

TIME TO GIVE BLOOD

Bob Wilde of Lincoln Lab's Standards Office has his hands full these days. Bob, Lincoln's 1963 Blood Drive Chairman, with help and guidance from LL's Safety Office, is preparing Lincoln employees and staff members for what he hopes will be the best two-day blood drive Lincoln has ever had. Lincoln's blood donation center will be in Room A-162 Thursday (March 14) and Friday (March 15).

Last year only 12% of LL people gave 221 pints of blood and through the year withdrew 164 pints. Anyone in good health between the ages of 18 and 59 is eligible to give blood. Members of the Lexington Chapter of the Red Cross will be on hand to examine all prospective donors on past illnesses, anemias, etc., to make sure you can give. If they say yes, you can be assured that it is perfectly safe.

The MIT-campus Blood Drive for 1963 will be Monday (April 1) through Thursday (April 4). Chairman is Professor George B. Thomas, Jr., of the Department of Mathematics. Student Chairman is Don Faber, '64. Because parental consent is required for anyone under 21, student workers from the Technology Community Association, Alpha Phi Omega, DeMolay and various living groups are already busy at work on the student solicitations.

Remember, the blood we give is credited to an MIT Blood Bank Account from which any member of the MIT community and their immediate families may draw, provided there is blood credit in the bank.

Lincoln Blood Drive workers (l. to r.), Chairman Bob Wilde, Janet Carr (Standards Office), Charles Blackmon (Group 15) and Lou Carroll (Division II) urge LL people to sign up early.

TIME WELL SPENT

For Bruce Willard, hard work and study are paying off. Bruce, a senior accountant in Lincoln Lab's Fiscal Office (a branch of MIT's Comptroller's Office) recently passed his Certified Public Accountant exams.

"What's amazing about Bruce's achievement," says manager of Lincoln's Fiscal Office, Bob Dodd, "is that before Bruce came to MIT he had had no previous training in accounting. Now he's on his way."

Bruce started work at MIT in 1958 and studied nights at Bentley College of Accounting and Finance, graduating in 1961. He then took a year's CPA review course by correspondence from LaSalle Institute, Chicago. He is now working toward a business administration degree at Northeastern University.

Bruce has studied with the help of MIT's Tuition Assistance Plan-- a program available to all MIT employees on the 15th of the month and weekly payrolls studying job-related courses. When the program was inaugurated in January, 1960, Bruce was one of the first to enroll. Now he is one of 300 MIT employees studying under the Plan.

MIT'S STOUFFER SISTERS

Roberta and Jean Richards make up a sister team that helps keep MIT students well-fed. The sisters are Stouffer's Management Food Service Division dieticians at Baker and Burton Houses, respectively.

And, being a dietician is no small job. In addition to estimating menus, ordering food, hiring crews and supervising student waiter service, Roberta supervises some 13 people in Baker's kitchen, and Jean has 15 at Burton.

Their dad, William H. Richards, an MIT alumnus (Class of 1927) was partly responsible for the girls' interest in foods. Mr. Richards operates Veg-Acre Farms in Forestdale, Mass.

"Mmm...Mmm...", says Jean to Lewis Draffen, morning cook at Burton House.

--TT photo by Bob Lyon

Roberta came to MIT first, after her graduation from Bates College in 1959. She started in the Department of Nutrition, Food Science and Technology's flavor lab, decided she wanted to become a dietician and trained here at MIT and in Stouffer restaurants in Philadelphia, N. Y. City and Long Island.

After studying at both Bates and Cornell University, Jean immediately went to work for Stouffer, also winding up at MIT. All dieticians at MIT, Bob Wheeler (Director of Dining Service) and Head Dietician Pauline Harcovitz are Stouffer-trained and work for Stouffer at MIT. The kitchen crews around MIT, on the other hand, are all a part of MIT's Dining Service, and are employed directly by the Institute.

YOU SHOULDN'T MISS

TECH SHOW '63: "Sins and Needles," this year's student musical comedy, concentrates on chicanery and musical fun in an atmosphere of doctors and dilemmas. Tickets may be purchased in the lobby of Bldg. 10 or reserved by calling MIT Ext. 2190. Performances will be given Feb. 28 and March 1, 2, 8 and 9 at 8:30 p.m. in Kresge Auditorium. The show is written, produced and directed by MIT students, and girls from Boston-area schools are participating.

