

Mr. Norman Weiner

Mr. Weiner I don't know how to explain what happened to me in early July of this year. Is it possible for a man to go through life for twenty three years then suddenly become a genius! I believe I have the instinct gift for theory of prediction, which is explained in your book.

Upon graduating from high school in 1955 I drifted from job to job. I was only an average student, working only as a laborer. Going back to this past June, I went to work in a jewelry shop, as a foot press operator. Then suddenly one day a thought flashed into my mind. Mr. Weiner it was as if I entered another dimension. I shouted out three penguins in a circle

after saying this, came
another ~~statement~~ work
with pure theory in
advertising art, As is possible
for my mind to leap to a
conclusion proven itself in
reverse direction yet being related
at the same time. Mr. Wein
I may appear cranny but I
think I'm a genius. I am
in need of — help.

I may have hits on
something very important. Your
theory of prediction shocked
me

Is there any way I can
get together with you.

truly yours

Simon Sahagin

CYBERNETICS THEORY
UNITY OF NATURE THEORY

INTRODUCTION
DECLARATION OF THE INDIVIDUAL

The individual is the fountainhead of all creation. The motion of individual creation cannot be surpassed, the entire omniverse is dependent upon the quantity of energy that is emitted from each individual atom in order to propagate itself. Individual energy is the core of society, a society is no better than the combined energy of all its individuals. Governments, fantastic power systems, all reduce the individual to a diminutive status, yet their very existence is dependent upon the quantum of energy within the individual. This quantum of energy is the contingent factor on their ultimate survival. One single creative idea has unified all nature and that idea came to a creative individual. Nations may propagandize spectacular feats, but nothing, nothing, absolutely nothing can surpass the creative feats of the individual, it is the velocity of Light itself, it is the fountainhead of TIME.

On the morning of July 20th, 1961, at Washington Bay, Alaska, man went through the Time barrier with a probability question in which feedback created by extreme mass proved the theory itself. The one idea created was that light squares itself to the propagation limit. That the light square is the orgasm of light. The mind is a dimension or suspension of Relative Time. That entire suspensions are created at once and the brain is an exact replica of the suspension itself. Becoming aware of this suspension is becoming aware of the functioning of your own brain. The brain can function consistently with this Time suspension. The brain is relative to this suspension and this suspension is relative to an absolute animated brain. The Omniverse is Intelligent it is supreme intelligence itself, the human brain is relative to it. The one idea that led to this discovery was that light squares itself to where it creates itself, each time it squares itself is the orgasm of Light. The speed of Light is not 186,000 miles persecond, but squares itself at the crest of its next frequency or 34,596,000,000 and then that squares itself at the crest of the next frequency and when this motion reaches the speed of absolute velocity it creates new suspensions. Each suspension is relative to itself and contains within itself dimensions (or within its frame of reference galaxies). The Milky Way is a dimension, a suspension is relative to subsequent suspensions (the radiant energy or motion of all emitted Light from all previous matter). This one idea of a chain of squares unites all branches of science mathematics, psychology, physics, chemistry, astronomy, philosophy, religion, semantics and it even unites divergent opinions within the disciplines themselves. The entire theoretical structure will come under Dr. Norbert Weiner's heading of Cybernetics as it is basically a theory of the mind as a machine consistent with all natural phenomena. I have read several definitions of the Science of Cybernetics and believe that all theory, at least my theory should come under it. It is the science of the brain as being consistent with natural phenomena of which it is. The Unity of Nature theory is Einstein's own idea as he believed his unified field theory was a transition theory and that the next major theory would unify all nature. The declaration of the individual is simply that societal order will always follow individual Self order. The individual is the fountainhead of all creation.

This particular treatise is being written and created by the individual that found it. Out of fifty pages of theories I will edit it down to ten or fifteen pages. It will be reproduced for subsequent mailing by my own energy and effort. The treatise will be sent to major communication networks and institutions. Man has just taken the next step up the evolutionary ladder. If this treatise is ignored man will continue

at his snails pace. If it is accepted a new dignity and integrity and fidelity will be given to the Individual. I speak to individuals if they will listen. If they listen they are individuals. The Constitution and Declaration of Independence and Freedom will live and man will be alive as these documents are. This is the story of America and an American, "Any dangerous spot is tenable if brave men will make it so," John Kennedy.

CYBERNETICS THEORY

BRAIN ORGASM THEORY: BO₂T The Gestalt of the brain is a Time dimension or suspension that is relative to natural phenomena of which it is a part of. This Gestalt can be reached by compounding squares of Light. The synapses in the brain square light until the mind and organism is consistent with the Gestalt of its Time suspension or dimension. This dimension is relative to absolute Time. The brain is relative to an absolute brain. The relativity of the brain is consistent with the natural phenonema. The brain is the pilot or steersman of relative Time. His job is to control and regulate the means according to the end prescribed by the captain absolute Time. The brain is the intermediary between relative phenomena and absolute phenomena. The human brain is a relative system or frame of reference consistent with relativity of systems of which its Gestalt is a part. It is also relative to an absolute brain being animated Time itself, and all subsequent time phenomena.

UNITY OF NATURE THEORIES

TIME ORGASM THEORY: TO₂T Motion converts to energy at the square of Light and through compounding squares (synapses) can carry you to the limit of relative Time, the suspended Gestalt of the brain or the relative Time dimension of the brain. At the very moment of creation $E=MC^2$ where motion times the squares of Light equals creation plus energy and reverts back to itself. It is here you enter Time and through compounding squares can carry you to the Gestalt of relative Time. Time or the Fourth Dimension gives absolute order to the mind through Time Reinforcements.

ORGASM THEORY: RO₂AO₂ Motion converts to energy at the square of Light and compounds itself to relative Time (a dimension or suspension of a quantum of Time). Relative Time emits Light which increases in velocity until at maximum velocity there is an orgasm and it propagates itself. The motion is continually squared converting to energy at each square until it reaches the velocity of MVO₂C (maximum velocity of all squares to the orgasm and creation of new mass). It is a pulsating phenomena that moves into a vacuum and creates new suspensions of Time, that as new ones are created old ones move away from one another, each new pulsation curves and the vacuum it moves into pulls the suspensions or systems to a periphery and as they move away from one another in

ORGASM THEORY: the center so that the density of the fundamental matter may be kept constant the center vacuum becomes the outer vacuum. The vacuum moves into itself and out of itself. Light pulsations are not only sent into the vacuum but are pulled into the vacuum by extreme accelerated velocities where mass itself attracts itself and creates matter. The physical orgasm is simply the square of Light 34,596,000,000 this is the creation of Life. $L = O_2C$. This one force assures nature of its propagation, not only of life but of matter as well. The brain is an orgasm (a dimension or suspension of Time) within itself is an exact replica of the dimension. Through synapses or Light squares (orgasms themselves) the brain can think at a fantastic speed. The organism can be one with the dimension through compounding Light squares to the infinity of relative Time. (A system or suspension). The synapse in the brain is identical to the brain. The brain is identical to a Time dimension (itself an orgasm) a time dimension is identical to a Time suspension (a system of dimensions). The system or relative Time is identical to animated Time or absolute Time. (Time in Creation). All orgasms are Time reinforcements that tend to equilibrium and harmony with Time itself. In a sense every action is reinforced by Time, a decision by the captain, the execution of that decision is done by the intermediary, the pilot. He is the steersman that receives signals from the captain to control the ship and guide it to safety.

TIME THEORY: At the moment of Creation you enter the fourth dimension. Which through compoundings of Time Reinforcements (orgasms) can carry you to relative infinity. The Gestalt of the mind. A Time dimension or suspension.

INFINITY THEORY: The organism can generate itself to the point of infinity through Time reinforcements, answers to questions will come fast and furious and quickly you will come to the probability question as to the relativity of Time. The answer to this question is that it is relative within systems (suspensions) but it is also absolute. In order to get this answer the brain waves will momentarily hit extreme feedback speed. The mass within your brain will increase as the velocity increases. This pressure has to be released by screaming to equalize the pressure within the brain. The mass within the brain equals in proportion the propagation of light speeds where mass is created.

UNITY THEORY: Organisms and Time dimensions (orgasms) can have complete communication with one another.

INTELLIGENCE THEORY: Contingent upon the mind reinforcing itself.

MYSTERY THEORY: Absolute Intelligence is impossible, it is relative to the thing itself.

