THE 1984 MIT MITES PROGRAM

JULY 2 - AUGUST 10, 1984

THE PROGRAM

The MIT MITES Program (formerly UNITE) is a rigorous six-week summer program designed to introduce and prepare minority high school students for careers in engineering or science. Eligible students are those juniors who belong to minority groups who are currently underrepresented at MIT (American Indian, Black-American, Mexican-American and Puerto Rican). The program is sponsored by the Office of Minority Education (OME) and MIT. MITES offers an in-depth, on campus exposure to engineering and science for 40 minority students who are presently juniors in high school. Students selected for the program will spend six weeks at MIT totally immersed in campus life. Classroom work centers on mathematics, physics, biology/chemistry, computer science, and English with daily assignments. The classes are geared to help students develop scientific skills in a university environment. Laboratory work emphasizes problem solving in such areas as engineering and life sciences research, design and computer science. Design contests aimed at developing student solutions to specified problems are a program highlight. Special presentations by MIT engineering and science faculty, practicing scientists, as well as field trips to industrial and laboratory sites are scheduled.

FOOD AND LODGING

All students will be housed in supervised MIT dormitories and will be provided with three meals per day at no cost. Students will also have access to campus resources including the libraries and athletic facilities.

TRANSPORTATION

Students are required to provide their own transportation to and from MIT. A limited amount of financial aid will be available to students requiring assistance in meeting travel expenses.

WHO SHOULD APPLY?

Minority students (American Indian, Black-American, Mexican-American, and Puerto Rican) who have completed their junior year of high school and have demonstrated an above average ability in high school and have a strong interest in a college education that includes mathematics and science are encouraged to apply.

Forty students will be selected as participants on the basis of having demonstrated a potential for success in an undergraduate engineering or science program.

HOW TO APPLY

Obtain an application from your high school guidance, mathematics or science department chairperson or write to MIT MITES at the address below.

Each applicant must arrange to have the following materials returned in one envelope: a) application, b) high school transcript, and c) a letter of recommendation from his or her current math teacher written on school stationery.

Each applicant will be scheduled for an interview with a member of the MIT Education Council at a site near the applicant's home. Interviews will be scheduled by the OME office and applicants will be notified by mail of the interview time and location.

DEADLINE FOR APPLYING

All applications must be received no later than April 1, 1984. All applicants will be informed of our decision by mail on or about May 1, 1984. Students selected for the program will receive more detailed instruction at that time.
