interest and have no objection to your proceeding in the premises.

I have no objection to your proceeding in the premises.

I have no objection to your proceeding in the premises.

I have no objection to your proceeding in the premises.

I have no objection to your proceeding in the premises.

I have no objection to your proceeding in the premises.

I have no objection to your proceeding in the premises.

29/

Boston July 15th 1865

My dear Sir,

Yours of the 5th Inst was duly received. In reply I wish to say that you have been misinformed in regard to my having expressed a purpose to give to the Institute of Technology the funds necessary for the establishment of a mining school.

For some time I have entertained the idea of contributing a sum of money to lay the foundation, at least, of such a school in Massachusetts; and have been endeavoring in my own way to obtain information to determine my own mind as to the best practical mode of carrying into effect that idea. I have heard and considered what some friends of the Institute of Technology had to say in favor of connecting what I might do with that

institution; and I have also considered the advantages of connecting it with the University of Cambridge.

I had made up my mind that I should prefer Professor J. S. Whitney to carry out my idea, if he would undertake it, and accordingly proposed to ~~him~~ to take the charge of it.

Yesterday I received a note from Prof: Whitney stating ~~that~~ he had been informed that he was considered an obstacle to my giving to the Institute of Technology the funds necessary for the establishment of a mining school; and that he was unwilling to have it supposed he had turned money from that Institution which its managers considered as property or legitimately destined for them.

Mr Whitney does not state to me

who gave him this information, but I consider that it was unwarranted; and I hope the foregoing statement will satisfy you that it was unjust towards Professor Whitney as well as towards me.

I fear the great error of our mutual friend, W. S. Ross, for the success of the Institute of Technology may have caused this misunderstanding.

Very respectfully Yours,

Hooper

Prof. Wm. A. Brown
New York

Lyonnberg

July 17. 1865.

My dear Sir,

Your letter of the 15th inst. in reply to the note which I had the honor to address you on the 5th inst. is just rec^d. I hasten to inform you that I have at no time had any communication with Prof. Whitney in reference to the Inst. of Technology & its proposed Department of Geology & Mining.

Some days ago, one of the Members of the Inst. a personal friend of Prof. W.

proposed writing to
that gentleman on the
subject of a school of
mines, but of the form
& substance of this
communication I know
nothing further than
that I understood it to
be intended merely as a
letter of friendly enquiry
& conference.

I regret that I should
have been misinformed as
to your views ~~and purposes~~
respecting the Institute. But
I beg you to be assured
that it was not until

after repeated statements,
the results as I was informed
of several conversations
with you on the subject,
that I yielded to what
now proves to have been
so grave a misapprehension
of your predilections &
purposes.

Believe me

Yours truly

William B Rogers

Gov. Saml. Hooper.

My Dear Sir

I should have replied to your very kind & encouraging letter much sooner - were it not that I could not obtain a copy of the report upon the Memorial - which I wished to send with my answer. -

I send one by this Post. -

I am very deeply interested in the design of a Historic Hall - to contain memorials of all who have nobly served or nobly died when the blessing shined

structure is ever sacred remembrance,
and to me it is infinitely
more touching & beautiful & will
be of far surer perpetuity - the
entrance then is the great Hall
of the College - where the
alumni will meet together
some a half every year - then
to erect any more monumental
granite stone.

If you can see my
I ask your personal influence.
It might be of no little
influence if I could be authori-
tized to say that you a father
who has given so noble a

the window with those few noble persons
the Monument Hall &c.

Prof. Wm B. Rogers
My Dear Sir,

Your letter of July 17th reached me yesterday morning. I fully appreciate the truth of your remarks that no written statement of the position and prospects of the Institute can be perfectly adequate and satisfactory. I am nevertheless very much obliged to you for the full and detailed information which you have so kindly given me.

By your own letters, the letters of Mr Storey, and two or three notes from other kind friends, I have been put in possession of all the information I need for an intelligent decision of the question you asked me in your letter of June 6th.

I have the honor to accept the proposal made in that letter. If the Government the 2nd of September, we shall try to

the Institute should ratify the proposition
you then made to me, it will be my
desire and aim to carry out to the best
of my ability your own views and those
of the Faculty in ^{regard to} the organization and
development of the School.

And now, My Dear Sir, let me say that
I look forward with great pleasure to coming
home to a definite and useful occupation
in my own profession, and that I am
very sincerely obliged to you for the opportunity
thus afforded me - an opportunity all the
more satisfactory because I feel very sure
that the Institution which is growing up
under your guidance will achieve a
prompt success and become an honor to
the State & the City.

Will you please give my cordial regards
to Prof. Runkle, who, I believe, is spending
the summer in your vicinity.

We are just going to England & Scotland
for a few weeks before sailing for home on
the 2nd of September, & we shall try to

Yours
Charles F. Smith
Cincinnati

the Institute should satisfy the Professor
your own needs to me, it will be only
to give me a chance to carry out to the best
of my ability your own views and those
of the Faculty in the organization and
development of the school.
I have now, Mr. Dean, let me say that
I look forward with great pleasure to coming
back to a definite and useful occupation
in your Professor, and that I am
very anxious to give you the opportunity
that of which I am - an opportunity all the
more satisfactory because I feel very sure
that the Institute which is growing up
under your guidance will achieve a
wonderful success and become an honor to
the State of the City.
Will you please give my cordial regards
to Prof. Kunkle, who I believe is spending
the summer in your vicinity.
We are just going to England to lecture
for a few weeks before coming for home on
the 1st of September, but shall try to

Mr. Dean
Prof. Kunkle
Prof. Kunkle

August 1865, Sunny Hill .

My dear Henry :

* * * * *

We will receive from Dr. Walker's legacy in the course of a few weeks the chief part of his generous bequest amounting to some 160 or 170 thousand dollars, the chief part of which I most earnestly hope may be set aside for the use of the school.

We have been hoping for a large contribution from Mr. Hooper (entre nous) for the department of mining and geology .