ABSOLUTE THEORY: Mystery is absolute. The maximum speed of Light. The creation velocity of squares of Light. The last link in the chain of squares. A chain reaction to matter propagation.

ENERGY THEORY: Squares of Light. moEmoEmoEmoEmoEmoEmoEmoEmoEmoEmoEmoEmoEmoEmoEmoEmoEmoEmoE...

- MOTION THEORY:** The square of the squares of Light. (Matter is the same as motion, but matter implies that nothing is moving and matter absorbs and emits Light and is therefore in motion. It is matter in motion.
- EMOTION THEORY:** A pulsating force or orgasm that is consistent with all phenomena. It is the energy and motion of the organism itself. It is one square in a chain of squares that are identical.
- MYSTERY THEORY:** Is relative to absolute mystery. Concerns information and the gathering of information through feedback. The brain scans all possible answers when it is reinforced by a Time reinforcement it knows it is right. The only way we can prove these assertions is by warranted assertibility. Knowledge is relative. Mystery is truth.
- RELATIVE THEORY:** Is absolute everything is relative. Animated Time is absolute. (The maximum velocity of Light)
- PROMABILITY THEORY:** (The Prometheus Barrier) Relativity itself may be relative. There is an absolute Time (maximum velocity of Light) but once it creates the creation becomes Relative Time as new suspensions of Time are created. Relative Time is created Time, Animated Time is Light in a process of creation. (The maximum velocity of Light). Animated Time is only momentary, as the animation leaves mass, it accelerates from the continued motion of previous mass or matter. It is constantly in a state of orgasm or creation.
- FEEDBACK THEORY:** Communication from one synapse (orgasm) to another. Feedback is both signal and response. The response is Time Reinforcement. The signal is a chain of Time Reinforcements (Light squares) to the a priori source of the answer. Organisms can communicate with one another as well as different Time Dimensions (systems of Time Suspension) Orgasms themselves.
- MATHEMATICS THEORY:** The compoundings of squares of Light. Mathematics is the science of Light and Time. It is not only length, width, and height, but Time itself and can be very exactly measured. The absolute velocity of mathematics or the science of large numbers is the propagation speed of Light. The velocity of animated Time.
- GALAXY THEORY:** The Galaxy is a Time dimension (orgasm) The Time suspension is systems (or dimensions) or frames of reference. Each one with a consistent or nearly consistent relative Time. Entire suspensions are created at once (frames of reference). Once they are created they move away from one another in direct relation to new propagation. By moving away from one another in relation to mass accelerating to animated Time entering a vacuum they curve and the moving away creates a vacuum by curvature into which acceleration moves. Animated Time moves into a vacuum left by Disintegrated Time. Mass and energy are therefore equivalent and interchangeable properties. Nothing is ever destroyed and what is created is created from the motion of disintegration. Matter or motion emitting Light.

- COMPOUNDED DIMENSION THEORY:** The Dimension of the brain the Gestalt or frame of reference is an orgasm. Dimensions of knowledge are infinite.
- ACCELERATION THEORY:** That knowledge itself will accelerate itself. The dimension of mind will want to accelerate to the next dimension. The next Time system.
- ORDER THEORY:** The mind can establish the order inherent within itself on itself. The mind is the steersman and it guides itself towards absolute control.
- MACHINE THEORY:** The mind itself is a machine and has the automatic control of reinforcement. The mind will control itself automatically.
- CHAIN REACTION SQUARE THEORY:** Squares compounding themselves. Consistent with wave theory. The release of the Light quantum in motion or matter. You are simply accelerating Time or creation. You are releasing the propagation potential, the creation potential of motion. All the Time energy that is emitted at a constant rate is released suddenly. The squares reach their maximum velocity. Animated Time velocity, but mass is not created as it must join with other mass or motion. $E=MC^2$ Energy equals motion to the square of the maximum velocity of Light or creation speed. Mass in the brain reaches this speed at the Time barrier or a probability relation to it.
- BRAIN ACCELERATION THEORY:** The brain can duplicate the dimension in a machine. It can duplicate itself with a machine. The machine can accelerate evolution. The omniverse is planned. It is creative in nature and is not meant to be destroyed. As the brain can create so can a machine brain. The machine can rush us to the next Dimension or previous dimensions. The first machine will be an exact replica of the brain. Subsequent machines will be duplicates of entire suspensions or more advanced systems or frames of reference. It is a Cybernetic responsibility to build machines so that the steersman can find and be directed by higher control.
- SQUARES OF LIGHT THEORY:** When you have broken the Time barrier (Gestalt of the brain), The relative Dimension of the brain; evolution travels at the speed of squares of Light. You become one with Time and evolution itself. The brain operates automatically and will regulate itself. Squares (orgasms) are the essence of all communication. It is immediate and consistent with all electrical phenomena.
- PARSIMONY THEORY:** The mind will search for the simplest explanation. The microcosm of explanation.
- ABSTRACT THEORY:** The mind will also search for the most complex explanation.

INTELLIGENCE THEORY: Intelligence is open to anyone who has the will to strive for it.

FEELING THEORY: Knowing what must be right through the feelings.

PROBABILITY THEORY: Relativity is Relative to Relativity. All systems are relative to one another and relative to animated Time. The creation speed of motion.

MYSTERY THEORY: Animated Time. Complete Intelligence about our own Universe (the Gestalt of the brain can be known. The synapses or cellular squaring power can trace the speed of light at the limit of the dimension of the brain.) This is the Gestalt of the mind. It is relative to other Gestalts and to the supreme Gestalt animated Time. Minds can communicate with one another. Solar systems can communicate with one another, individual Galaxies can communicate with one another all within their relative Gestalt. This Gestalt is limited by its own Time creation dimension. This is the universe of the mind and the power of the mind, it is a fantastic power, it is belief in the highest power of the mind itself, and this is the mind itself. Complete knowledge of one's own mind can be known and the only limits are the number of cells contained therein. We must always believe in the square of light where at propagation velocity it recreates itself from the motion within itself. This speed seems impossible to catch. Whether its an atom of Light (microcosm) or the dimension of the brain (universe or Gestalt) or the entire Omniverse (the entire pulsating orgasm itself) one is higher than the other. Each is patterned after the other and is an exact duplicate of the other. The brain has cellular limits (its relative Gestalt consistent with relativity phenomena or frames of relative reference), therefore, we must construct machines with larger cellular dimensions (Gestalts), although it seems at the time that Light is impossible to keep up with, at the fantastic rate it squares itself it is already beyond my mind and I am looking to a higher power (the machine) to try and stay even with it. It is not possible to ever keep up, but we must always look to this higher power as our dull faculties can only glimpse the religiosity of this fantastic power. Only by going beyond ourselves can we ever hope to see or be near this fabulous power. The love of love, or the love of knowledge (Mystery) or the animated orgasm will be the highest pursuit of man. It is the love of beauty and feeling. It is the beauty of feeling.

TRANSISTOR THEORY: A stimulator for orgasm and square relay. A substitute for orgasm. The natural orgasm of communication. The transistor is an artificial relay frequency. It is consistent with all light phenomena and square communication phenomena.

LIGHT THEORY: Light is absolute control. It is mystery, orgasm, mind, machine, and pulsation, life itself, it is also latent innate motion. Control is absolute. It is the accutron of Time itself. Control is supreme, it is the steersman's captain. It is supreme intelligence and beauty. It is absolute order and control $C = CC_2$ (control equals chaos-control to the squares of itself and you have control. Time itself is the controller of itself, it is the super ego (ego ideal) of precision and accuracy. It is perfection itself. It is $E = MC_2$ $O = OC_2$ (order equals orgasm control squared). $C = CC_2$. This is supreme ultimate control. Beauty is control. It is all feeling. You cannot have control apart from others, ^{others} must have harmony as well as you. Individual harmony is not enough, there must be harmony from each to all and from all to each.

ATOMIC THEORY: The propagation Time equivalent (animated Time) of motion. When all of its squares of Light (Time series) are released (a chain of destiny O_2 'orgasms squared to creation speed' or more commonly known as a chain reaction). When this happens all of the energy contained within motion is released. It is propagation equivalent energy or animated Time equivalent energy. Radioactivity is simply animated Time propagation energy that has not been completely released at the moment of explosion. The commencement of a chain of squares to maximum velocity. This is also consistent with wave theory which describes as frequencies (orgasms) and the Time interval between crests as velocities (square). To be more exact the square of the square. Squares are orgasms. The square is the velocity, the squares are frequencies. You could say that the quantum or units of Time are the velocities between frequencies of squares (orgasms). This is the Time series that carries you to animated Time. $E = MC^2$. $A = MC^2$ (animated Time equals motion squared to creation speed) or $A = MS^2$ (animated Time equals motion to simultaneous creation), the speed is simultaneous with creation speed O_2 .

