

Surveys, 1906 - Correspondence
with Mrs. Richards

1906-1907

MC 65
Box 3 Folder 37

Dear Mrs. Richards:—

The circular regarding "What some Technology women have done" has been received: had I any long lists of publications, degrees, appointments etc to write I suppose they had been sent ere this: in such a paper as is contemplated I suppose my work since graduation from the Institute counts for nothing:

For the sake of others
whose work in the world
has been similar to
myself ^{own} may I suggest
that we bring or send
photographs illustrating
our work; to those of us
who are not brilliant
stars in the educated
world it will be a
comfort to look at our
children's pictures - for
they may become dis-
tinguished if we have
not. But perhaps
my suggestion is too

unseasonable for the earnest members
of the Institute to consider. All
that I wish to make the
suggestion.

Yours sincerely

Wm. L. G. W.

P.S. I much doubt if I could bring my
very baby to the annual meeting any day
possible as riding & sleeping many
ages & hours for the privilege of
bringing her up & preparing her for work
in the world.

[The page contains several lines of extremely faint, illegible handwriting, likely bleed-through from the reverse side of the paper. The text is too light to transcribe accurately.]

Ethel Fifield Brooks 1900 A.B.
Mrs. Lawrence R. Brooks

Taught domestic architecture, Boston
School of Housekeeping 1900-1902
Lectured on same subject, women's clubs
married, Aug. 31, 1904.

address, "The Architect and the House-
wife", Lake Placid Conference on
Home Economics, June, 1905

Daughter Shirley born July 7, 1906.

Chairman, Committee on Home and
Club study, Lake Placid Conference
Committee on Home Economics,
N.Y. branch of A.C.A.
Director N.Y. branch A.C.A.

Please, ma'am, I hope this is not too
late, and will you let me know about
our A.C.A. in time for our directors'
meeting Friday?

A plan is maturing to have for the annual meeting of the Institute of Technology Women's Association a paper on "What some Technology women have done."

Since there seems to have been little recognition of the amount of literary and research work that has actually been done, it is thought that a good article for the Technology Review can be made from this paper.

Facts about publications, degrees, and appointments, dates of studies abroad, notes with a word as to researches will all be interesting and valuable.

Please send information, at once, to Mrs. Ellen H. Richards, Massachusetts Institute of Technology.

11

THE ROCKEFELLER INSTITUTE
FOR MEDICAL RESEARCH,
66TH STREET AND AVENUE A,
NEW YORK.

Nov. 5. 1906.

Dear Mrs. Richards, -

Prof. Sedgwick
told me that out of thirty ap-
plications, I was one of five,
~~chosen~~. appointed to a scholarship
in the Rockefeller Institute for
Medical Research.

I don't feel it any-
thing to boast of. I'm in
mortal terror of being sent home
in disgrace!

With love,

Bertha L. Barker.

118 Charles St.,
Feb. 20, 1907.

Dear Mrs. Richards,

Enclosed you will find the necessary data, from which you can choose whatever you wish to use.

Could you tell me just when Miss Tutting is expected to be in Boston?—she and Miss Kinne? I think you said both were expected?

Yours sincerely,
S. Maria Elliott

286 Marlborough St.

January 6.

My dear Mrs. Richards -

The meeting yesterday
was very interesting and
I must thank you cordially
for the pleasure of being
present -

It should not perhaps
go upon your records that
Miss Frothingham was the
first president of the
W. C. Association -