But he has chosen Whitney for this guide in the matter and I presume the fund will be appropriated to a school of mining under W's care in connection with Cambridge .

The Alumni of Harvard are moving in a really noble scheme-- that of building a Memorial Hall which shall at once be a monument to the young heroes among her students who have fallen in the war-- and a means of accomodating the College and Alumni on great public occasions . There will be a great meeting at the College on Friday to commemorate these brave young men.

Boston Aug. 2. 1875.

My dear Prof.

Inquiry has been made here as to the qualifications of W. Hague now at Lake Superior, as a ~~foreign~~ teacher of Practical Engineering.

Can you give me your impressions in regard to his attainments & experience in this & kindred subjects.

Nothing may come of this inquiry & for the

~~present - at least - I
want to have nothing
said on the subject -~~

~~Your truly -~~

~~W. B. Rogers.~~

What is extending confid^e;
but your opinion
would be of great weight
with me as I am
personally no acquaintance
with the gentleman -

W. B. R.

To Prop. Books

for Prof. Brush.

(X)

Legendy, Hague Sheffield Scientific School of Yale College,
New Haven, Connecticut, Aug 10th 1885

37)

My dear Professor,

Your favor came
a few days since. I am glad
to know that the Technological
Institute is prospering so well.

Hague is a very superior
man and my advice would
be to secure him if possible.

Few men in the country are
equal to him in ability and

^{power still}
~~anywhere~~ ^{anywhere} ~~but~~ his op-
portunities for theoretical training
and practical experience in
mining.

You say you have never met him,
I am sorry you have ~~not~~ not
as I am sure you would
have been pleasantly impressed
by his exceedingly dignified and
^{countless} manners - He is ~~a~~ man
of good judgment and great
perseverance. I question very
much whether you can induce ^{him}
to leave his present situation
as I know it will be next
to impossible to get him away
until he has realized all
that he has promised the
Company. I know that he
has had tempting offers to
California & Nevada, but his
sense of duty would not permit

him to leave his present situation.
As for his training - he commenced
with Stanford, then went to Göttingen
and studied with Hölder & afterwards
spent two years at Freiberg. On
returning home he accepted a
position under W. Webb, the
great ship-builder, to survey
Jarvis & Bakers Island in
the Pacific. He was ^{about} three years
exploring these and other Islands,
visiting the Sandwich Islands
and California. When he came
back to this country he was
with us for some months
working up his results, which
doubtless you have read in the
Ann. Journ. Science.

Two years ago he went to Lake Superior to take charge of the Albany & Boston Mine. Any one who has been recently in that region will tell you how skillfully he has developed that property so that now it bids fair in a comparatively short period to rank with the Quincy Cliff & Central — the great mines of that wonderful region.

With such ^{men} associated with yourself as Stone, Elias & Hague, the Technological Institute must succeed.

Sincerely your friend

Geo. J. Brush

Prof. W. B. Rogers

Louisville Aug 10. 1865

Prof. Rogers,

si:

Having decided to enter a Scientific Institution in order to continue my education, I take the liberty to address you for information concerning the School of Industrial Science, which I hear is to be opened in Boston next October.

I attended the school of the Messrs Allen, at West Newton, Mass. last year, and studied with the intention of entering

the Institute at Troy N.Y.
but my parents prefer
that I should attend
school in or near Bos-
ton, if possible.

I would therefore
be obliged to you for
a circular and any
other information con-
cerning the school.

J. Herbert Shedd,

Civil Engineer,

No. 42, COURT STREET.

BOSTON, Aug. 15 1865

Dear Sir:

On looking at the building with reference to raising the floor of the basement passage, I was convinced that the effect would be bad if the floor should be raised to a level with the entrance at the Newbury St. end. I do not see how the height could be much more than eleven feet in the clear if finished as at first intended, & this seems quite low for a room 28 feet wide and 86 feet long, which are about the dimensions of the central hall.

If the height is cut down to 8 to 9 feet I am afraid the Com. will regret it after it is done.

It is also, in my mind,

a great objection to have the passage higher than each room leading out of it, making it necessary to put in some six flights of steps running out into the rooms adjoining. (There are six rooms) These must of course be passed over many times a day by those who use the rooms.

Perhaps this can be obviated, but I do not see how. The cellar would furnish pretty good storage room as it is for articles of reasonable size - I believe the height is $4\frac{3}{4}$ ft. in the clear.

The members of the bld. com. failed to meet me on Monday & I have not as yet heard from Dr. Webb as to another appointment.

Meantime the construction of the building is going on -

Yours, respectfully,

J. Herbert Shedd.

[The text on this page is extremely faint and illegible due to fading and bleed-through from the reverse side. It appears to be a letter or a document with several paragraphs.]

Mr. D. Ross Esq

My Dear Sir,

It is fitting to hear to
 know that it is becoming important to
 me to know whether you are likely to carry
 out the arrangement about the Secretary-
 ship of the M. I. T. Certain young
 men among my former pupils are waiting
 to know whether I can complete their
 preparation for Colley. If you sh^d appoint
 me Sec^y I sh^d give them up - if not I
 sh^d continue on with them, and look for
 more; and the time is coming when such
 arrangements for the winter must be
 made. Mr. Regent has spoken to me about
 taking the lecture on English literature.
 This I am quite prepared to do, as I have
 lectured on the subject in the Salem
 Normal School for two winters, and have
 a very large collection of material. I
 suppose however that at present your funds
 would not allow you to make this much
 of an object independent of the Secretaryship.
 For the present I suppose I could give

both Offices and the two together wd
give me such a moderate income as
I c^d get along with.

I need not say that
I am hoping a decision in the matter
without prejudice to any other claim
upon the place. I am only anxious
that some decision sh^d be come to.

I will call at one
tomorrow in hopes of finding you at
your Office.