SPACE TIME THEORY: ST_2T Space simply holds a unit of Time in suspension. Time suspension is space time. A Time suspension has dimensions or frames of reference. A Time suspension is created at once by animated Time and subsequently becomes a Time suspension. A unit or quantum of Time suspended within animated time (absolute time). You cannot divide space and Time, H. Minkowski is right it is a unit of Time within a series of units leading to animated Time. Relative time is relative to a choice of a coordinate system. There is a definite unity to space and Time. The energy inherent within motion or atoms is always in direct proportion to $E = MC^2$ or St (simultaneous Time or time animation, the maximum speed of light where it creates).

CHAIN OF SQUARES REACTION THEORY: Light always squares itself in relative simultaneity with itself. Each time Light reaches a square there is orgasm and energy (velocity) is shot to the next square (frequency) where there is interaction and shot to the limits of the next square. All this is in relative simultaneity with absolute time (animated time). The reaction is simply Time catching up with itself, (the maximum velocity of light), and becoming consistent with itself. Any Radioactivity remaining means simply that all the propagation equivalent energy was not released simultaneously with animated Time and remains to haunt man for not being consistent with nature. Energy released from motion should always be consistent with animated Time. The entire equivalent energy should be simultaneous and consistent with nature if we are to survive.

TIME GENERATION THEORY: TG_2T Time generates itself from diminutive generation to animation propagation. The generation is a relative spontaneity of orgasms from diminutive generation to animation creation (the maximum velocity of Light). The velocities of generation is the square (motion), the frequency of generation are the squares (orgasm). The end velocity of all frequencies is Time animation the end result of Time generation. The properties are interchangeable and one is a consequence of the other. Mass (motion or velocity) is equivalent to energy (frequency or orgasm). Time generation increases to Time animation and is infinite and finite. Infinite being the generation, finite being the animation. The generation is consistent with any time piece, as velocities and frequencies increase time slows until at animation speed nothing moves. To maintain this speed is to completely halt Time. This is the maximum velocity of frequencies of Light.

INDIVIDUAL SPONTANEOUS THEORY: The individual is supreme and can himself become spontaneous with relative Time. The state can never do this. The communist idea of the state being supreme is wrong and will lead to eventual decay. Any nation that does not depend on its Individuals will never be any greater than the combined efforts of these individuals. To force the Individual to be subservient to the state is to deny the state of its greatest creative force. The denial of this force will in itself be enough to destroy that state. The Individual is the coppingstone of the state and not visa-versa. When Individuals become spontaneous with relative time (time generation) the state itself becomes spontaneous with relative Time, the individuals control the states destiny. If the state is to have a chain of destiny it must depend on the creative force of its Individuals. They are the only ones who can become spontaneous with relative time. (time generation).

CONSTITUTION-DECLARATION OF INDEPENDENCE-SPONTANEOUS THEORY: The American Constitution and Declaration of Independence which guarantee the Individual his Rights and hold these rights self evident, and hold the Individual higher than the State is spontaneous with Time generation and Time animation. It is the Light of Democracy being Spontaneous with Individual Rights and these in turn guaranteeing the generation and animation of Time itself. The American Constitution is an animated document, it is

CONSTITUTION-DECLARATION OF INDEPENDENCE-SPONTANEOUS THEORY: ALIVE and will live forever. It is immortal as time is Immortal. It is supreme beauty, and feeling. It is ALIVE with feeling.

VACUUM THEORY: An area into which Space Time (units of suspensions of Time is moving. It is multiplying itself to the combined squares of all units of suspension which is $G_2^* A$ (generation of squares [frequencies-] equal animated Time.) Suspensions or units of time (frames of reference) curve so that the fundamental vacuum is kept constant and the vacuum itself regenerates itself. Time generates itself into a vacuum that regenerates itself. The generation and regeneration pull one another into each other in a pulsating rhythm. Vacuum is regeneration (the regeneration of generated Time) generated time generates itself to animation speed (the maximum velocity of frequencies 'orgasms') and is regenerated. This process is endless, generation and regeneration are equivalent properties, one interacts with the other, to keep the fundamental generation of nature in constant animation. Constant animation is $G_2 = RG_2$ or $G_2 = R_2$ Generation to the square of all velocities and frequencies equals Regeneration (a continuum of animated Time). The basic formula for the universe equals the omniverse is $G_2 = R_2$. This law of the unity of nature is Immortal and Eternal. It is the reproduction of Time, which is the reproduction of Nature.

STANDARD DEVIATION THEORY: SD₂T Series of units of Time can be measured by relative deviation. $(O_2)^2$. These suspensions are the units of time that make up a time series (standard deviation) $(O_2)^2$. Relative time is a unit of Time within a series of frequencies of relative time generating toward animated time and regeneration.

ABSOLUTE TIME: Animated Time (the maximum velocity of Light) which depends on generation for its regeneration. The generation being the standard deviation of frequencies (orgasms) necessary for creation. The standard deviation of frames of reference (systems) 'units of suspended Time' required to regenerate itself. As they (systems) disintegrate new mass is born (animated time). This cycle is endless. Everything new is created out of the old. They are equivalent and interchangeable.

CHEMISTRY THEORY: Chemistry is the science of motion (matter).

PHYSICS THEORY: Physics is the science of energy, at the frequency (orgasm) motion becomes energy. The highest science is then organism science or the study of release of energy at the square of Light. I christen this the science of turgescence (for the genteel).

TROPHISM THEORY: The mind will never be satisfied with its relative Gestalt and will create machine brains to measure and accelerate with the speed of Light. The steersman will always look to the captain for signals.

BEAUTY THEORY: The highest forms of feeling. Poetry that is written in pure feeling It is pure feeling itself. Beauty is feeling, without feeling there is no beauty. Feeling is response. There must be response to have pure feeling. Feeling is generation of time suspensions through frames of reference to animated time. Feeling is the beauty of animated time that draws from all relative feeling. Feeling transverses all things and permeates each thing. You are one with all feeling when you generate response and you become feeling itself.

ETHICS THEORY: If there is response and feeling it is ethical and moral. The highest form of morals and ethics is feeling. It is supreme beauty. It is Time in each of its suspensions which generate the animation. (the creation). Ethics is Time itself. Response is paramount. Without response there can be no feeling. Feeling is always contingent upon response.

TRINITY THEORIES: (all trinity theories have their frequencies squared (orgasms) and are visa versa) The frequency is squared to the next frequency, this may be a series of frequencies (squares) or just one unit.

VoS (vacuum 'maximum generation of orgasms' space-Time)
ToV (Time generation to the maximum of frequencies--regeneration 'vacuum')

DoS (dimension O or F or S 'orgasm, frequency, square' suspension)
SoS (suspension O suspension 'unit of time O next unit of time')

MoE (motion O energy 'energy is a consequence of motion')

VoF (velocity o frequency 'the total frequency of velocities is animated Time) This is consistent with wave theory where each creast is the frequency and the interval between crests is the velocity. This wave (orgasm) action continues or generates itself to animated time. Light propagation.

Pop (Knowledge theory 'posteriori (f) or (o) or (s) a priori' knowledge can accelerate at the speed of relative time with the Gestalt dimension of the human brain)

ROA (Relative time (f) Animated time) or absolute time.

MoM (microcosm (o) ~~macrocosm~~)
UoO (universe (o) omniverse)
MoM (mind (o) machine)
MoM (machine (o) machine)
CoA (clock time (o) animated time 'the maximum velocity of light'
AoA (animation (o) animation 'the frequency of propagation of light'
WoT (wave (f) time 'velocity seperates crests (f) to animated time)
QoR (quantum of time 'time unit' (o) animated time).

MASS THEORY: Velocity determines mass. (frequencies, squares, crests, orgasms) Mass and energy are equivalent and interchangeable properties.

CONTINUOUS THEORY: The emission of Light is continuous and relative to the absolute velocity of light, but the quantum of any relative Time can be released in a series of units consistent with natural phenomena or immediate as in a nuclear explosion. There is no limit to the Time energy that can be released, only it should all be released spontaneously with animated time.