Mrs. William Endicote

was the first President
and Miss Frothingham, the
third -

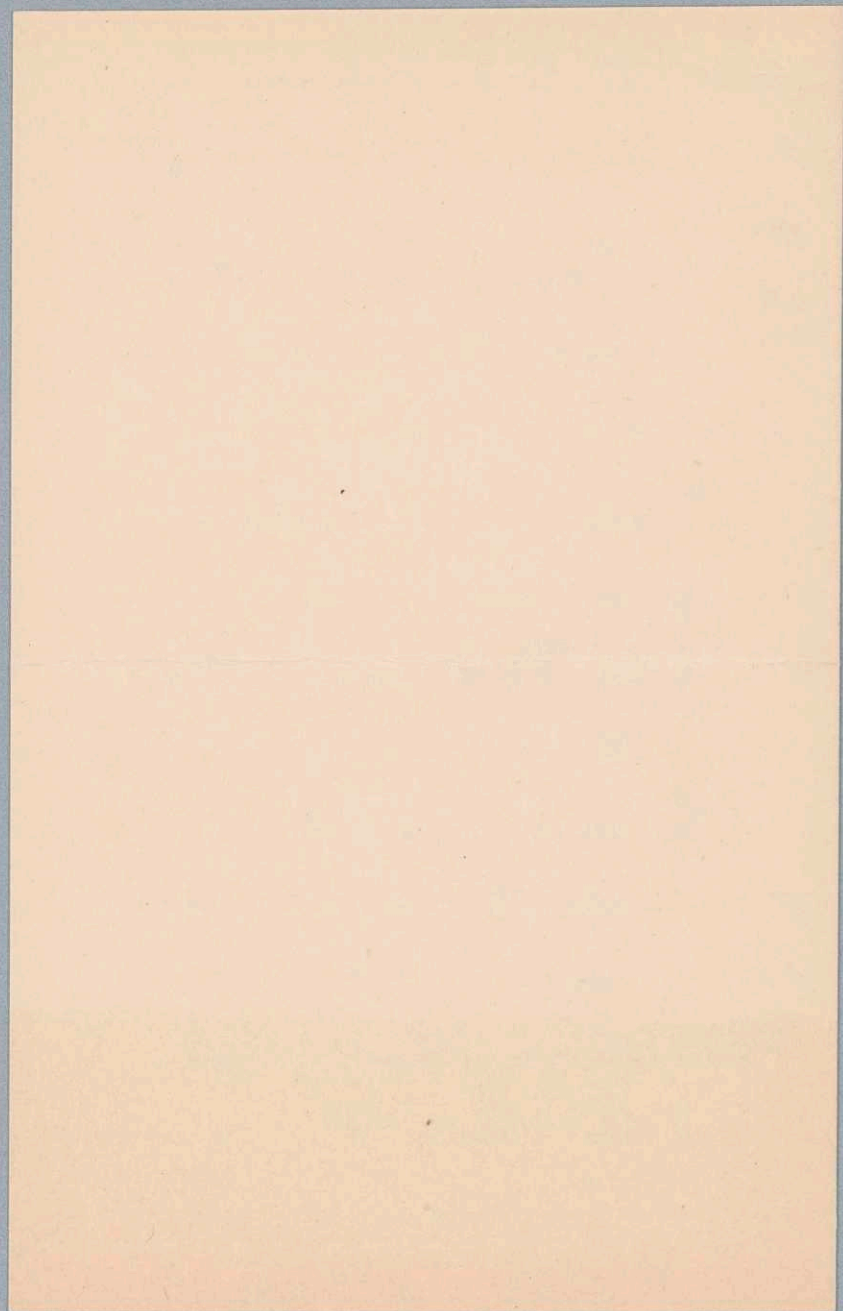

I am glad that
you have that charming
portrait of her.

Pardon my rather
brusque reply when you
kindly told me that
my driver was waiting.

It did not seem
possible to leave just
then and I had told
the man that he
might have to wait
some time and that

I should be responsible -

Very truly yours
Virginia Dismick.

Studied in Europe from '95 - 1900.
history, design - languages -
Has exposed etchings and pen
drawing at the Salon ('99) at the
American Girls Club - and here
in America at the Penn. Acad.
at the Architectural League and
Boston Art Club.

Is making a speciality of
"book-plates" - ("ex libris")

(If there is any thing that is wanted
in this I am glad to furnish it -

Sincerely,

Margaret H. Wright)

My dear Mrs. Richards, -

I received
the notice of the plan for the
annual meeting of the Insti-
tute Technology Women's Assoc.,
with the request that I send
information to you about myself.
I have never published any
thing and the only thing of
interest about me is that
I have been Professor of Chemis-
try at Welles College for

thirteen years.

I should like to hear the
paper. It will be interesting.

I hope that you are well
and that work is pleasant
this year.

Sincerely yours,

Clara A. Bliss.

Anna.

Dec. 3, 1906.

[Faint, illegible handwriting, likely bleed-through from the reverse side of the page.]

Amth m. Dec. 3, 1906.

My dear Mrs. Richards:

I write in

reply to the circular letter
sent for information.

As you well know I
have done nothing worthy
of note.

I studied at the W. L.
in 1880 - I taught chemistry
from there till 1892.

I designed the desks &
plan of instruction
which was ^{first} introduced
into the public schools.
Many cities all over the
country have copied the
same plan desks & plan
of instruction, substantially
truly as I introduced
it in School No. 1
in 1885 - at Newry, N. Y.
Married in 1892 -
Teaching for ten years
then was to a select
few. Am now

lecturing when opportunity
offers on Domestic Sewing
Machines - The Introduction of our
Machines. Powers & Co.

I have given a number of
lectures each year, but raised their
price - It seems as long, their
price I have seen you. I
have been very busy during
the past few years I have been
obliged to go a short time
to Europe, to the extent of 4 or
5 weeks. Railroads were slow to

es. We should be so
glad to welcome you
at any time.

With best wishes to
you both.

Your affec. & devoted pupil

Amy Barnes Maynard.

10

537 West-122nd St.

New York City,

Dec. 2, 1906.

My dear Mrs. Richards;—

I fear this note may prove too late for the purpose for which you requested it;— It may be of interest to state that I am now working at Columbia University (on a Garden Research Scholarship) on two subjects, major - The Ferns of Japan - Synopsis, and Origin of Fern Flora of that Country; minor - on which I am putting scarcely less work as it is a

I was only a special student at the Institute of Technology - doing some work in Biology while an instructor in the Somerville E. H. S. - Prof. Ledgwick will remember me - and should it be convenient for you to tell him of my present work I think he would be interested.

Yours very truly
Mary Pearl Anderson.

question of vital interest to me - Formulation of a scheme of Nature-study adapted to the needs of a Great City. - The research for the first subject is done at the Bronx Bot. Garden under Prof. Underwood; for the second at Teachers' College and the Sayer School - under Prof. Bigelow. - I have also had two years of graduate work at Chicago University in Botany - with Prof. Coulter, Dr. Barnes and Dr. Cook. - For the two years preceding the present one. I was Instructor in Botany at Mt. Holyoke College.

The following is a list of the
names of the members of the
committee on the subject of
the proposed amendment to
the constitution of the
state of New York, which
was adopted by the
legislature on the 15th
of June, 1894, and
which is now pending
before the people of the
state at the general
election to be held on
the 1st of November,
1895.