With much regard
You very truly

H. P. Ackley

Aug 21 '55

In reply I said to Mr. Atkinson
that I expected to see you
this week, but now that
we are not likely to meet
if your health will
allow of it I wish
you would send to him
M.D.R.

Auburndale

August 24th /65

Prof. Rogers

My Dear Sir

We had a ^{joint} meeting of the Building and Ventilating Committee, (rather informal for want of quorums,) we took the responsibility to request Mr Shurd to go ahead, and order a Steam Boiler, I am still of the same opinion as formerly about the floor in the basement, but I will cheerfully yield to what I find to be the wishes of yourself & Mr Bunch, I am almost daily meeting with persons who want to send students to our school, the recent article in the Journal has had a good effect

I must give you some advice
which is to keep quiet in your
present state of health, we
cant afford to have you
wear out as fast as you
will if you work as hard
the coming campaign of the
school as you did last
year. I too have been
quite unwell for the past
ten days, but am now
nearly well again, I begin
to feel very nervous about
getting our building done
sufficient to begin the school
within its walls before January.
The principal object of
this letter is to send the
Enclosure from Wm Atkinson
I infer from ^{the general tenor of} your remarks
the last time we talked
about Dr Webb that

I mean did write a decent looking
but it seems to me judging
from this that I am getting
from back to work

you dont see the way clear
to dispense with his services,
as you say in this, so say I
I want to secure Atkinson
to help us this year
as we shall never have
more to do ^{in any one year} than the one
before us, I cant afford
to give \$5,000 to the
Institute now but I will
economize in my other expenses
and give the interest of that
sum ^{\$300} towards securing
his services one year
on trial, I want him
to help me organize
my museum department
I can score out some
ideas and I want
him to help me
hammer them into some
sort of system

Should like to do this on
your private account so as to
have some claim on his
Services, to make up for
my own short comings
What say you? I am
exceedingly desirous now
more than ever to get our
School of mines into a
prominent position, per se
as well as on account of
not being overshadowed ~~by~~
(if you will admit the word)
by Light from Cambridge
My kind regards to your
good wife, - (It seems
an age since I have had
a good old fashioned chat
with you both together
about the Institute)

And believe me
as ever
Truly Yours
Wm. D. Rodd

Williamstown - August 29th 1865

(X)

Dear Sir

That the College of W^m & Mary was destroyed ^{the fact during the late civil war} by stragglers from the U.S. Army. has determined its friends to make an appeal in its behalf to the Northern People. ^{My claim by the government exists} ^{Running} th how much interested in the Institution you have always been, I write to ask your advice & suggestions as to the best means of securing success. The main Building has been burned - also a dwelling house - near in rear of yard - All the outbuildings have been destroyed. The Professor, in which your Father so long lived, has been, except the walls, & roof, pulled to pieces. In consequence of the burning happening in the time of war the insurance is worth nothing, & the depreciation of securities has diminished the fund by about \$40,000. Under these circumstances it is almost certain the College cannot be restored without aid from the North & liberal aid too. Now that slavery is gone this state will be settled by Northern men, at least I hope so. There is then almost the same reason for aiding the cause of education here as in your own section. Be kind enough to direct your reply to me care of William, Reynolds & Son Baltimore Md, to believe that I remain -

Yours with much respect
 Benj. S. Ewell -
 President W^m & Mary College

Profrper William, B. Rogers -

Mr Pres. Ewell.

Wm & Mary.

Aug. 1865,

OFFICE UNITED STATES

Sanitary Commission

Portland, Me Sept 5th 1865
 Louisville, Ky

Prof W B Rogers
 My Dear Sir

I returned you
 Virginia fossils a few days
 since, without note or comment
 & expecting confidently that
 I should meet you at Northampton
 - the meeting of the Academy being
 held within a hundred miles
 of Boston - I was greatly
 disappointed on many accounts
 by your absence, and had
 decided to go to Boston to spend
 Monday - after the meeting with you

when I was again disappointed
by learning that you were
not in Boston - Upon
which I turned my back
upon the East in disgust
and came home in fact
as steam could bring me

I want very much to
have a talk with you on
several subjects, and if
I am in New York, as I
expect to be, in October
I shall certainly run up
to Boston and see you and
yourself -

I want to talk Academy

to you - As you will have learned
it will be expanded and
rendered more Democratic
& popular, as the next meeting
or - Experi - What shall it
be?

I want too to talk over
with you the fossil plants
of the Richmond horizon
I have lately been studying
up the subject, and when
I can get access to specimens
of all the species, shall I think
be able to make some very
interesting deductions from
them - I have lately received
a collection of fossil plants
from Mexico which includes

you. Strauzeria Magnifolia
Pecopteris falcatus of Eumens
P. ballatus? Buntary. - and
Otozantia Macombii. A new
a beautiful Cycad which I
obtained from Marcou's Jurassic
of New Mexico - etc - all
associated with unmistakable
Jurassic mollusks. -

I want much to get access
to Eumens' collections, and
to see the novation of your specimens
of Pecopteris Whitbrenii.

Can you not obtain good sails
of Triassic + Jurassic (European)
plants for your New Cabinet
with Techn. Suit? Nothing would
help our geology more just now.
- With kind regards to Prof. A. D. R.
I am ever yours. - Humbly but cordially
Jas. H. Seward

421/

Lunenburg Mass.

Sept 8. 1855

My dear Sir.

Our Institute of Technology
will ere long have need of a
Prof to take charge of the
Subject of Mining & Mechⁿ Engineering.
In looking around for a
suitable person for this important
Chair I have thought of your
son, now I believe professionally
employed on Lake Superior,
& I write to you in the hope
that you may be able to
give me some information regarding
his probable future plans &
predilections.