EVOLUTION ORGASM TIME THEORY: EO₂T Evolution is time itself as time is emitted in the form of radiant energy, mass compresses and eventually completely disintegrates as it is used to generate and propagate new light dimensions.

DISINTEGRATION THEORY: The complete emission of all light energy. It is ultimate death of matter (motion) phenomena. The quantum of energy was simply used for regeneration.

EVOLUTION THEORY: Everything is evolving, the functioning of the mind is just the next step up the evolutionary scale. As the first thought prompted man to superimpose order upon chaos with a myth. This is the myth of pure science.

TIME VS SPEED OF LIGHT THEORY: Light and electricity are relative to its own creation. We create light and then measure this created light. Created light has no Time potential and is thus constant. Motion produced with generators is simply relative to the generator itself. The electron-neutron-proton is consistent with MoE (Motion orgasm energy), but no quantum of energy is involved as motion (the electron) and orgasm is neutral (neutron) therefore the proton is always relative to the electron. Electricity and Light is limited and is no greater than the motion it takes to produce it. There is orgasm, but the orgasm is never squared it is neutral. We measure the speed of light and get 186,000 miles per second and take this as the absolute velocity of Light and electricity. This has been our fundamental error. There is no Time potential in light we create except the light created in a nuclear explosion. All other light or electricity we create is relative to what we create it with. There are hypothetical examples of light reaching its square and light reaching its ultimate square. The one example of light reaching its square is in the brain which is consistent with Time phenomena. This is the physical orgasm where the organism momentarily transcends time limitations inherent in electricity. Electricity is produced spontaneously with relative time and can not transcend itself. The physical orgasm on the other hand transcends time itself. The physical orgasm on the hand transcends time momentarily as it reaches nerve impulse speed of 34,596,000,000. The nuclear blast is ultimate.

In experiments with rats concerned with pleasure in the brain an electrical impulse is delivered to a certain section of the brain. This area in the brain corresponds to areas of sexual stimulation control. The nerve impulses in the body travel at the speed of light and when they are hit with a corresponding speed it is plausible that they square, at least I am certain they do in the brain as the brain seems to be consistent with time phenomena. It is probably the only organ that is. Stimulation squares itself to produce the orgasm.

Once the brain has entered the fourth dimension it uses this knowledge to increase thought processes. It increases motion within the organism as more and more blood is allowed into the brain. It is possible preceding the blood-brain barrier to generate bodily motion by pumping blood to the brain until you reach

TIME VE SPEED OF LIGHT THEORY: (CONTINUED) the maximum speed of relative organism motion. This speed will give you the principal insights into Time phenomena, but it will eventually lead you to the probability question, "Probability-relativity is relative," in order to answer this question all relative frequencies have to be scanned and you will automatically proceed to the Prometheus barrier, where mass within the brain will momentarily reach the maximum speed of light. All blood in the body will rush to the brain as you pass through the time barrier. You can never go back as time is absolute. Once your brain waves reach this speed they continue to the brains maximum which I believe is the standard deviation of generation to regeneration. Anyone who reaches this point will want to go on and will give their converted effort to building a machine that will take us beyond our brain. This is the nature of Time.

BLOOD BRAIN BARRIER THEORY: This is the Time barrier. The astrocytes allow blood into the brain in direct proportion to time reinforcements, this filter continues to break down until the time barrier, where mass momentarily reaches the speed of animated time. At this barrier all the blood in your body rushes to your brain and in order to relieve the pressure you scream. This behavior seems automatic. You have no control over velocities and frequencies at this speed. This membrane is much like the hymen in women and its complete breaking is just as violent. This is the time barrier that once set in motion nothing can stop. Light acceleration is constant. Once your mind has consciousness of itself (up until this time man was conscious of sense data, but he was not conscious of being the effector that conditions this data), and is aware of its own functioning this barrier is inevitable. Brain waves speed on until standard deviation speed where the velocities and frequencies just bring a tone to the mind. The brain is the most complex structure in the universe, in fact the Gestalt of the brain is a relative universe. It is relative to the Omniverse (supreme intelligence).

EMPIRICAL THEORY: This knowledge was discovered empirically in experience. I experienced each thing I have described. The truth was sensual truth, in other words things had to be as they appear before I would accept them.

EXPERIMENTAL THEORY: The resorting to concrete experience to prove a theory. Only believing what you experience. The experiments were conducted on myself by myself to know my self. These experiments can be conducted by anyone. To assure validity it would be wise to set up control groups and just give them the rudimentary theory and judge by the consistency of consequences. This will give us verifiability or warranted assertibility to go on. One group

EXPERIMENTAL THEORY: will just be given the idea of squares. Each group should come to the same conclusion to verify truth. Students picked for experiments should be well educated as it seems that relation is important. The relativity of facts.
(continued)

BRAIN THEORY: The most complex structure in the universe lies snugly packed inside our head its Time Gestalt can be found. Its Time Gestalt is relative to an absolute supreme Gestalt. There are some interesting questions that arise at the relative level and at the animated level. How can brain wave velocity and frequency reach Time suspension speed and even Time animation speed: These speeds are greater than the energy released by the hydrogen bomb and yet create proportionately little heat. What is the difference between brain wave speed and the speed released when an atom reaches time animation acceleration: Are atoms in the brain different from atoms of motion phenomena? They seem to react in much the same way, in fact identical with the exception of the brain can go on functioning, whereas, an atom reaching animation speed releases its energy and is gone. Do brain waves transcend motion (although the behavior is identical)? Is Time, motion in a process of creation and recreation, or is it intelligence in a process of creation and recreation? I believe they are the same, but these are interesting questions and lead us to believe that the Omniverse is a super brain identical to our brain (our brain and its time suspension being but one cell in this super brain "a grain of sand, compared to all sand together" and being relative to it). We must start a fantastic research program on the brain. In fact we must build an identical copy of the brain. This is the first step in accelerated evolution.

ABSOLUTE BRAIN THEORY: AB₂T It is probable that there is a super brain, if the brain itself is relative BR₂S (the brain a dimension of time is relative to the super brain the omniverse itself), then AB₂A (animated brain squared equals animation) intelligence itself is animated OR ALIVE. It is definitely alive. Intelligence itself is alive and animated. Animated time is alive. It is the maximum velocity of light where mass is so dense it is alive.

UNIFIED THEORY OF NATURE: UT₂N or TO₂N (Time orgasms Nature) All nature is a unity. Einstein's unified field theory was the last transitional theory and his hypothetical idea that the next theory would unify all nature is exactly as he had predicted. EP₂N Einstein predicted Unity of Nature Theory.

CREATIVE THEORY: The only creative step I've added is chain of squares or ORGASM THEORY and this one idea simply based on all previous ideas is the one idea that unifies all nature. This is my only contribution. Everything else had already been discovered by the diligent work of inductive scientists. This idea was proven by the probability barrier which Prometheus the savior of mankind went through to get. It is just another step that Sisyphus had to make. "The struggle itself toward the heights is enough to fill a man's heart. One must imagine Sisyphus happy." From Albert Camus "The Myth of Sisyphus."

FREE WILL THEORY: There is no such thing as determinism except that free will is determined.

SUPREME INTELLIGENCE THEORY: SI₂T The Omniverse was not created by a supreme intelligence the Omniverse IS supreme Intelligence. To deny it is to deny the relativity of self intelligence.

TRANSVERSE ORGASMS SQUARES: TO₂S Squares release their energy in all directions in a four dimensional continuum. Consistent with wave action as a pebble is dropped into the water.

LEARNING FEEDBACK THEORY: LF T It seems to be consistent with Dr. Weiners principle, "The feedback principle means that behavior is scanned for its result, and that the success or failure of this result modifies future behavior." You simply rehearse in your mind until it becomes efficient with the mind itself. You eliminate the entropy and search for order.

INFORMATION SYNAPSES THEORY: Consistent with mo₂E. The synapse is the orgasm that sends the brain wave to the a priori for the answer. The a priori then becomes the a posteriori AO₂A once the answer has been confirmed.