Mills 27

East Dedham, Nov. 16, 1906.

Dear Mrs. Richards -

I am sorry I can

add nothing to the report of liter-
ary and research work that
has been done by Techno-logy
women. I have married since
I left the Institute and we re-
port three children whom we
are endeavoring to bring up to
do their duty in the world.
My time has therefore been occupied
in rearing my children and

keeping home. In this latter work
I am always intrested to hear
what will add to the comfort and
happiness of the family, although it
is not always possible to carry out
all the ideas brought forward.

Sincerely yours
Mary B. Lockwood.

[Faint, illegible handwriting, likely bleed-through from the reverse side of the page.]

Lewiston, Me., Nov. 13. 1906

My dear Mrs. Richards:

I am sorry you have not yet received an answer to your request for information. I wrote you at once but - I have just found my letter which was not mailed.

I regret that - I cannot give you any interesting items for your annual meeting and for the Technology Review article. I have been working hard but - I have had no opportunity for literary or research work. Since I have been in Lewiston I have had constant anxiety in consequence of illness in the family. Home cares have

absorbed all of my time outside
of library hours.

I enclose a paper showing
what I have been doing
since I graduated from the
Institute. Just after my
graduation from Vassar College
I was for three years in
Europe. The years 1875-6 I
spent in Paris, Switzerland and
Germany, studying French and
German with private teachers.

I hope you will have a
very successful meeting. I
should like to be there but it
will not be possible for me
to leave home, I think.

It is a regret to me that I
could not see more of you
when I was in Boston. I should
have liked to know you better.
I trust you and Prof. Richards

Lewiston, Me., 190

are well. Will you please
give him my kind regards.

Affectionately yours,

Caroline A. Woodman.

Lewiston, Me., 190

- 1889 . A. M., Vassar College.
- 1889 - 94. Instructor in Physiology
at Wellesley College.
- 1895 — Librarian at Bates College.

Caroline A. Woodman,
M. S. T., Class of '89.

9

1435 Euclid Street,

Washington, D. C.

Nov. 7, 1906.

Mrs. Ellen H. Richards,

Mass. Institute of Technology

Dear Mrs. Richards,

In response
to a request for information
concerning my work, I send
the following.

After the completion of a
special course in Biology and
Geology at the Institute, I
taught for six months (as

