

A NEW NAME

Alfred P. Sloan, Jr., Honorary Chairman of the Board of the General Motors Corporation, was honored by the Corporation last week when the School of Industrial Management was re-named the Alfred P. Sloan School of Management.

Mr. Sloan, who graduated from the Institute in 1895 and has been a member of the Corporation since 1926, was an honored guest at a Faculty Club luncheon of the Corporation, where the announcement was made. He has long been a benefactor of the Institute and the management school. The Sloan School of Management is the first of our five schools to bear the name of an individual.

Architect's model of the Grover M. Hermann Building

A NEW BUILDING

A gift of \$1,500,000 by Grover M. Hermann, Chairman of the Board of Directors of the Martin Marietta Corporation, has been made to MIT to make possible expansion of the Sloan School and related facilities. An anonymous gift of \$500,000 has been added to Mr. Hermann's gift to be used for the same purpose.

Mr. Hermann's gift and the anonymous gift associated with it have enabled MIT to plan for the future needs of the Sloan School of Management. The first step is construction of a new building for social sciences and management research, to be called the Grover M. Hermann Building, on a site immediately adjacent to the Alfred P. Sloan Building. Other support for the new building, which is costing \$3,000,000, has been provided by a gift of \$1,000,000 from Mr. Sloan and by a \$1,000,000 research facilities grant from the National Science Foundation. Included as later steps in the development of the east end of the campus are residence towers for married graduate students.

Caissons for the Hermann Building foundation are going down now. It will be constructed of sand-blasted, reinforced architectural concrete. When completed, near the fall of 1965, the four-story structure will be connected to the Sloan Building by a third floor bridge. A raised plaza on Wadsworth Street side will provide access to both buildings, and later will be extended toward Main Street. Beneath the plaza will be underground parking facilities. The building will be completely air conditioned and will have fixed plate glass windows.

Designer for the new building is Prof. Eduardo Catalano (Architecture) in association with Robert Brannen and Paul Shimamoto.

Librarians Reay Howie (left) and Katharine Murphy

ROTCH REVAMPED

Michaelangelo's David, the massive sculpture on Rotch Library (Arch. and Planning) counter, is waiting for a new pedestal. It was moved between semesters when a remarkable job of renovation was done in eight days.

Every one of the 50,000 books in the collection was stacked on the floor while new shelves were installed, a slide room built, and a current periodical browsing area created.

The job was finished in an all-night session, and now Rotch is brighter and more spacious than ever before.

WHERE CREDIT IS DUE

MIT's Credit Union is close to a \$3,000,000 business. Among its assets are the hard-working members who keep things running smoothly. At their 24th annual meeting in January, CU members elected a new board of directors: Joseph O'Connor (Instrumentation Personnel), president; Ed Dillon (DSR), vice president; Philip Keohan (Accounting), treasurer; Jack Karle (Nutrition), secretary; Maxine Phinney (School of Engineering), Willard Mosher (Magnet Lab), Herbert Arboe (Lincoln), Paul Smith (RLE) and Kenneth Campbell (Aerophysics). New credit committee is: Jerry Callahan (Personnel), Ed Cox (Magnet Lab), Jim Cronin, (Accounting), chairman, John MacLean (RLE) and Bob Ragusa (Accounting). On the supervisory committee: Joe Cullinan (Accounting), Wendell Derry (DSR), Esther Olson (Physical Plant).

The flourishing Credit Union has also announced a new dividend rate of 4 1/4 percent annually to be paid on a semi-annual basis. Rate of interest on loans is about the lowest possible for personal loans -- .65 percent per month on the unpaid balance. Nearly 5,000 people belong now, and new members are welcomed to CU. Any of the board members above will be glad to answer questions, or contact the Credit Union Office, Room 14-0631, Extension 2844.

Mildred King (Medical) chats with TCA's Jim Giffin. At left: Prof. Goldblith, Eric Spencer

BANKING ON BLOOD

It's time to give a pint of blood. According to the Cambridge Red Cross, MIT has the best record of any school in the area for blood drive contributions. Our aim this year is to do better than ever.