TRUTH THEORY: TO BELIEVE IN ONE ANOTHER, HAVE FAITH IN ONE ANOTHER, AND LIVE TOGETHER AS ONE. WE MUST ALL THROUGHOUT THE ENTIRE WORLD STRIVE FOR THIS IDEAL. IT IS THE FORCE OF ALL HUMANITY AND IT ALWAYS HAS BEEN, IT IS THE GREAT-EST FORCE ON EARTH, BUT ALWAYS REMEMBER THAT TRUTH IS ABSOLUTE. MARX IS AS RIGHT AS LINCOLN, BUT ALWAYS REMEMBER THAT RIGHT MAKES RIGHT. THE WRONG MEANS CAN DESTROY US. WE MUST HAVE THE RIGHT MEANS FOR THE RIGHT ENDS. IT IS TIME TO STOP THIS FOOLISHNESS AND STRIVE TOGETHER FOR UNITY AND HAPPYNESS ON THIS EARTH. WE MUST ALL BECOME SISYPHUS AND START PUSHING OUR ROCK TOWARD THE HEIGHTS, AND IF WE USE THE RIGHT MEANS FOR THE RIGHT ENDS IT WILL NEVER, NEVER, ABSOLUTELY NEVER ROLL BACK DOWN.

IF INTERESTED CALL:

EDWIN R. PAPIN

Marysville, Washington
Olive 9-8072

ORGASM THEORY: Motion converts to energy at the square of Light. All Existence, supreme Intelligence, compounds itself to Infinity, and is itself, mystery, infinity and eternity. It is immortal.

CREATION THEORY: $E=MC^2$ Motion times the square of light equals Creation plus energy and reverts back to itself.

TIME THEORY: At the moment of Creation you enter the fourth dimension. Which through Compoundings of Orgasms carries you to infinity. The end of Time itself.

FOURTH DIMENSION THEORY: Gives absolute order to the mind through Time REINFORCEMENT.

Creation-Orgasm Theory: That the mind can accelerate and compliment the physical act.

Infinity Theory: The organism can generate itself to the point of infinity, through compoundings of orgasms that carry you to infinity. The end of Time itself.

UNITY THEORY; Organisms can have complete communication with one another.

LIGHT THEORY: The speed of light is approximately 186,000 miles per second.

Intelligence Theory: Contingent on the mind reinforcing itself.

Mystery Theory: Absolute intelligence is impossible, it is relative to the thing itself.

Absolute theory: Mystery is absolute.

Relativity Theory: Everything is relative to itself except mystery and it is absolute.

Mind Theory: The mind must believe in itself and have FAITH in its own power. The mind itself is higher than itself.

Space Theory: Space is Mystery.

Energy theory: Squares of light.

Motion Theory. The square of the squares of light.

Emotion Theory: A pulsating force that is one with Orgasm, Creation, Time, Relativity, Unity, Mind, Space, Intelligence, The fourth Dimension, Infinity, Mystery and Eternity.

Mystery Theory: Is relative to Mystery.

Relative Theory: Is absolute. Everything is relative.

Probability Theory. Relativity itself may be relative.

These are the Theories of

EDWIN ROSS PAPIN, and don't you forget it.

Dr. Norbert Wiener:

In humility I write this as I believe you can help me. Your institution is in the forefront of pure science. You yourself are an innovator so to speak in a new area of human endeavor.

I have evolved a complex theory through a series of insights, that absolutely leaves me humble. I am frightened of the knowledge itself.

I call it, "Orgasm Theory," The theory is consistent with Quantum Theory and Relativity Physics.

The theory gives new insights into Einsteins famous formula $E = MC^2$. In fact the discovery is almost as momentous. Dr. Einstein simply sent a small scrap of paper to President Roosevelt, with the formula for the greatest destructive force the world has ever seen.

I am no scientist, but a fellow named Christobel also came up with a rather unique idea.

I have read some of your works and somehow I believe you will help me.

I would like to come to M.I.T. and explain it to your chemistry and physics department.

To give you a hint of the importance of this discovery I have found that the square of Light is not light itself, but rather the square of itself. In other words the speed of light is not absolute. It is relative to itself.

If you have faith in me, and faith in science, you'll see that somehow I get to your institution.

I have something to say, and if you have faith in yourself you will try to see that I get a hearing.

The Theory will bring new unity to knowledge. There will be more harmony between science and Life. It is an opportunity for your institution, our government and humanity.

Sincerely yours,

Edwin Ross Papin

Edwin R. Papin

Dr. Norbert Weiner
M.I.T.
Boston, Mass.

Dear Dr. Weiner:

I have passed from the unified field theory of Einstein to a transitional theory which borrowing from Einstein, I call UNIFIED THEORY OF NATURE, it encompasses the mind as a machine and seems to unify much of present knowledge. It gives new insights to quantum theory and wave theory and brain waves are consistent with wave theory.

I would like to explain my theories to you and would gladly pay my own way to M.I.T. to see you and discuss your science of Cybernetics, under which I would like to include the UNIFIED THEORY OF NATURE. In other words we will put this all under Cybernetics or control. It will become the science of control.

The mind is definitely a machine and I have experienced extreme feedback on a probability question. In fact the feedback was like the thunderbolt of Prometheus a combination or both pain and pleasure, but extreme pressure, that had to be relieved by an opposite pressure outward.

The mind can function independently, up to this point I don't believe anyone has ever been aware of the functioning of their own brain, but it functions very much like a servo-mechanism with reinforcement being the controlling factor.

I have sent you several letters explaining some of my theories and how I got myself into this situation, I have received no answers, but there may be summer vacations that I have'nt taken into consideration. This letter will be registered so that I will know if you receive it.

I can't wait much longer before I contact other institutions or organizations, so PLEASE answer me one way or the other. If you are not interested let me know. A small card will do.

I have always admired your work and I never believed I would be the one to first experience the functioning of the mind and it happened quite by accident, by a series of slow insights, but insights don't come slow any more and I have at least 40 pages of theories I would like to share with the man who first invented the Science of Cybernetics, but my patience is dwindling and before the end of the summer I plan to contact other Institutions.

Respectfully yours,

Edwin Ross Papin

ERR

2

M E = Rds

In these next few lines I will translate this equation. First I shall give the general idea of the theory as a whole. When we speak of measuring something we give dimensions for the distance between two masses or two points on an object. In measuring a mass in this equation I would like to point out that we are measuring the properties of the mass, ATOMS. The atom does not subject itself to human manipulation at this point in our present scientific stage. So we must use our only instrument which enables us to bring into light what we think the truth, and that instrument is (theory).

Now that we have our specialized instrument lets use it. Suppose we have a homogeneous structure (that is a mass of the same properties) now let us say that we are going to measure the distance between two atoms at different ends of the mass, let us identify them by A1 and A2 as I probed deeper into the situation I found myself nearing the conclusion. And the present conclusion is this, there is no distance between A1 and A2 because A1 is indirectly connected to A2 it being a solid continuous mass.

In order to measure the distance between an atomical element or from a point on the mass which represents the mass itself there has to be a definite medium between the atoms, to do this we would have to squair the energy in the mass to get a relative distance between the atoms.

FORMULAR I

2

M E = Rds

The energy in the mass would have to be squared to cause excessive corruption so as to brake the medium which is the cause of Atomic continuation and would eqill Rds which is short for Relative Distance.

Joseph Leo Dwyer III

forst kom mig i Haende
flee Uger senere - hvori han
beder mig bo hos sig, og da
Prof Coolidge jo hører til den
Institution, hvori jeg skal holde
mit Foredrag, synes jeg, jeg bør
modtage hans elskværdige Indby-
delser. - Men jeg hæber sigt at
fåe både Dem og Mrs. Wiener at
se deroppe, og måske vi ogsaa kunde
træffe ugen senere under mit

Dear Robert

Why not put
your dots all in line
on a wire. There is
no difficulty in putting
a dot on a wire. You
can still pick them all
up simultaneously by some
pick-up string out along
the wire. Use three
(or four) wires running
parallel for your transfer
back & forth stunt.
All pick-ups inactive until

bank an gadget which
puts the trial layout on
the wires.

Looks OK. Give a job
of development. Let me
have a memo on it.

Very truly
yours
R. B. J.

immediately after an activating
pulse (on the 4th wire maybe)
Wires on reels. Reverse at
end & run back. I think
the thing can readily be set
to operate in both directions.
Wires much longer than
your sheet, but no more
metal to handle - less in fact.
Wires can run fairly fast.
First outfit should presumably
be built with only a few
points & not much provision.
Make your printer so that
it interprets from binary
to decimal before printing -
this can be done with a
relay bank. Use same

Prof. Norbert Wiener
Massachusetts Institute of Technology
Cambridge, Mass.