I know not what other
persons may in the course of the
season be brought before our notice

in this connection, but I believe the place can be secured for your son should he, ^{only as regards} desire ^{to} be prepared at an early day to enter ^{the} beauty upon the work of the department. The

endowment of the Chair for the first year would ^{be well as I can estimate} probably not exceed \$2000; ~~but I think~~

~~and perhaps~~ ~~be~~ ~~confidently~~ ~~of~~ ~~the~~ ~~fact~~ ~~that~~ ~~it~~ ~~will~~ ~~not~~ ~~be~~ ~~expected~~ ~~at~~ ~~any~~ ~~time~~ ~~to~~ ~~reach~~ ^{the} ^{large} ^{amount} ^{alluded} ^{to} ⁱⁿ ^{the} ^{successful} ^{practice} ^{company.}

~~If~~ ~~you~~ ~~can~~ ~~find~~ ~~him~~ ~~at~~ ~~the~~ ~~office~~ ~~of~~ ~~a~~ ~~suitable~~ ~~teacher~~ ~~in~~ ~~this~~ ~~department,~~ ~~he~~

I have however been led to believe that his taste & ambition would make the duties of such a Chair ~~sooner~~ ^{so} agreeable to him as to ~~afford~~ ~~an~~ ~~opportunity~~ ~~to~~ ~~offer~~ ~~in~~ ~~the~~ ~~future~~ ~~for~~ ~~the~~ ~~department~~ ~~in~~ ~~this~~ ~~respect.~~

~~Can~~ ~~you~~ ~~write~~ ~~your~~ ~~Office~~ ~~by~~ ~~letting~~ ~~me~~ ~~know~~ ~~what~~ ~~you~~ ~~think~~ ~~of~~ ~~the~~ ~~probability~~ ~~that~~ ~~your~~ ~~son~~ ~~would~~ ~~desire~~ ~~to~~ ~~secure~~ ~~the~~ ~~place~~ ~~in~~ ~~question~~ ~~and~~ ~~if~~ ~~not~~ ~~at~~ ~~the~~ ~~present~~ ~~time~~ ~~to~~ ~~be~~ ~~enjoyed~~ ~~by~~ ~~him~~ ~~and~~ ~~whether~~ ~~he~~ ~~would~~ ~~be~~ ~~able~~ ~~to~~ ~~release~~ ~~himself~~ ~~from~~ ~~his~~ ~~present~~ ~~duties~~ ~~and~~ ~~be~~ ~~in~~ ~~the~~ ~~U. S. ^{States}~~ ~~therein.~~

I regret that I did not meet with him when he was in Boston last Spring, I shall be in Boston during Wednesday & Thursday of next week.

Please put this with an
early reply addressed to
1. T. J. Bond - I will
be in the city on Wed -
Thurs next & may
have to be gone to
Call upon you

Sept. 8, 1875 -

Respectfully,
T. Bond & Rogers

20 Court St. Boston

Sept. 9, 1868-

Dear Sir,

The Executors of the will of Dr. Walker have received notice of three claims on the estate from Hon. Sidney Burtett Counsel for the claimants, copies of which & of Mr. Burtett's communication are enclosed.

As the claims in the aggregate are of considerable magnitude, and the widows & legatees are the parties interested, the Executors have deemed it proper to call their attention to them, before taking any action in regard to the subject,

The Executors will be glad to receive such suggestions as your Committee may have to make.

Respectfully,
Ralph W. Hunt

Att. of Walker

for the Executors.

W. B. Raym. Esq.

Chairman Committee of

Institute of Technology

Sept: 5th 1865
Regarding the Will
of Dr. Walker -

(Copy)

To the Executor of the Will of

Gen J. Walker

Gentlemen

In behalf of Mrs Walk-

er I enclose you two separate claims upon the
estate of Dr Walker to which I ask your attention.

The first is a claim for \$5660.66 with
the accumulated interest, being a sum received by Dr.
Walker subsequent to Feb. 24, 1856. at which date Dr.
Walker by articles of separation between him & Mrs.
Walker agreed that all property which should
come to his wife by devise or descent should be
held and disposed of by her as if she were un-
married.

The second claim is for the income of the
trust fund received by him from her after the arti-
cles of separation in trust to be by him invested
for her. The fact of the receipt and of the agree-
ment to invest is known to Mr Hiel Crocker
and to the children of Dr. Walker -