EXPLORING THE UNIVERSE: On WGBH-TV (Channel 2), Tuesday, March 5, at 8 p.m., Dave Garroway will shed 'some light on light' with Dr. Charles Townes, MIT Provost, and Dr. Banesh Hoffman, theoretical physicist and professor at Queens College. Dr. Townes will demonstrate the intensity of the light beam an optical maser generates. Dr. Hoffman, who collaborated with Einstein at the Princeton Institute for Advanced Studies, will discuss some fascinating paradoxes involving the speed of light.

MIT DAMES FASHION SHOW: MIT Dames--wives of students--will model fashions from Adel Brager Shop in Cambridge and Stork Time, Copley Sq., Boston, Monday (March 11) at 8 p.m. in

Roberta discusses luncheon meat special with Baker's Butcher Italo Brusa.

Kresge Auditorium. Tickets are \$1.00, will be on sale at the door, and proceeds go to the Cancer Research Atomic Reactor Treatment charity.

HOLIDAY MAGAZINE: The March issue of Holiday features MIT, written by Dean Brellis, a Cambridge, Mass., free-lance writer. Photography was done by Arnold Newman, one of the foremost photographers in the U.S. today.

MIT AND SCOUTING

A Boy Scout's loyalty is lasting--or so it seems around MIT. In addition to having an active chapter of the national scouting fraternity Alpha Phi Omega on campus and many MIT staff, faculty and employes involved in scouting in their hometowns, MIT also sponsors two Boy Scout units.

According to Prof. Holt Ashley of the Department of Aeronautics and Astronautics, MIT is the only institute of technology in the country doing this. The two groups--Air Explorer Squadron No. 77 and Scout Troop No. 77--hold their meetings on the MIT campus and are a part of the Cambridge Boy Scout Council.

The Air Explorer Squadron was formed in 1950 under the guidance of Prof. Ashley. It turns out that Roger Goodspeed, now of the Comptroller's Accounting Office and an assistant Scoutmaster in South Weymouth, was a Scout executive on the Cambridge Council when the Squadron started. The unit is composed of boys 14 and over who are interested in aviation. They meet every other Sunday afternoon in Bldg. 33. Advisor is Ivan Samuels, who formerly was with the Personnel Dept. at Instrumentation Lab.

The Scout Troop meets Friday evenings in Bldg. 20. This unit was organized in 1956 by Capt. Allen Wheeler, a former member of the Air Science Dept. The Troop draws younger boys from the Washington Elms and Broadway St. area in Cambridge. Scoutmaster is Dave Smith of Lincoln Lab's Group 25.

Another promoter of scouting at MIT is Eugene Chamberlain, Associate Director of Admissions and Associate Advisor to Foreign Students at MIT. Mr. Chamberlain is the Institute's representative to the Cambridge Boy Scout Council and is overseer of the two MIT-sponsored groups.

APO has been active at MIT since 1933. This spring, under the direction of John Prokopy, '64, APO will hold its annual swim program for Scout troops in Cambridge. Over the years, the APO students have instructed from 200 to 250 Scouts each spring in swimming fundamentals and water safety. Also for this spring, APO members are planning a one-day conference for Explorer Scouts from East Coast areas. The purpose is to interest them in science and engineering and they are hoping more than 2,000 will attend.

Some of APO's recent pledge projects include building a dock and enlarging the waterfront at the Norumbega Council's (Wellesley) Scout Camp in N.H. APO members have done similar work at the Cambridge Council's Scout Camp in Rindge, N.H. They also run Institute tours for Scout groups.

Many MIT students (like Dave Landowne, '63, Cambridge Troop 12) are assistant Scoutmasters for nearby troops.

MIT Freshman John Rible (ctr.) meets with Scout Troop 77 in Bldg. 20.

LIS POPULARITY HIGH

Paul E. Wood, Jr., a staff member at Lincoln Laboratory and instructor of the Lowell Institute School's spring supplementary course, entitled "Switching Circuits," had to request a larger classroom to hold all 44 registrants. Among those taking the course are MIT employes Arthur Berg of the Research Laboratory for Electronics, and Emile Boulos, Charles Greland, William Hedly, Fred Jones, Philip Lynch, Arnold Polikoff and Andrew Stewart, all from Instrumentation Lab. Tuition-free LIS, which offers two-year electrical and mechanical courses in addition to supplementary courses, is available to all people employed in industry who desire to further their technical education.

FOR SALE ETC.

GE Electric range, dirty but works, \$15, you transport. Prof. Seasholes, ext 2449.

Two beautiful matching teak end tables for sale. Call Dave Packer, ext 2929 or WA3-9073 evgs.

Baby crib, std size, exc cond w/mattress, \$15. Call MI8-3165.

Washing machine, Kenmore, 1 yr old. \$49. 266-1879.