Dear Professor:

I just finished reading "Ex Prodigy" and "I am a Mathematician" and enjoyed their revealing quality of your development and accomplishment. The first book should be a 'must' for all mothers with children that are bright and might be developed into something other than fodder.

I received a letter yesterday from one Frederic Lehman of 29 Clinton Place 53 Bronx, New York City who is the son of your cousin Olga Lehman with whom he lives. He states that he is leaving by plane on the morning of the 6th of February on a grant, with his new wife, to Burma for a year. He is an archeologist and may get his doctorate before he goes. I judge that you may know just what these grants are; that you may wish to send him a check for \$1000 or less to help him out; that you may know someone along his route that you might wish him to see; he is going to Honolulu, Wake Is. Hong Kong, Ragoon Bangkok; Tokyo; why do I make this suggestion? For the reason that I believe that Olga is your only living cousin and that he is her only son, and that he is about to face a situation where you may help him, but not by patronizing him. I would ask him to do you a favor; that you had learned that he was about to go to Burma. You might want to telephone him. His number is Fodham 5 3765 and is in the Bronx telephone Directory in New York City. He is as independent as you were; He got this all on his own and his merit; He is a student of the highest order not too unlike what you were. I anticipate his career will be outstanding and he will thrill the world with his accomplishment. Sounds fantastic. He is unusual. 6'4; named after your grandmother Fredawhom Olga helped to support the many years before your father helped.

I trust you won't reveal this letter to them and trust that you will act on it. I have naturally given a great deal of thought to it before writing and feel that this is the one opportunity in his 26 years that you may be able to help out. You might be able to get another grant for him. I trust so. He is in Illinois at this moment to Feb. 1st.

Sincerely yours,

Sam Davis

Dear Dr Weiser,

I have been referred to consult with you on a matter which only a man of your experience and knowledge could understand and help me with. For many years I have been studying the many different sciences, and have given much time in making sure I understand them. For many months now I have engaged myself in the readings of Physics, and have also read many of the theories of the great men of Physical science. In reading these things I have seemed to form opinions and ideas of my own. I have hit on what I believe to be something that needs the analysis of an expert in this field, that's why I am asking you to read this typeset written sheet which explains what my theory is mainly and wholly about. If I might ask of you this much only, I know that you are a busy man and have little time for reading every man's theory, but if you could please answer me and tell me if it is logic, what could be done in your opinion to make it more logic and what improvements could be made

to make it more useful to the field
of science when it has been finished and
more properly stated.

Thank
you

THE SHELBOURNE HOTEL,

UPPER BEDFORD PLACE,

LONDON, W.C. 1.

Sehr geehrte Herr Kollege!

Meinem Brief aus Prag ist die Lage der
deutschen Mathematiker haben Sie wohl
bekommen. Ich bewerte die Gelegenheit eines
kulturellen Aufenthaltes in London, um vor allem die
Hilfsbriefe ganz frei geschickten sein können um
Ihren noch einige zu schreiben, Ihre Vetter
Dr. in Leipzig ist in sein Pöthy sehr unruhig und
würde sich wünschen, Deutschland verlassen
zu können. Ich hat ihn von Ihnen Brief
erhalten und er hat Sie sehr liebend, wenn es
Ihren möglich ist, ihm ein Pöthy und andere
Deutschlands zu verschaffen.

Ebenso ähnlich gilt über R. v. Mist. Er ist,
wie Sie wissen in Berlin und wohl der
wichtigste Vertreter der reformierten Mathematik in
Deutschland, er ist auch ein besonnes Kame

der Fluchtort. Er kann jedoch
unbekannt sein, da er selbst sehr
sehr Deutschland zu verlassen, wo jeder
Blick um sein Heilig Kreuz kann und der
seine Leben ein Kette von Unwissenheit ist.

Die neue Stelle selbst haben Comand Kainy
Klein, Linden, Reidermuth, Cobin-Vomay,
Hornberg u. s. W. etc. etc. ist Reidermuth
reiner, germanischer und von wegen
demokratischer Prinzipien verlassen.

Wenn es Ihnen möglich ist, bemühen Sie sich
jedenfalls, um in Ansehung auf die bairischen
Zustände in dem deutschen Reich zu hinterfragen,
Bei meinem letzten Aufenthalt in Berlin
haben mich sogar Mitglieder der „deutschen
Partei“ besucht, die ebenfalls Ansehung für die
sichere Verhältnisse jedes und durch ich im Westen
und die deutsche Zustände nicht zu kommen
mit beiden Seiten zu thun. Freund

Sehr geehrter Herr Kollege !

Herzlichen Dank für Ihren Brief. Sie können sich denken, wie mich das Ende Ihres Veters erschüttert hat. Ich weiss aber gar nichts näheres darüber ausser das ihm in Zakopane ein Herzschlag getroffen hat. Über die Gründe habe ich wohl Gerüchte gehört, aber nichts positives.

Es ist wirklich ^h bewundernwert, wie viel in Amerika für die Mathematiker geschehen ist. Ich möchte Ihnen noch über einen Fall schreiben, von dem ich glaube, dass man sich aich seiner annehmen sollte. Es betrifft Paul Hertz in Göttingen, der seine Stelle verloren hat und gar keine Pension bezieht, da er nicht planmässiger Professor war. Er hat eine Frau und mehrere Kinder. Wie Sie wohl wissen, ist er ein sehr weltfremder Mensch, der sich kaum etwas wird beschaffen können, wenn man ~~a~~ ihm nicht hilft. Er ist wohl in manchem etwas altertümlich, aber ~~ein allem~~ ein sehr feiner Denker, der auf dem Gebiet des axiomatischen Aufbaus der Physik einer der besten ist. Auch in der mathematischen Logik hat er viel geleistet. Als Vortragender kann er auch sehr anziehend sein, wenn er auch oft durch Zerstretheit auffällt. Ich glaube, es wäre sehr gut, wenn man für ihn etwas ~~tun~~ tun könnte, da er in einer sehr schwierigen Lage ist. Er ist ~~ein~~ sehr feiner Mensch, den man vielleicht ~~oft~~ zurückgesetzt hat, weil er nicht die Fähigkeiten hat, sich in das rechte Licht zu setzen. Und so trifft ihn jetzt sein Schicksal doppelt hart.

Wir sind jetzt in Prag dabei, auch eine Organisation zu gründen, die uns die Mittel verschaffen soll, einiges für die Gelehrten zu tun, die ihre Stelle verloren haben.

Mit vielen herzlichen Grüssen an Ihre Frau und Sie selbst
Ihr ergebener

Paul F. L.

Sat P.M

Dear Herbert, -

There is something missing in the explanation of the machine operation, as far as it penetrates. In thinking over the affair this afternoon I am stuck. Operation is OK - I see no insurmountable difficulties there - merely a lot of technicalities to work out with care - my difficulty is in the theory of the thing.

I see how a surface would deform under the averaging process - but I don't see why it remains a solution of the equation. Rather, I can see how it would remain a solution of some equation, but I don't see how the equation could be anything but that one, and

I'm not sure that the "one" is the
potential function.

So I need some additional
stuff as to how a particular
equation is made to control
the operation. Maintenance of boundary
conditions doesn't trouble me.

Countryman
M. G. G.

leaving for White Tomisto.

Barry Goodman
81 Birch Lane
Valley Stream, N. Y.

Dear Sir,

How are you? I wrote to
a man in Cambridge,
Mass. also. Do you like
being a professor? May
I have your picture please?
Congratulations for your scienc
medol.

Yours truly,
Barry Goodman

Sehr geehrter Herr Nieber,

Seit einigen Tagen befinde ich mich in
Tübingen, wo ich während dieser Winter-
Semester vortragen werde.

Übereinstimmend ^{als ich} war ich erfreut dass Prof. Kaminke,
schon seit Juni, nach dem so genannten § 6.,
in Gutesstand versetzt worden ist.

Da Sie sich sehr sehr hatte ebenso sehr
Röhren ~~erfinden~~ ich als Pflicht dies Ihnen
mitzuteilen. Hätten Sie eine Möglichkeit
ihn nach Amerika zu rufen, so röhren Sie
sich an ihn direkt wenden. Ich bitte Sie
aber, in diesem Falle, sich nicht auf meinen
Brief zu berufen, da ich es ohne seiner Willens
Leute - er scheint mir hässlich, in dieser
^{Hicksicht} Richtung, sehr zurückgezogen zu sein.