The annual blood drive will be held in Kresge from March 23-26, and the chairman is Prof. Samuel A. Goldblith of the Department of Nutrition and Food Science. James Giffin of TCA is student chairman.

Lincoln's campaign will be held on March 30 and 31 in Room A-166 under the chairmanship of safety engineer Eric Spencer.

As in the past, appointments for blood donors will be set up at 15 minute intervals. Soon department and lab solicitors will contact people to make appointments. As Dr. Seeler's letter (distributed with this issue of Tech Talk) notes, nearly everyone in good health between 18 and 59 can donate blood. Red Cross doctors will not allow anyone to give blood if it might be dangerous for him.

Because MIT's record with the Red Cross is so good, all members of the Institute are

covered by the blood bank program, whether or not they donate. It is also assured that our immediate families (parents, grandparents, brothers, sisters, wife or husband and children) are covered, too. Besides coverage through regional centers, Red Cross can exchange credits in other places, so blood is available for our loved ones in most all parts of the country.

As Chairman Goldblith puts it, "Let's all pitch in by taking a few minutes off for a painless procedure. Greet your department or lab solicitor with a 'yes' you are willing to help yourself, your family and your fellow employees by assuring adequate and immediate availability of blood in times of emergency."

Tim Curran mans microscope

METTLE FOR METAL

Timothy Curran (Metallurgy) hates to admit it, but last year, working nights, he built his ranch house in Hanson in six months, and lost 35 pounds doing it. He approaches most all projects in the same way.

A technician who does electron microscopy, Tim Curran is in the high temperature metals group with Prof. Nicholas Grant, Prof. Arthur Mullendore, Dr. Bill Geissen and nearly twenty Ph.D. students. Their wide span of research includes studies of metal deformation, high temperature alloys, structures of intermetallic compounds and structures formed when molten droplets are shot against thin films of copper. Once in 1961 they were asked to analyze a fragment of Sputnik IV which had dropped on the main street of Manitowoc, Wisc.

Tim describes photographs of the structures of metal samples as "fantastic mosaics." He is probably looking at them from an artistic point of view, since he's also an oil painter whose works are in the homes of many MIT colleagues.

When Tim graduated from Cambridge Latin, he got a job with a brokerage firm in Boston. In the Coast Guard he worked on radar aboard a weather ship stationed in mid-Atlantic; later served on an icebreaker above the Arctic Circle. In 1955 he came to MIT. Associates claim that, in addition to his technical competence, Tim is unsurpassed as raconteur and mime. Another of his interests is modern jazz. He plays piano and drums. When Tim and his cronies get together in Walker Memorial Lounge, things really swing.

BUGGED

MIT has its own Beatles. Campaigning for their freshman VP candidate ("head in the clouds... feet on the ground ... a man of infinite stature"), they have played to a full house in Building 10 lobby with enthusiastic accompaniment of guitar and eggbeater on wastebasket.

Elected UAP: William Samuels '65, son of Howard J. Samuels '41 who was a candidate for the Democratic gubernatorial nomination in New York in 1962.

OFFICE OF THE MEDICAL DIRECTOR
HOMBERG MEMORIAL INFIRMARY

CAMBRIDGE 39, MASSACHUSETTS

March 11, 1964

To: The M.I.T. Community

Subject: 1964 Blood Drive

The annual M.I.T. Blood Drive will be held in Kresge Auditorium March 23 - 26. I wish to urge you to contribute blood if at all possible. A successful drive will guarantee that any member of the M.I.T. Community will have blood available for himself or his dependents if a medical emergency should occur. The Massachusetts General Hospital is requiring that the first pint of blood and every fifth pint thereafter be a fresh blood donation at their blood bank. Our Blood Drive cannot provide such fresh donations, but otherwise will provide the blood requirements at this hospital.

Almost everyone from the age of 18 through 59 can give blood several times a year without endangering his health. The Blood Drive last year was very successful but we must try to do even better this year.

Albert O. Seeler

Albert O. Seeler, M.D.
Medical Director