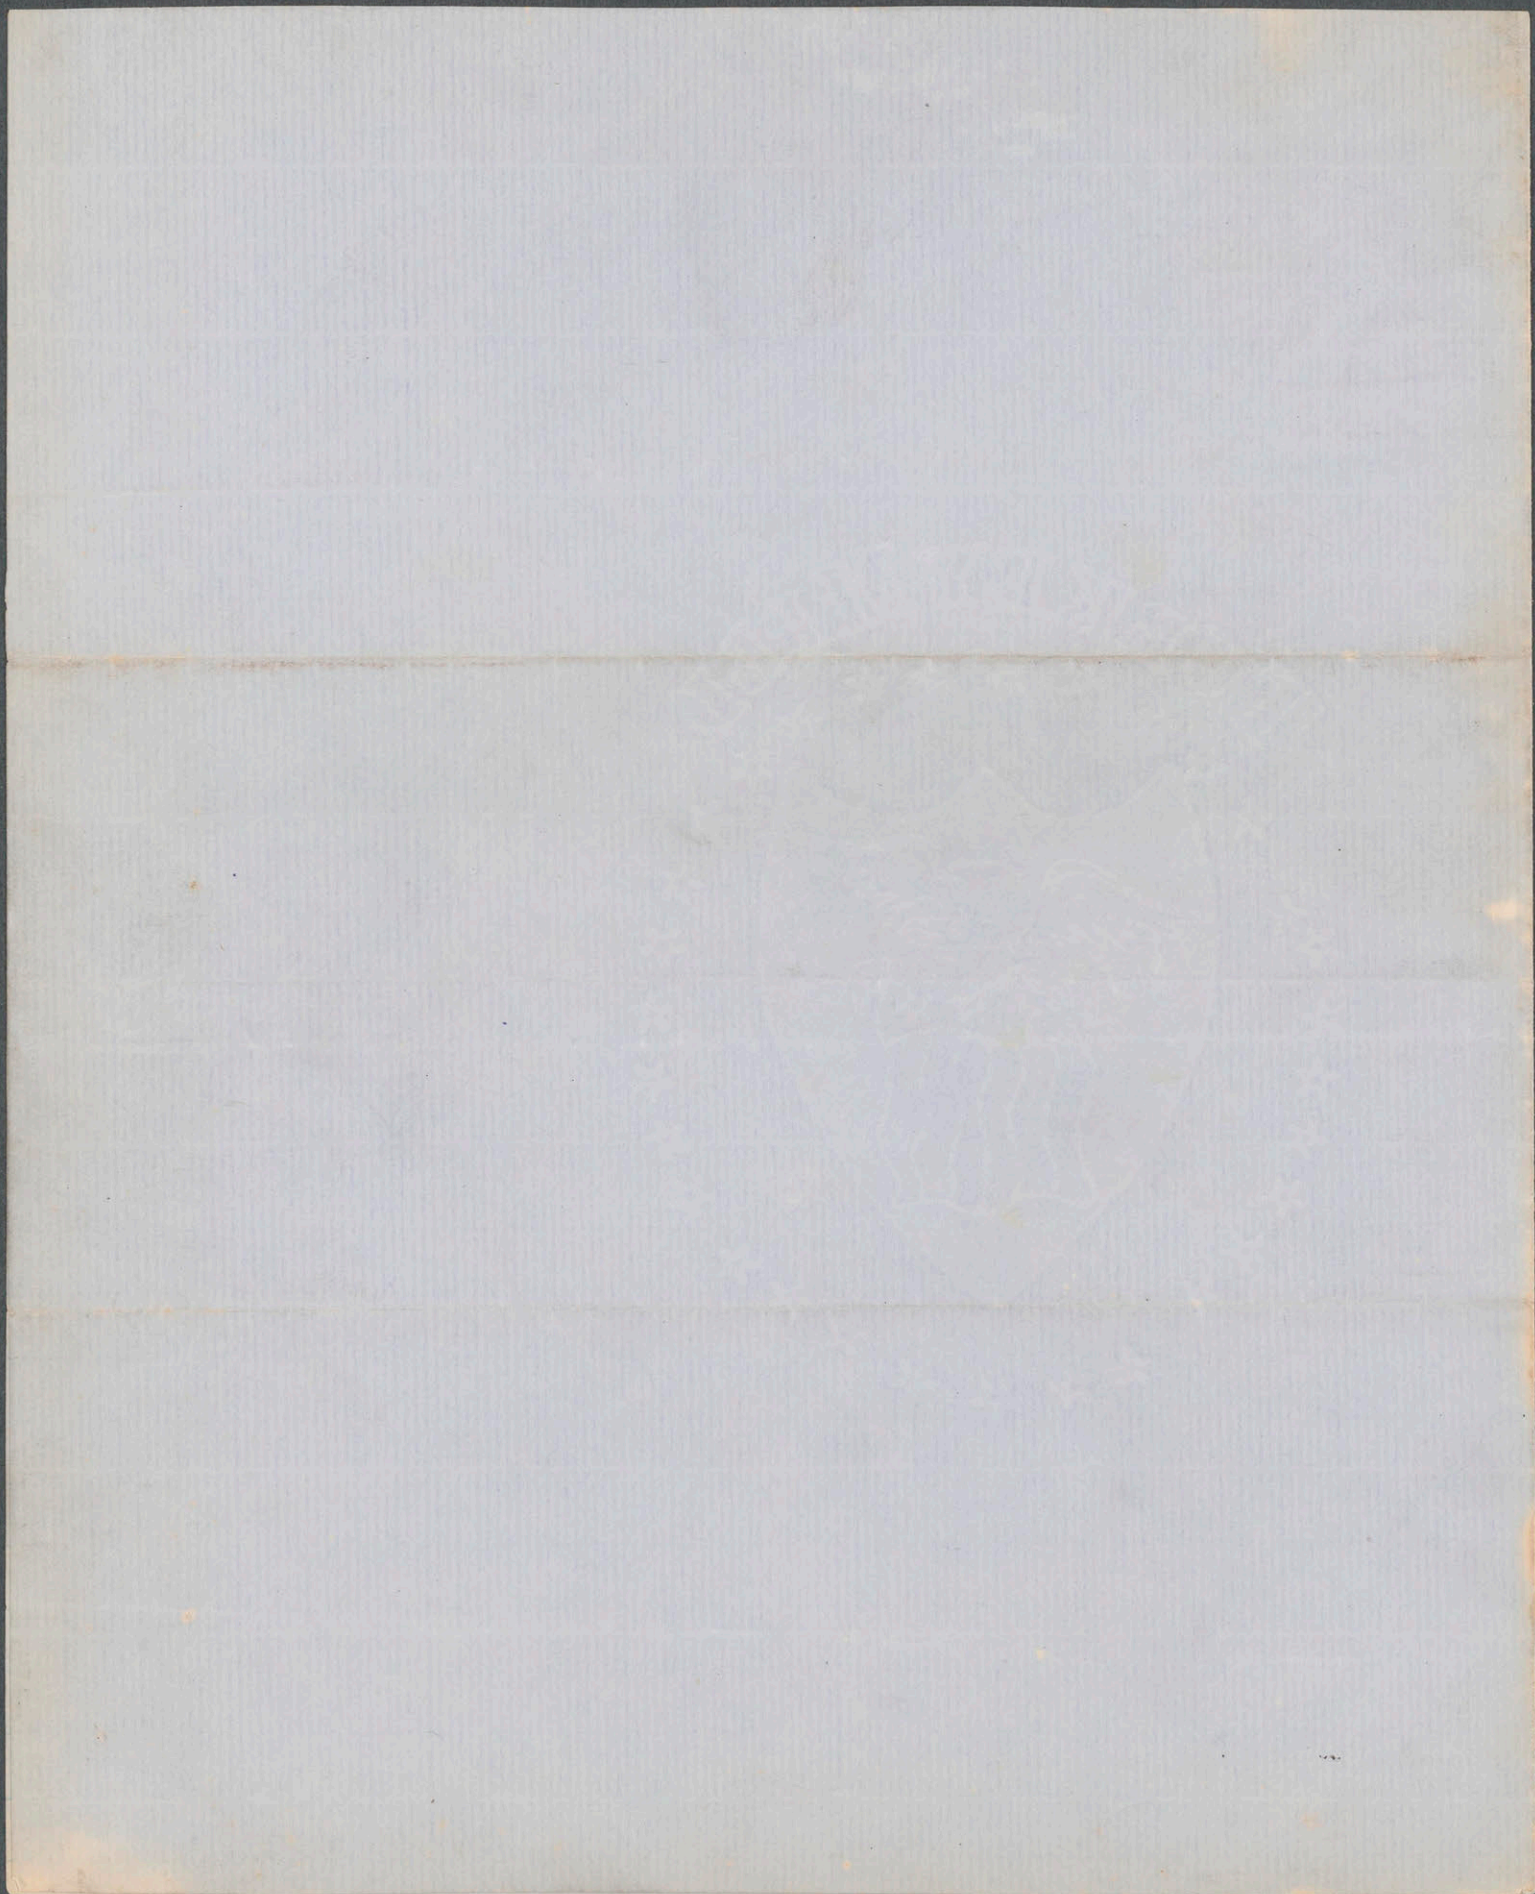

I have caused the interest account
to be stated with annual rests since no account
of the investment has ever been furnished to Mrs.
Walker and I infer that the investments

whatever they were, yielded at least an annual income.

There has also been placed in my hands a note of Dr. Walker to his daughter Rosely dated April 11, 1864 for \$2850. payable on demand with interest; in which is indorsed "June 8, 1860. Received \$1220. - the same having been invested for me on my account in Mercantile Marine Insurance Stock at \$122. per share -

Will you be good enough to give them claim your attention. Any explanations in my power to afford you will be readily given -
Respectfully
Yrs old son

Boston Sept 4 '65 (Sij) S Bartlett

Boston, Sept 11th 1885

Prof. Rogers

My dear Sir,

Your note suggesting
inquiries in regard to
the situation and engagements
of my son, James D. Hague
and as to the probability
of his accepting an ap-
pointment to a Chair
in the Institute of Technology
I have transmitted to him.
It was sent by mail
this morning. I have

No doubt that he would highly appreciate the honor conferred upon him by such an appointment, and the congenial association, in which its acceptance would place him; I am quite sure, too, that his tastes and predilections, as a student, would dispose him to welcome the proposal; but whether his engagements for the present, or his plans for the future be such as to place any insurmountable obstacle in the way of his acceptance of the position I am not able to determine.

I need not assure

you that it would give me great pleasure to welcome him back to Boston, the home of his early youth. Indeed, I am quite desirous that he should have an opportunity of leaving the comparative solitude, in which he has been living, so as to enjoy again the benefits of cultivated society.

I hope to hear from him, ere long; and I shall be glad of an opportunity to confer with you further in regard to the subject of your communication.

I am, Sir,
Yours very respectfully,
Wm. H. Rague.

Rev. Mr. Waques

Deputy to his Son.

From my acquaintance with these truly valuable sources of State and National wealth being confined to such information as I have been able to glean by a hasty trip through a portion of the State, and to

If you have friends coming to Va, desiring to visit mines I will gladly assist them.

44)

(X)