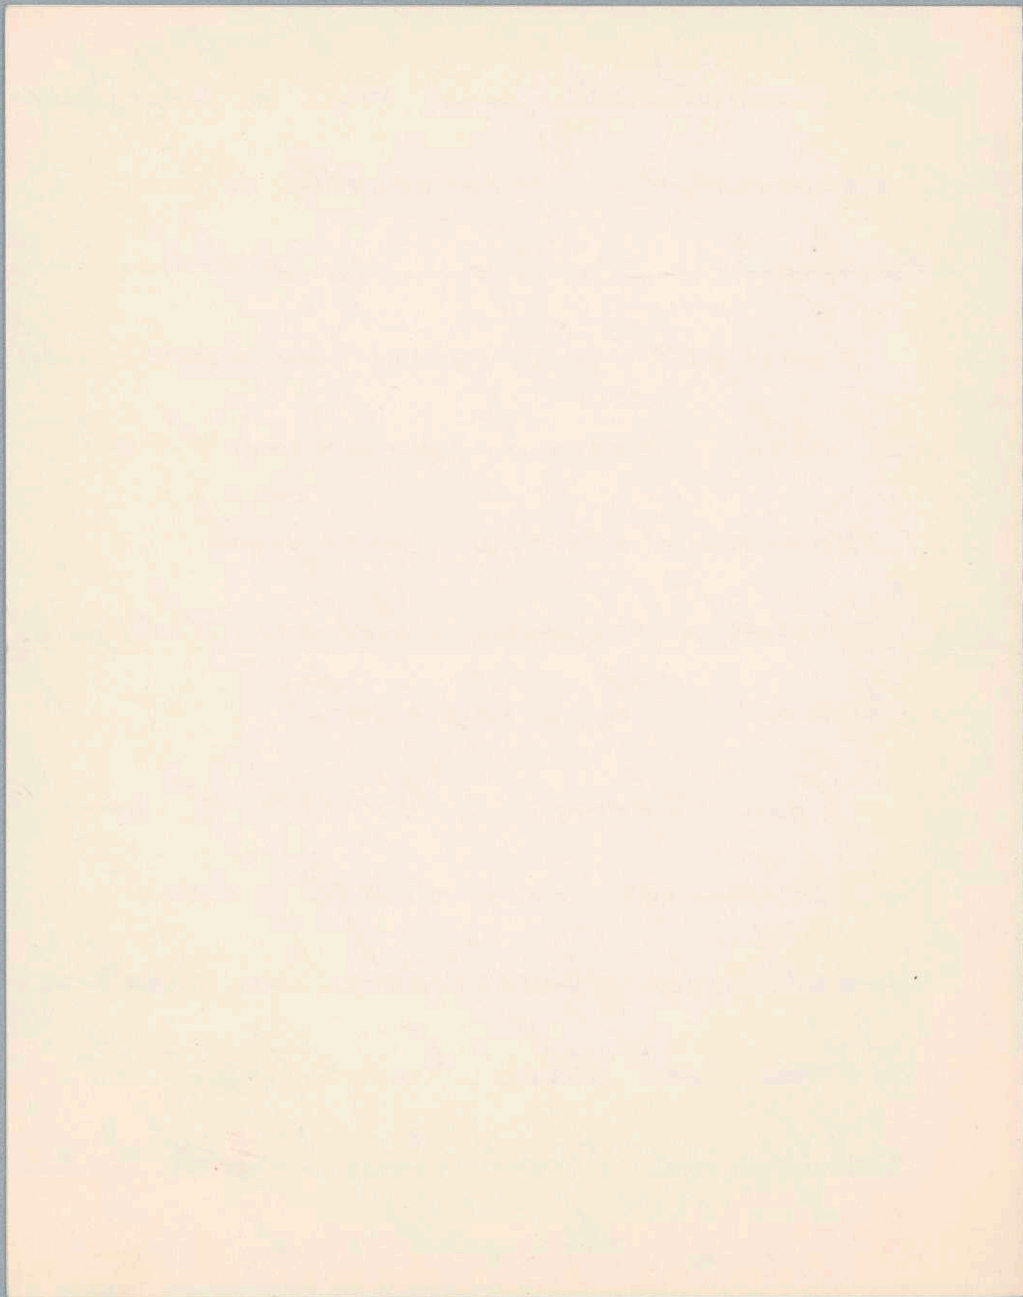

a substitute) in the Lake Erie
Seminary, Painesville, Ohio.

Subjects: - Biology and Chemistry.

Taught one year (as substitute)
in the Framingham State
Normal School. Subjects: -

Natural Science, - Botany, Chemistry,
Physics, Physiology etc.

You know, I think, of my
four and one half years
work as instructor in Paleon-
tology at the Institute. I
resigned that position to take
up my present work, that

of assistant Paleontologist on
the U. S. Geological Survey.
No Civil Service examination
for Geologist being held the
year of my arrival, I passed
the one given in March 1904,
and received my formal
appointment in May of the
same year. All my time is
given to research work in Paleon-
tology, the results of which,
owing to the nature of the
position I hold (that of assistant)
are not published over my name.

The following papers are published
over my signature, all the work
upon them having been done
outside business hours.