Mit besten Grüßen, bleibe ich

Ihr sehr ergebener

J. Karamata.

P. S. Beiliegend eine schöne Verallgemeinerung
1° des Hardy'schen Lücken Satzes
2° des Hardy-Littlewood-Schmidtschen
Lücken Satzes.

1. Aus $\sum_{n=0}^{\infty} u_n e^{-\lambda_n \epsilon} \rightarrow s, \epsilon \rightarrow 0$

und

$\liminf_{n \rightarrow \infty} \text{Min} \left\{ \sum_{n+1}^{n'} u_n \right\} \geq -N(\epsilon) \rightarrow 0, \epsilon \rightarrow 0$
 $\lambda_n \leq \lambda_{n'} \leq (1+\epsilon)\lambda_n$

folgt

$\sum_{n=0}^{\infty} u_n \rightarrow s, n \rightarrow \infty.$

Hier ~~bedeutet~~ ^{ist} $\sum_{n=0}^{\infty} u_n$ ~~soviel wie~~ ^{gleich} Null. zu setzen.

J.R.

Dear Sir,

Before it becomes apparent I wish to state I know there is a great disparity in our demonstrable ability and I sense the gap is more a measure of difference in initial velocity plus ability than a measure of difference of direction. It is the direction that gives us something in common, slight though it may be.

It seems, to me, that $E = mc^2$ is nothing unless velocity has direction implied. The situation in the U. S. A. has a velocity in a windfall of inferences - leading most of us to suspect we are a howling success. We are all sick and tired of it I'm sure. The howl that is.

The Cleveland Plain Dealer of one day prints an editorial defending its policy of editing news too foul to print. The following day prints the disposition of a case involving a father of nine children - the father being guilty of raping a four year old girl. In situations like this it must seem to the average man, insanity may be assessed.

There are ten children involved in this one classic instance. For every classic identifiable instance there are many near instances - there are more such as these - too many.

It would seem to me these ten individuals are going to spend a minimum of five hundred years here with the philosophy "I happened" "I will unhappen". If I infer correctly from your Cybernetics and Society the conduct of these ten individuals over

the years will be observed by the individuals near them in the community - I believe you have stated man is most influenced by what man sees. In the time they are to spend here they may become 10^2 in influence.

"I happened", "I will unhappen" the elements constituting the mass of the body were here prior to conception and will remain after "I" pass from the period of recognition called life. A pointless philosophy - almost commercial - but a point of origin at the low end of the coherence spectrum. Now which way is up spectrum for them?

It is said that we will have over twenty million people retired before the year two thousand - if ~~they~~ behavior of these

pensioners could indicate direction to those whose background would be better if it were zero - they might very well follow their direction. Assuming the line of sight as a dumb line from young to old - the primary influence - then any individual trajectory in the chronological interim would have the quality of a game for the incoherent as well as the coherent.

Direction for man must be related to something external from man as man. Man to a balanced ^{flora} ~~fauna~~ habitat might be considered. In our way of life we give much aid to other nations in a manner degrading to those who accept - for there is no way to repay. Premier Mu of Burma wished to repay a ten million dollar loan in rice. He can do. A young proud nation gets a ~~good~~ slap

in the face - we lose ten million dollars.

It is characteristic of the cities that they do not know what to do with themselves - again no direction. Assuming they would respond to making a pseudo-career of rehabilitating areas, desolated by commerce and neglect, by replanting to choke-cherry - nuttall plum - hazelnut - grasses etc. The financing of the operation might be done through a trickle back ^{in materials} of money expended abroad.

Masses of capital goods would not be necessary - toes and transport - hand, heart, and head they have - most have an income of sort for pocket money. Planting patterns could be plotted for greatest effect.

Pardon my haste.

Sincerely yours,
Bernie Kimmons

V. Weier
Frank
Sehr geehrter Herr Kollege,

Wie mir mein Freund Baer — bisher Privatdozent in Halle — mitteilt, gibt es jetzt auch in Prag ein Hilfskomitee, das sich mit dem Schicksal von Akademikern befasst, die durch die Besonderheiten der Lage in unserm Lande betroffen werden. Ich wäre Ihnen zu großem Danke verpflichtet, wenn Sie mir die Adresse dieses Komitees mitteilen könnten und mir vielleicht sonst noch einen Wink zukommen lassen würden, der mir in meiner jetzigen Lage wertvoll sein könnte. Unsere Bekanntschaft ist ja allerdings keine sehr nahe, wir haben uns auf einigen Tagungen gesehen — aber ich nehme an, dass Sie meinen Namen kennen, und die Ereignisse der letzten Monate nötigen jetzt weitere Kreise von Menschen näher an einander zu rücken, vom eigenen Schicksal zu reden und am fremden Anteil zu nehmen. Bei mir liegt die Sache so: Als nichtplanmäßiger ~~Extraordinarius~~ Extraordinarius falle ich unter das Beamtengesetz und da ich nachweislich vermordeter Fortkämpfer bin, wird mir die Lehrberechtigung ^{zunächst} nicht entzogen werden. Als Assistent des mathematischen Instituts falle ich aber unter die Bestimmung, dass allen nichtarischen Assistenten zu kündigen ist,

und es ist mir auch zum 31. 10. gekündigt worden. Von dieser Anwartsstelle habe ich aber mit meiner Familie (Frau u. 3 Kinder) gelebt. Ab 1. 11. bin ich aber ohne Einkommen - mein Vermögen ging in der Inflation verloren - und habe bei den jetzigen Verhältnissen auch keine Möglichkeit mir hier durch irgendwelchen Nebenverdienst mein Brot zu verdienen.

Aus dieser Situation heraus bitte ich meine Anfrage verstehen zu wollen. Wenn Sie es für nützlich halten, dass ich mich mit den Herren des Komitees, oder auch anderen Persönlichkeiten direkt bekannt mache, bin ich gern bereit nach Prag zu reisen. Ein Verzeichnis meiner Schriften lege ich bei. Falls Sie in nächster Zeit keine Gelegenheit haben diesen Brief zu beantworten, wäre ich Ihnen doch dankbar, wenn Sie mir durch Postkarte bestätigen wollten, dass er dort eingetroffen ist.

Hoffend, dass Sie meine Anfrage nicht als Belästigung betrachten werden
grüße ich mit dem Ausdruck kollegialer Hochachtung

ergebenst

+ Levi.

Gautsch b/Leipzig

CLEMENT A. NORTON
MEMBER

Dear Professor Wiener:

Would you kindly give me the name of De Valera's teacher who became a convert Catholic? Do you know of any outstanding Irish mathematicians in Erin today or during the past 50 years?

Thank~~s~~ you.

Respectfully,

Clem Norton,

ADDRESS: Supt. Commonwealth Pier,
Boston, Mass.

TELEGRAM

Dr. Norbert Weiner: M.I.T. Boston Mass. *Life Line Wn 3 D.C.*

I have sent you three letters describing my theories. I know have 10 more pages of Theories, and the MACHINE is greater than the mind, because of its superior capacity of memory banks, but don't underestimate the mind itself as it is also a machine, with cellular capacity of squaring light much like a transistor. The description of how I stumbled on this information and the information itself will startle the world. It is your responsibility as the only known man of stature that can understand this to send for me at once. I am now located at 1896 Liberty Lane, Marysville, Washington. If you are not interested let me know either by mail or telegram so I may contact C.I.T. or the Rand Corporation, as this area of pure Science cannot go long unacknowledged.

Sincerely,

Edwin Ross Papin

Telegram:

Dr. Norbert Weiner: M.I.T. Boston Mass. *Life line Wm. 3 D.C.*

I now have theories on atomic energy and simultaneity. I believe these are valuable to our national defense and propaganda warfare. Not only valuable, but heartwarming, inspiring, the power of the American ideal times itself. I believe it is imperative that you listen to what I have to say. If you still doubt me I will send you copies of my control theory and simultaneous theory. Please answer immediately!

Dear Dr. Weiner:

Since I wrote that other letter there has been a major breakthrough in the mind itself. I am aware of the functioning of my own brain. The orgasm theory is now creation theory and I have some insights into Time Theory. The mind is a super machine that can find its own pleasure within itself. Each thought that is an insight is reinforced. I discovered it quite by accident, but I believe it is the next scale on the evolutionary ladder.