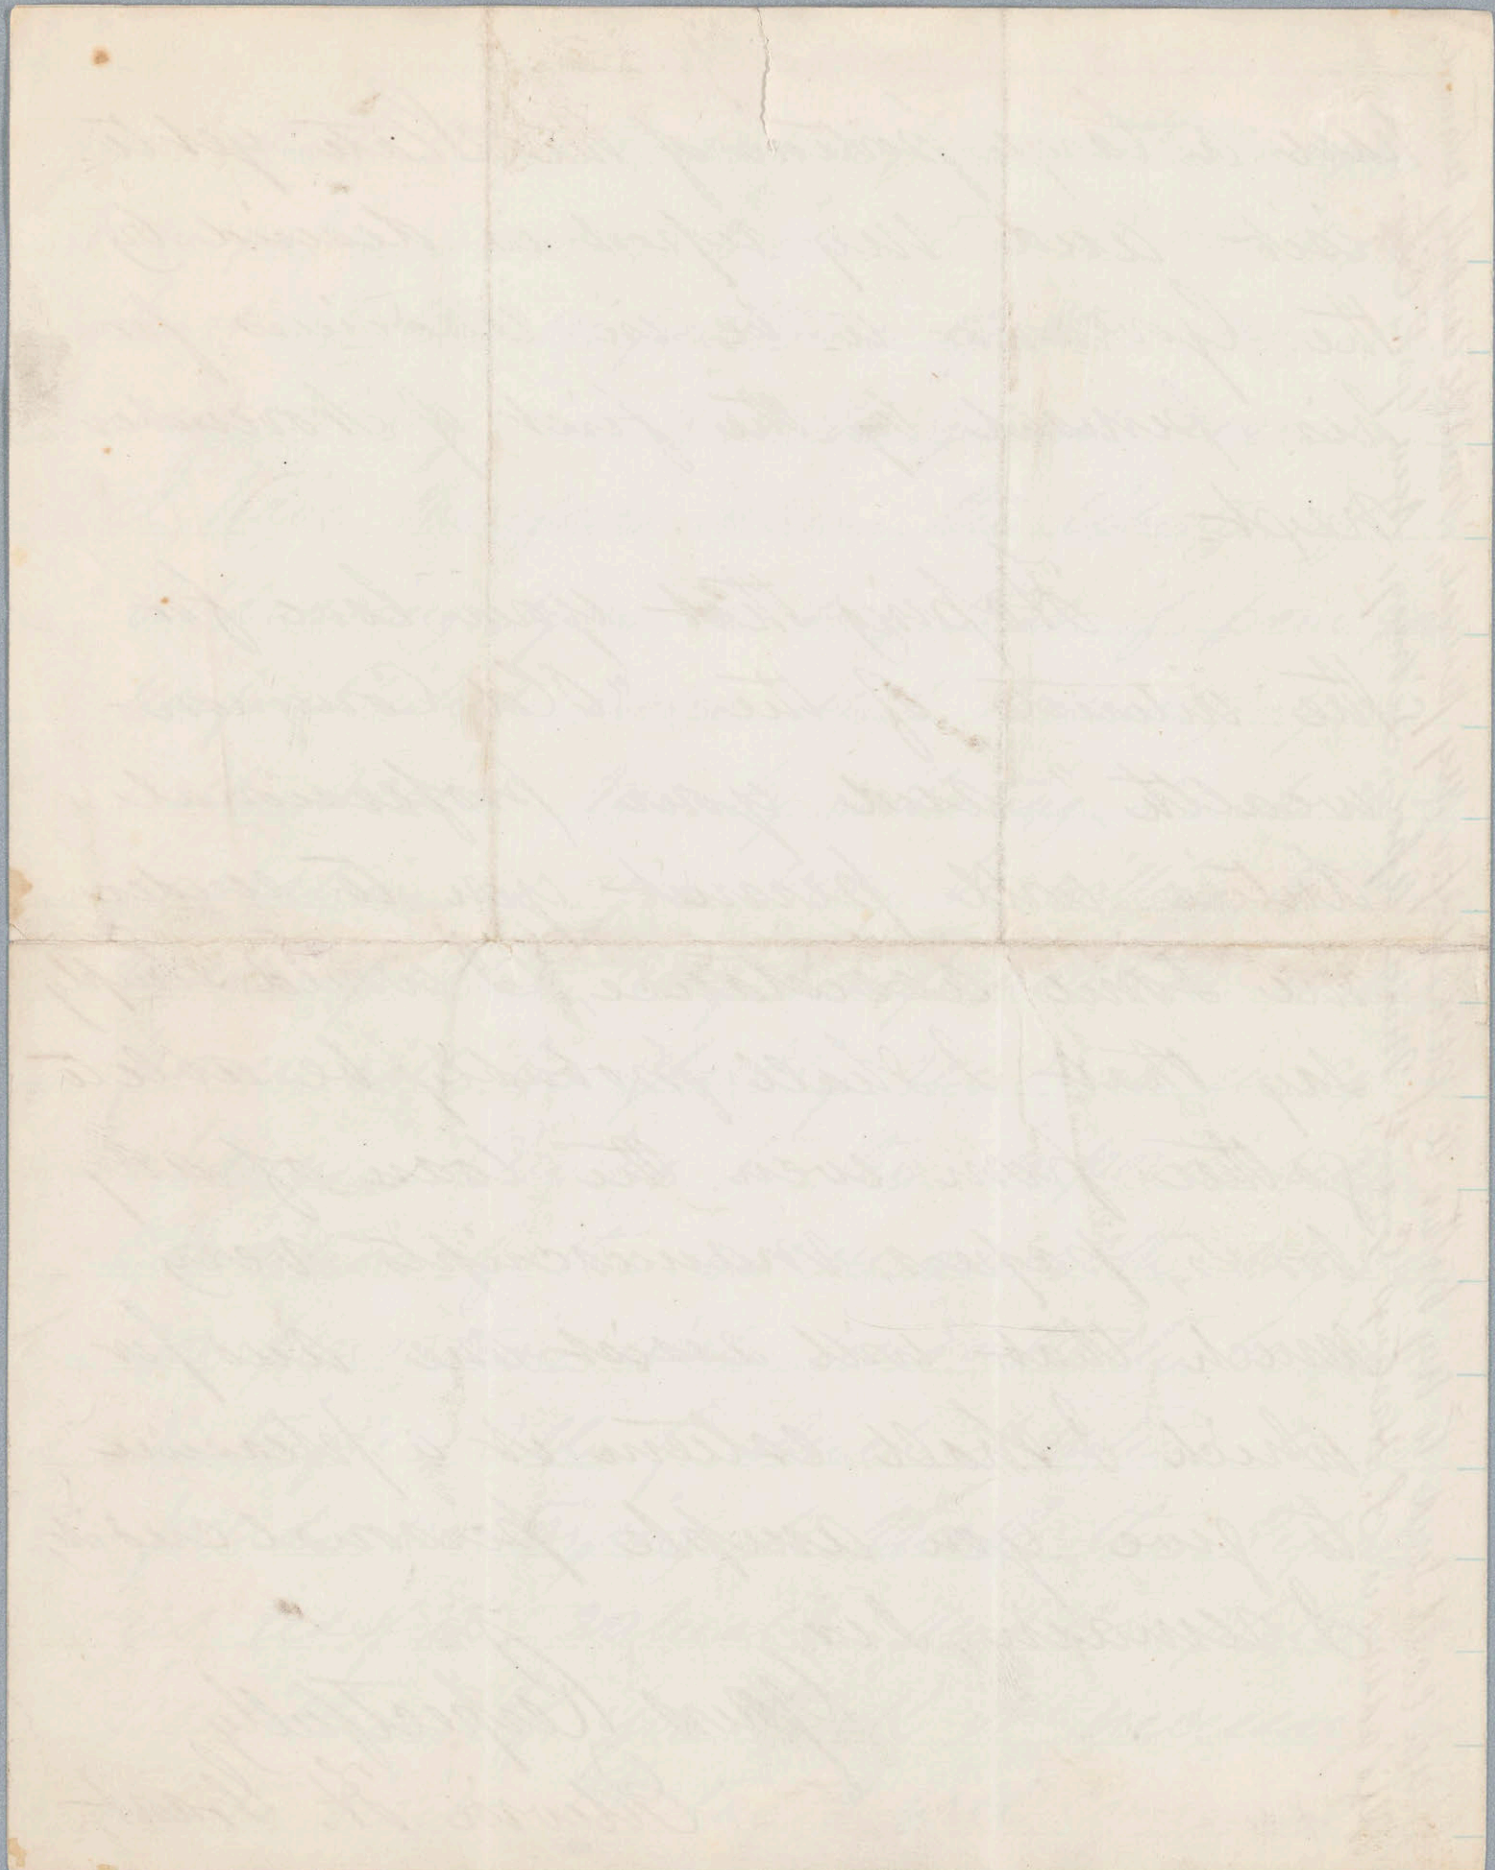

your valuable Reports and a few other meagre newspaper sources, I feel that I shall fall short of the importance of the subject and of my own and the general desire - I have therefore taken the liberty of addressing you to say that if, from your unpublished notes and memory you will assist me by collating such information as you may be willing to have made public, any compensation in my power will be gladly rendered in exchange. Owing to the impoverished condition of the Commonwealth, my own compensation will undoubtedly be but a trifle, all of which I intend to expend in trying to make the Report as useful, valuable and complete as possible - If you think it necessary for me to visit Boston I will come, but I

If you could send to my brother a package for my personal, it will be carefully returned. -
Apoc. Library, New York City.
Hastings Grant, Mev.
His address is St. Hastings

have a large portion of the State yet to visit and my report is desired by the Governor to be in readiness for his perusal by the first of November next.

Hoping that your love for the interests of the "Old Commonwealth" and your professional duties will permit you to render me some assistance, I would simply say that I shall probably be able to gather from even the loan of any books, papers, manuscripts very much that will assist me and for which I shall esteem it a pleasure to give you ample personal credit, I remain, Sir,

Yours Respectfully
Edwin H. Grant,

North Western University,
Evanston, Ill. Sept. 25, 1865.

Prof. W. B. Rogers, -

Dear Sir, -

Editorial notices
in some of the recent Boston papers
have drawn my attention to the
"Massachusetts Institute of Technology".
I am gratified to learn that such an
institution has been founded in
Boston, believing that it may be
made vastly useful to the country
in advancing the scientific and
Mechanic Arts.

The object of this note
is to inquire whether full pro-
vision has been made for the
instruction which it is proposed
shall be given in the Institute.
The reason for this inquiry is personal
to myself. For the past six years I have
been at the head of this institution
(over)

giving instruction in the department of
Mathematics and Astronomy, and also
in Civil Engineering and, at times, in some
other branches of Physics. The position
here, so far as regards salary and the
work required, is quite to my satisfaction,
but the health and circumstances of
my family necessitate a residence for
a time at least, in New England.

I expect to remove to Boston or vi-
cinity about Nov. 1st and desire to
find work to do which may be of ser-
vice to others and more or less re-
muneration to myself. Should there
be any opening for me in the "Institute"
in any department allied to those named
above, I shall be glad to confer with