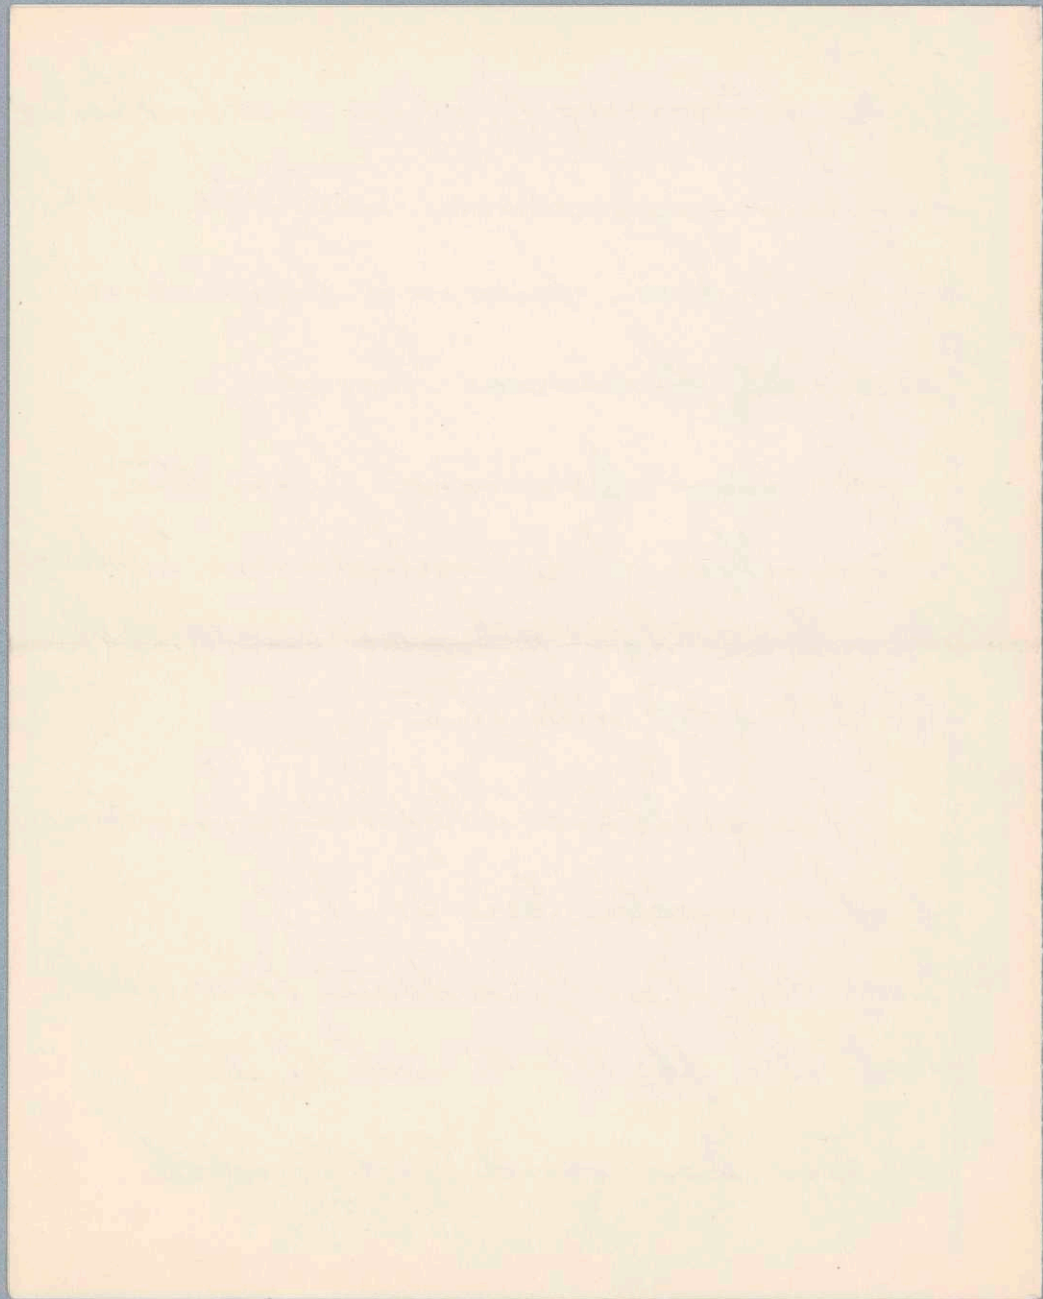

"A new Crinoid from the
Hamilton of Charleston, Indiana.
Am. Jour. Sci., 4th. ser., no 13, 1901,
pp. 397-305, with Pl. V.

Marcellus (Stafford) Limestones
of Lancaster, Erie Co., N. Y.
Bull. 49, New York State Mus. Nat.
Hist., 1901, pp. 139-181, with Pl. IX.

On New and Old Middle

Werners Brinoids; Smithsonian Miscellaneous
Publications, vol. XLVII, ¹⁹⁰⁹ pp. 67-84, Pl. XV, XVI.

Very truly yours,
Charles D. Wood.

10 Floyd St.
Dunthorpe Highlands
Nov. 7, 1906.

Dear Mrs. Richards.

The circular asking
information about publications
degrees, &c. has been received

There is nothing that I can say
in reply that is not contained
in the Card Catalogue in the
Morgan's Cheney Room

I have written as you know

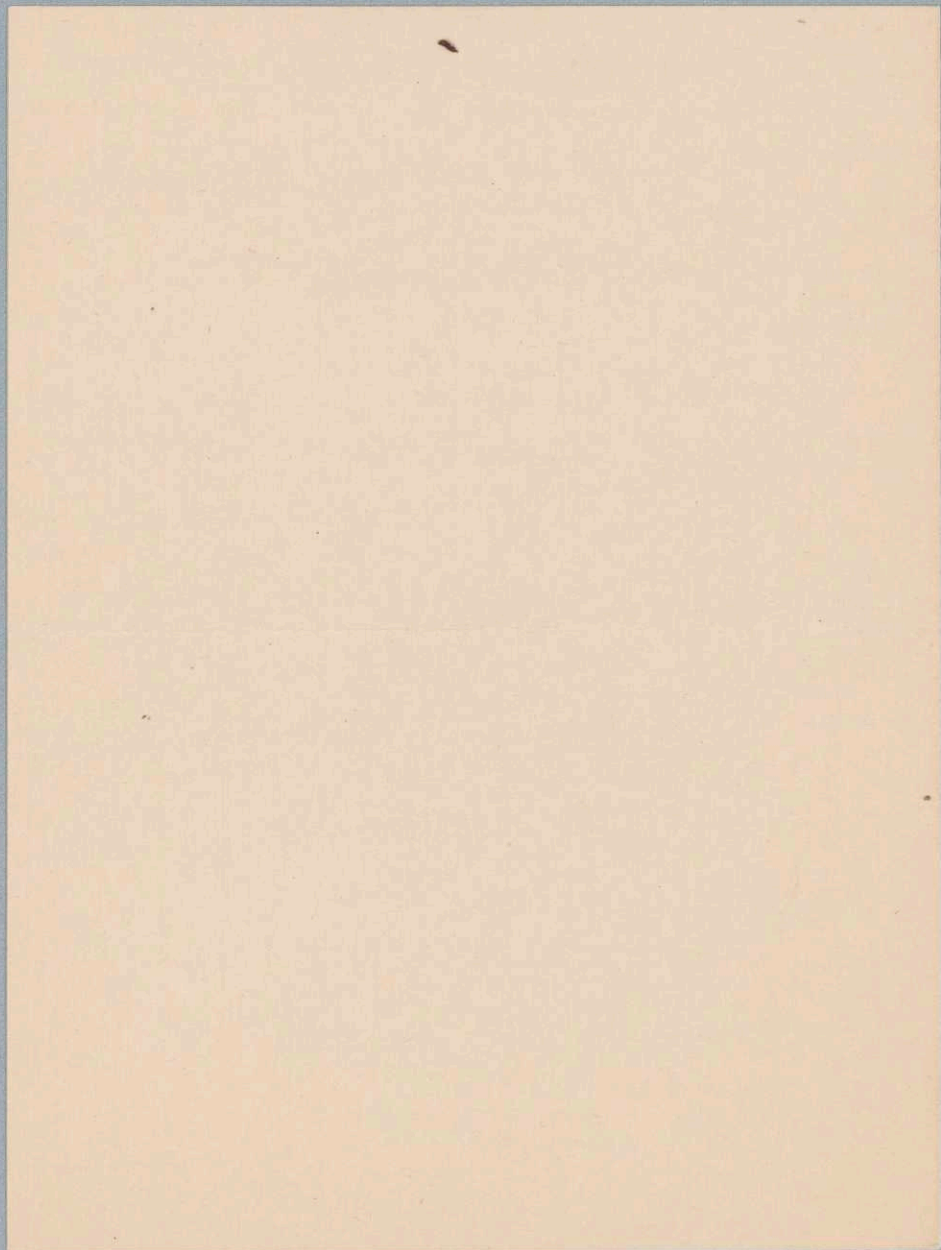

the Handbook of Invalid Cooking
and various articles published
in the Trained Nurse and
some time ago one in the
Popular Science Monthly.

