National Technology Banquet

¶ At 9.00 o'clock Eastern time, 8.00 o'clock Central time, 7.00 o'clock Mountain time, and 6.00 o'clock Pacific time, the thirty-three Technology Clubs in the United States west of the Hudson River, holding banquets in their respective cities, will be directly connected with Symphony Hall, Boston, for a period of about two hours.

¶ Each of the five thousand guests at these banquets will be provided with a telephone receiver. All the speeches will be delivered into a telephone transmitter, and the outside guests will hear them under practically the same conditions as the audience in Boston.

¶ There has been no limitation of service to make the conditions of the demonstration less arduous or practical operation more convenient. The local clubs are meeting at the places they have chosen and the telephone has been taken to them, not along the great trunk lines especially equipped to meet the demands of transcontinental commerce, but to many points outside the beaten path.

¶ As about eighty per cent. of the Tech men connected with the twelve clubs in New England are assembled in Boston, practically every former Technology student in the United States will hear the voice of his President, of the man who conceived the idea of electrically transmitted speech, and of the other distinguished speakers who have assembled to do honor to the Institute of Technology.

¶ This is a demonstration of the marvelous advance of telephone science from the barely audible message of the inventor, Alexander Graham Bell, to this great national convocation made possible by the vision and organizing skill of Mr. Vail, and the engineering triumphs of Mr. Carty, his predecessors and associates.

¶ The Technology clubs connected are as follows:

¶ Akron, Atlanta, Boston, Birmingham, Buffalo, Butte, Chicago, Cincinnati, Cleveland, Dayton, Denver, Detroit, Duluth, Harrisburg, Indianapolis, Kansas City, Los Angeles, Louisville, Milwaukee, Minneapolis, New Orleans, New York, Philadelphia, Pittsburgh, Portland, Rochester, St. Louis, Salt Lake City, San Francisco, Seattle, Schenectady, Spokane, Syracuse, Urbana, Washington.