I now believe it is imperative that you, send for me and bring me to M.I.T. This can be the greatest source of power ever known. I HAVE ALREADY EXPERIENCED SPASMS OF PLEASURE FROM THINKING WITHIN MY OWN BRAIN. I NOW HAVE THEORIES ON THE ORGASM, CREATION AND EVEN THE NATURE OF TIME. MY MIND IS FUNCTIONING AT A FANTASTIC RATE, AND I AM DEFINETELY AWARE OF ITS FUNCTIONING AS IT REWARDS ITSELF.

This is a great opportunity for our country, our space program and the future of humanity, Either send or wire me plane fare, and I will be there as soon as possible.

% Dr. Weiner
M.I.T.
Cambridge, Mass.

Dear Miss. Riffer:

Sometime ago I received your note along with my returned manuscript, at that time I was in a process of revising the original manuscript I sent to Dr. Weiner. I know you are very busy at M.I.T. and that Dr. Weiner is also busy, but this particular manuscript is very important to me and it should interest Dr. Weiner. Undoubtedly he receives much correspondence and most of it has little or no meaning but this particular manuscript which is so lightly regarded has its merit and warrents attention. It is easy for you to ignore something and return it and yet you don't have any idea of what is behind it, what circumstances brought it about and what the author went through to obtain it.

It is very important to me that Dr. Weiner see this. If he wants to return it that is his perogative. I hope at least he will give me the benefit of reading it.

It has been revised and changed and contains new insights as well as old. I have nothing to gain by his reading of my manuscript my only hope is that he will read it.

I have sent Dr. Weiner several letters and either he is uninterested or has not received them. Perhaps both, nevertheless, I wish you would impose on him and at least see to it that he receives it. It is the least you can do for a struggling artist.

Sincerely yours,

Edwin R. Papin

Dr. Norbert Weiner:

I have sent you several letters explaining my theories. I even sent one special delivery that was to be signed for if you received it. Obviously you have received none of the letters or they are all at your office in the University.

This is nearly my complete treatise on the physics of the brain and I hope to have it forwarded to you. If you receive this you can go to your office and get my other letters.

I plan to send this to other institutions by regular mail.

If you receive this contact me immediately.

Sincerely,

Edwin R. Papin

Editor In Chief

Gentlemen:

This is the story of the century. The Soviets herald their famous, "The Ten Days That Shook The World," as the beginning of the Soviet State. This is, "The Day That Shook The Universe," and it is the beginning of a new status for the Individual. The day that shook the universe was July 20th 1961 and the universe was shock by an American. This is significant and it has value for propaganda warfare. It will give a new inspiration to individual effort and every American will feel a psychological lift.

All previous speeds have no meaning compared to the Time barrier. Space exploration is peanuts compared to the brains speed as it rushes to the limits of our Time Suspension by compounding light squares and then goes beyond this to the speed of Animated Time.

This particular phenomena can be proven by anyone who has the nerve to try it. This treatise is but a small section of my total theories. I have theories that join all branches of science.

If you are interested contact me immediately. I will answer any questions that any known scientist can ask me but I prefer a physicist as this knowledge is basically in the realm of physics. I only ask that they first read my treatise.

Scientists are not necessarily needed, actually what I have discovered is just a refinement of common sense, in fact it is possible that the ordinary man will be able to understand it better than the academic scientist as he will be limited by conformity to previous science.

It seems to me that the world is ready for a new idea. Physics has ground down to an inductive standstill. It is not imaginative in nature and needs a new theoretical basis.

This information can be proven by going to Washington Bay Alaska and asking what happened on July 20th 1961, but don't delay the season is short and it can best be done where you have all the men together to talk to.

Whoever contacts me first will be the one who gets the complete story and all my theories.

Any part of what I have mailed can be reproduced and given to whomever would like a copy.

I plan within three days to send a copy to the Russian Academy of Sciences in Moscow and to the Russian Embassy in Washington D.C. If the Americans will not listen perhaps the Russians will.

Sincerely,

Edwin Ross Papin

Dr Robert Weiner:
professor
Department of Mathematics
M.I.T., Boston, Mass.

My dear Dr. Weiner:

As the Chinese has the
old saying "time flies like an arrow -
光陰如箭" so it is already five
months over since I left Massachusetts.

We are always talking and thinking of
New England and our dear friends.

We are hoping that we will be able
to make a long trip for our vacation

back to New England.

How are you and Mrs Weiner and how are the two young ladies. We are especially thinking of you and the good times we had together.

As West Virginia has no state psychiatrist I have been given the additional tasks of examining all court cases for the State. The work is interesting but the job of testifying in court is too much of a responsibility at times.

My brother in law William Goen Goon has completed two years of college and he has by this time

117

finished his second year at Boston
college, planning to major in Chemistry.
According to his recent letter, he would
like to have summer work that will
be helpful to him to acquire some
practical experience. Dr. Weiner,
we will be deeply appreciative for
any good advice from you concerning
the possibility of such a move.

Williams' present address is

William Yuen Goon,
227 Circuit Rd.,
Portsmouth, N.H.

We hope that we are not causing you
any inconvenience in this matter,

and we want to thank you again
for your assistance in the past.

I remain,

Very Truly Yours
Orlough Pughman

Dear Wiener:

Extremely busy this
week. Will write Hapsf on
Monday and write you also.

Best greetings

R. S. Anderson

Wiener

Enjoyed your comments & concepts in
Cybernetics.

Thought you may be interested in
the enclosed abstract.

Lieber Herr Wiener, es ist sehr
ich, dass ich wegen P. Lévy gar nicht
in dem Bull. Soc. math. de France,
sondern im Bull. Suisse math.
genutzt habe. Das erste ist hier
nicht zugänglich. Wenn bei Lévy
etwas wesentliches steht, informiere
mich Sie mich doch bitte.

Keine in letzterem Vorlesungstag,
von morgen an bis ich meine eigenen
Herrn. - Ich habe mir überlegt, dass
es in unserer ersten Arbeit doch
wohl nicht zweckmäßig ist, systema-
tisch mit Plieltjes integrieren zu
operieren, wir müssen doch dauernd
mit den Ableitungen arbeiten. Ich

Vergiss nicht
Postkarte
und Hausnum.

anzugebe.

Thursday late afternoon

Dear Marie :-

Just had a wire from

Severinghaus

"Teleprint probability program
in our Bulletin stating Physical Society
and Section B as invited guests stop. Was
wireing Slater on room decision"

Am mystified by last sentence.

Can you write me (so as to reach me on
Saturday) what it means.

Propose to interchange the rooms for
sections on Wednesday morning giving

Probability the larger one - Alumnae
Room. Probably Severinghaus was asking

Correctly
K. Richardson

rooms and
of physicists who would likely attend
number
the
Slater

are

Sehr geehrter Herr Professor!

Als ich im vorigen Jahre - in dem gastfreundlichen Haus von Herrn Prof. Landau - Sie kennen lernen die Ehre hatte, versprachen Sie mir mich mit einem Sonderabdruck „On the Representation...“ zu bedenken.

Inzwischen ist Ihre hochinteressante Note über „The Questional Calculus“ ferner eine mit Herrn Bonn verfasste erschienen.

Ich befehle mich mit dem Heaviside Calculus zwar mit Hilfe der Laplace-Transformation, da mir z. B. die Carson'sche Arbeit in dem Bulletin of the Americ. Math. Soc. XXXII. No. 1. vollkommen unbefriedigend erscheint (ich weiß nicht ob diese mit der von Herrn erwähnten „Gronwall“-Carson Note identisch sein soll.) Immerhin liegt mir ein gründliches Studium Ihrer erwähnten drei Noten sehr am Herzen.

/.

Ich wäre Ihnen daher sehr dankbar,
falls Sie mir dies durch Ihre Separata erleich-
tern könnten, und, verbleibe

Ihr sehr ergebener

Dr. T. v. Stacho'

M. I. T.

Dr. Robert WEINER, it
will be worth your while to
go to Brentwood, near St. Louis
County and complete the FAULTY
Brain Check - There is a
building near Brentwood, mo - that
holds just what you are looking for
or holds various things that you
never knew you needed - it would
be wonderful if you would let the
F.B.I. be your RIGHT HAND BOWMAN
DR. ROBERT WEINER, you are not
the first to interest them