I belong to various societies which
probably is of no interest in
this connection.

My name is in Who's Who, and
in the Cyclopaedia of Eminent
American Women in the Biblio

thèque Nationale. Paris, although
I do not think I merit such
honor.

Yours very truly
Henry Boland Pequinot.

2

Merry Mount Road -

Quincy.

My dear Mrs. Richards: -

The circular asking about the work of "Teck" women is at hand, and although what there is to say about myself is not interesting, I felt that I should respond to the request.

The course which I took while at the Institute was the first year Chemistry. I was at that time teaching in the Horace Mann School on Newbury Street and by hurrying from school it was possible for me to attend lectures and do the laboratory work.

In 1904 I was married and now I have a fifteen-months old boy to direct and look after. What knowledge of Chemistry I obtained has been put to the most practical use possible - that of housekeeping. The value of oxygen, the harmfulness of poisonous gases, the necessity of absolute cleanliness, accurate measurements in cooking, etc, etc, but it is the lessons of exactness which the study of Chemistry taught me which have proved the most valuable to me.

Very truly,
Martha Kincaid Mackay.

November fourth.

Reynolds Hall, Whitman College
Walla Walla, Washington

My dear Mrs Richards, -

The communication in
regards to "that some Technology
women have done" is at hand.
In reply, I would say that I have
done very little to boast of.

In 1898 I wrote an article on
the "Bacteriology of Household Pre-
serving" which was accepted by
the New England Kitchen Maga-
zine, and published in the Sep-
tember number, I think -

For the last two years, I have

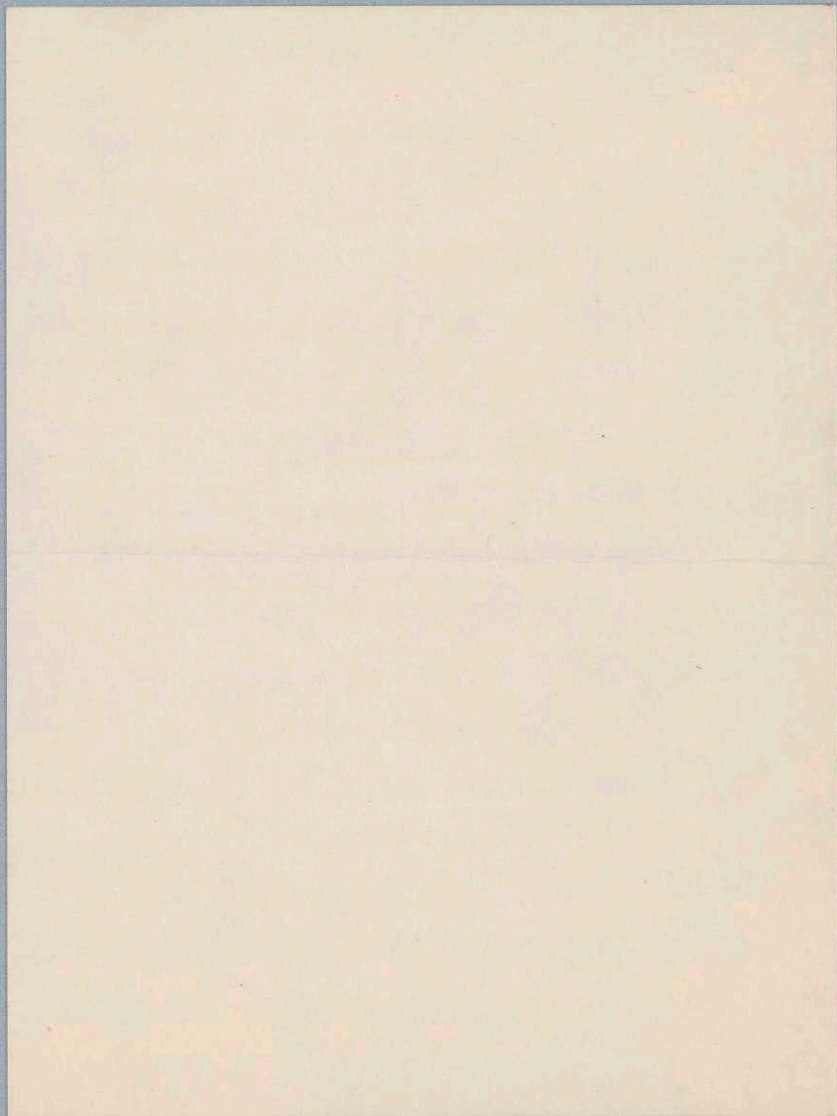

been a housekeeper in a
Back Bay family of two, with
seven maids, coachman and
second man. Though my
motive was not purely that
of a sociological study, the
experience was a good one, as
I was in the position to compre-
hend both sides of the question.
And I did what I could to
make the mistress and maids
understand each other sympat-
hetically - I am somewhat doubtful
of my success, however -
In September I came here with
my sister, Miss Helen Burr, who
has taken the duties of Dean of