you in relation thereto, and to furnish
you with any preferences desired.

Have the kindness to write me at
your convenience, and believe me,

Very Respectfully Yours

Henry S. Torges.

P.S. Will you send me a copy of your "Report"
concerning the Institute? H.S.T.

royce

...in the department of
...and testimony, and also
...and at times in some
...of Physics. The first
...as far as regards salary and the
...a point to my satisfaction
...the health and circumstances of
...a resident

...in the department
...to Boston
...and desire to
...to do which may be open
...and some of the
...to myself. Should there
...in the department

...to those rooms
...to cooperate
...and to furnish
...desired.

Very Respectfully Yours
Henry D. Royce
P.S. Will you send me a copy of your Report
concerning the Institute? H.D.R.

1865
Sep. 26.
New York

53

Map. Institute of Technology

School of Industrial Science

The department of professional instruction, to be opened on Oct 2nd, is intended -
 First, for such students, as by a full course of scientific studies and practical exercises, seek to qualify themselves for the professions of the Mechanical Engineer, the Civil Engineer, the Engineer of Mines, the Builder and Architect, the ^{Practical} Chemist, ^{& Metallurgist} and the Teacher of ^{Applied} Science; and Second, for those who aim to secure a training in some one or more of the special branches ^{included under either of these heads.} ~~of Applied Science~~.

The degrees corresponding to the leading divisions of the School will be as follows:

- 6¹² The degree ¹⁶ of Mechanical Engineer
- " " " Civil & Topographical Engineer
- " " " Geologist & Mining Engineer
- " " " ^{Practical Chemist and Metallurgist} Industrial Chemist ~~& Metallurgist~~
- " " " ^{Practical Metallurgist} Builder & Architect
- " " " Bachelor of Science - general

Besides the above degrees, embracing the ^{general} complete courses of study, the Certificates of Attainment will be given for proficiency in special branches, such as ~~the~~ Mathematics,

[Sept 26, 1865]

Chemical Analysis, Mining and Metallurgy,
Machine Drawing and Architectural Draw-
ing. Coast Navigation and Nautical Astron-
omy, &c

The Laboratories in the new building
will be in readiness soon after the
opening of the courses, and every facil-
ity will be afforded to students in Ana-
lytical Chemistry, Assaying, Metallurgy
and Practical Mineralogy. They will be
familiarized with the typical minerals,
rocks and fossils, by the use of a suite
of hand-specimens, and will ~~more-~~^{also}
~~over,~~ have the privilege of study-
ing the large and conveniently con-
tiguous collections of the Boston Soci-
ety of Natural History.

William B Rogers

~~Pres. Mass. Inst. Tech.~~

For details, application may be made at No 1
Mercantile Building, 16 Summer St between the
hours of 11 A.M and 1 P.M.