Reynolds Hall, the largest of the two girls ser-
vitorias - All the girls come to Reynolds for
meals - about eighty in number - I am not
much of a printmaker - by the College, merely
exercising my rights - I had in a printing &
make a sociological study of another phase
of life -

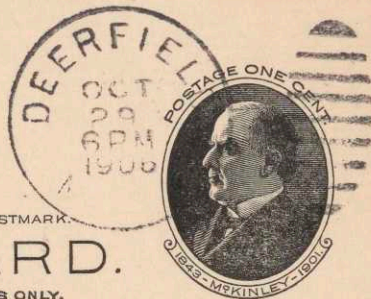

I regret that I shall not be able to attend
the dinner meeting - many of the boys of the
N. S. T. Women's Association this year always
enjoy the camaraderie of these meetings -

Sincerely yours -
N. Cecil De Buss

Dec-31st-1916-

86
Dear Mrs Richards
Oct. 29, '06
I have rec'd a circular
asking for information
as to what I have done
I think you know
what little I have
accomplished. Mr D-
is sick with a cold or
I would write a letter
I was Assistant in the
Museum of the Brit. Mus.
Nat. History from 1890 to
1904; Prof. Hyatt's asst
and several years before
1890 - I have written with
in collaboration with him
"Guide to the Study Science
Teaching VIII - Insecta"
"Chrysalis"
"Clay Concretions of the
Connecticut Valley."
"Guide to the Invertebrates
of the Dyrnastic Collection
at Mus B. P. N. H. and

THE SPACE BELOW IS FOR THE ADDRESS ONLY.

*Mrs. Ellen H. Richards
Mass Inst. Technology
Boston
Mass*

English High School,

Broadway, between Ellery and Crowbridge Sts.

Send
Cambridge, Mass. Oct. 22 1906

Dear Mrs. Richards,

I do not wonder you think me neglectful of my duties, but I will tell you the reason briefly, and you will understand better.

For the last three years I have had added to my expenses, that of keeping my niece at college, and when she went I had to cut off every extra thing, among those came my club memberships, all of which I cut off except one. This last year my mother 84 years old had a long sickness, my sister went to the hospital for operations, I had two expensive operations

and my niece had to come out of college to go to work. She has now a year & a half more & I hope then to resume all my old relations to everything, but you can see that I ought not to enjoy the luxury of giving when I am more than using my income. I am perfectly willing to say this frankly and have said it to a number of people, that I might not be misjudged.

As to the question of work, I am afraid I must be known solely by the work put into my boys & girls, there is little time for anything else. If I could only send some fine specimens of those that belong to me, I should be very glad.

Very cordially

Debra Sturkey

Wellesley College,
Wellesley, Massachusetts.

Oct. 22 - 1906 -

My dear Mr. Richards

In reply to your letter received to-day. I am sending you a copy of my recent paper on river terraces. May I also add a word of explanation as Mr. Fitzgerald and others feel that the wording of my paper is rather too modest.

The large survey map - plate - was surveyed entirely by myself - assisted only by an inexperienced rod-man - who carried the stadia. Furthermore all the plotting and drawing was done by myself.

Also the partition process of lateral movement of rivers and the resulting partition plain are in-

Wellesley College,
Wellesley, Massachusetts.

truly original with me - and
no far - geographers and geologists
such as Prof. Davis of Harvard
Dr. Gregory of Yale - have accepted
the papers as a welcome and
valuable addition to our
former knowledge -

Doubtless you know ~~the~~ I was
made Associate Prof. at Wellesley
last year - and of - geology
and mineralogy -

I visit regularly Prof. Barton at
the Teachers' School by Science
and give many public lectures.
This fall I give a course of four
at the Gardner Woman's Club - on
Origin of the Earth Development of
North America, Life History of a River

Wellesley College,
Wellesley, Massachusetts.

and the Topography of New England -
at the Manchester Institute of Arts
and Sciences, Manchester N.H.

I lecture on The Life History of
a River - - I shall also speak

at the Woman's Alliance in
Manchester. at the Georgetown -
Woman's Club. the Woman's Club

at Brattleboro' Vt.; at The
North End Union - for Mr.
Hubbard - and at other places.

I speak upon Russia, Norway
or geographic subjects.

I will apply for admission
as a member of the Boston
Branch of the Association of
Collegiate Alumnae -

Wellesley College,
Wellesley, Massachusetts.

This matter I am so situated
that I cannot help that young
woman at Tech - of whom
you wrote. While at Tech -
the only scholarship - or help
I received so far as I know
was a regular scholarship -
given to home women taking
either Geology or Biology - and
as I remember I received
it because no one else
needed it.

Very sincerely
Elizabeth F. Fisher

The Woman
Wellesley
Man

Elizabeth S. Mason - A. B. Smith 1887.

88-89 } Student Mass. Institute of

78
Report of Dr. Mary E. Jones
Vassar '82
M.D. '85

June 1882 A.B. Vassar College.

June 1887 A.M. Vassar College.

May 28, 1890 M.D. Woman's Medical College of the
New York Infirmary.

Received A.B. of Vassar June 1882 and the
following fall entered Tech (had studied math-
ematics three one year before graduating at Vassar)
and spent three years there joining the
class of '85 in the "Course of Natural History"
I think it was called Course VII

Fall of 1885 went to Philadelphia for the
study of medicine.

June 1887 Received the degree of A.M. at Vassar
During 1888 & 1889 worked in medicine in
Boston at the North End, the "Boston Dispensary" &
the "Free Hospital for Women" in Springfield St.

Fall 1889 went to New York to complete my
medical work for a degree, and was
graduated from the Woman's Medical
College of the New York Infirmary on

May 28, 1890. Submitted to practice
medicine in
city clerk May 29, 1890

1890, 1891 Practiced medicine in Boston
and worked in surgical work in the "Boston
Dispensary."

Feb. 1892 sailed for Europe and spent
nearly 2 years travelling and working in
the various Hospitals Abroad, in medicine
surgery, medical Gymnastics &c. from

Molde in Norway & Stockholm in Sweden
even as far south as Palestine and Egypt -
I worked for 6 months in Naples in the dif-
ferent hospitals, having amongst my in-
structors Drs d'Antonia, Galluzzi, Dr Amici
& Morriani, the latter being the Accoucheur
of the present Queen of Italy.

With one or two unimportant exceptions, the greatest
courtesy and kindness were shown to me and
rare opportunities for work were offered, and
marvellous to say, without one cent of expense
for the purely medical opportunities to my self.

Since returning to America, I have practiced
Medicine; been President of the Ladies' Physiological
Institute two years, where I gave lectures and
talks on Medicine, Hygiene, &c; and am at
present one of the Consulting Physicians of the
"Home for Aged People" of the "Ladies' Unity Club."

GRAYCROFT
WEST NEWTON

Jan 3rd 11

My dear Miss Richards

I have had been
a complication of work here
since your note came, so I have
only had a brief hour this
evening in which to try to
write what you were good
enough to think worth
writing and asking for.

Please suppress it - if it
is not suited to your

Yours
Julia M. Sutton

GRAYCROFT

This house offers rest with medical care and nursing to women, suffering from neurasthenia (or nervous prostration) who are in need of change of scene, quiet and freedom from responsibility.

At a distance of nine miles from Boston, having frequent communication by steam and electricity with the city, we yet have the advantages of a country life.

A fortunate choice has been made in the situation of this rest-house which is on a hill in West Newton, with wide views and fresh air.

Wide piazzas surround three sides on the ground floor. These, with two balconies on the second story, offer every opportunity for an out of door life in hammocks and reclining chairs, the open air cure being made an important feature of treatment.

While the rooms are large and homelike, and with no suggestion of an official institution about them, the house is small. This limits the number of rooms, making possible a deference to individual tastes unknown in a large sanitarium.

The medical treatment is homœopathic and we believe in the efficacy of our remedies when indicated. Realizing also that the soul forms the body we try to develop self-help and self-reliance and to give fresh courage and good cheer to discouraged women bewildered with strange sensations.

Prices moderate, varying with the room and the amount of attendance required. Liberal terms to teachers and professional women.

Reference by permission to Mrs. Mary Morton Kehew, President of the Educational and Industrial Union, 264 Boylston Street, Boston.

For further particulars address Dr. Julia M. Dutton, Otis Street, West Newton, Massachusetts, or 250 Newbury Street, Boston.

1

Nothing less than a direct request from Mrs Richards, whom we we early taught to obey, could make it seem possible that a report of our quiet work, here at West Newton among sick women, would be worthy of the attention of the Woman's Association of the Institute of Technology.

Briefly summed up my medical work has consisted of an effort to give a few teachers and other professional women, exhausted by the demands of modern life, the time to get well. Free from the strain of monetary anxiety.

In 1895 a house was taken on the Hill in West Newton and devoted to the care of Neurosthenia (or nervous prostration.)

The beds are few but they have been full most of the time since.

I will ver. like to quote from a notice of our work which appeared in the Transcript a year ago.

The attention of teachers and professional women is called to a small **REST HOUSE** in the suburbs. It is unique in that the profits desired are not in money. Two women, one a physician, have established this House. Their gain, during seven years of work, has been in the satisfaction found in restoring women to lives of usefulness. The House is not used as a refuge for old age or incompetence. The patients pay the cost of maintaining the House, as any self-respecting person must wish to do, but there are no high-salaried officers to support. The motto, written in invisible letters over the door, is the old word of justice so hard to retain in this selfish world—"From each, according to her ability, to each according to her needs."

Long before Psychotherapeutics had a name we were practicing it at Graycroft.

a Wellesley professor, who was among our fathers, once said, "this is nothing less than the making over of character."

It does take character to get well of nervous prostration. There is not always force enough to accomplish the feat, but it is a satisfaction to offer the chance.

Respectfully submitted

Julia M. Dutton

"The Benton" Covington Ky.

My dear Mrs. Richards,
your note has followed me from place to place so long that I have received it too late, I think, for you to have an answer by the fifth. However the account of my work would I fear be of little interest. I have worked at intervals and for short periods, in different architects offices, until about eighteen months ago when I went

have a successful and
enjoyable meeting of
the Association & am

yours sincerely,
Greta Gay.

Yours very truly,
James W. Smith.

abroad. I travelled a
great deal but most of
the time I spent in
northern France and in
Italy, making long stops
in the larger cities, and
visiting many of the small
towns. Besides enjoying
my trip immensely, and
benefiting by it in numerous
other ways, I feel that it
has added greatly to my
architectural appreciation
and knowledge, and will
I hope, help me in the
future with my work
which I hope to take
up soon.

Hoping that you will
