

Computation Center staff member Robert De Prisco at one of increasing number of remote consoles.

NEW GENERATION

Continuing a tradition of cooperation, MIT and IBM last week announced a new \$6,000,000 computer will be installed in the Computation Center. Within the next year and a half the 7094 will be replaced by the IBM System/360, Model 67, a time-sharing machine approximately 15 times as powerful as the present one. IBM not only will install the new computer, but will contribute toward the cost of maintaining and operating it.

The Computation Center has contributed to many of the most important advances in computer technology since it began nine years ago. It pioneered the system of time-sharing, by which the computer can switch from one problem to another so rapidly that to each person it appears as if he alone were using the system. The present computer can accommodate 30 such users at once; the System/360 will be able to handle more than 200.

Computer consoles, resembling ordinary electric typewriters, are located at

remote terminals throughout the Institute and are connected to the Computation Center by telephone lines. Thus, a researcher or student can go to a console convenient for him and run his program without ever going to the Computation Center.

SUPER COOP

The maroon and gold truck shuttles steadily back and forth carrying stock from the Technology Store to the new Coop on the street floor of the Student Center. Actually, the Coop is going home, for it began in the old Tech Block when MIT moved to Cambridge in 1916. Except for familiar faces and merchandise, the new Coop bears little resemblance to the crowded Technology Store that has housed it since 1937. Carpeted floors and wide aisles invite book and record browsing; mirrored pillars encourage trying things on in the clothing departments.

Occupying four times as much floor space as before, all departments in the Coop will be expanded and some new ones will be added. For the first time there will be a complete women's shop, similar to the one at the Harvard Square Store. Its elegant fitting rooms are approached through a gold-leaf doorway. In addition, a full scale drug department and an optical shop will make their appearance.

Nearly half the store will be occupied by book and record departments. Already large shipments of textbooks are arriving, being marked and stacked for registration day, when for

Book section of new Coop being stocked for the opening next month.

the first time, books and students can be matched in a reasonably orderly fashion. Large selections of paperbacks, general hard-bound books and records will be displayed to make self-selection easy, and a desk for special orders promises speedily-filled requests.

A spacious appliance and gift section will make its appearance along walnut paneled walls, the photography department will have room to display and demonstrate its wares, and stationery and greeting cards will have much larger assortments from which to choose.

A special order section in the cashier's office will handle any desired items not regularly stocked.

The Lobby Store, separate from the main Coop, will remain open in the evenings, filling last-minute needs like paper, toothpaste, aspirin and candy. The barbershop with eight chairs --an increase of two--will no longer open to the main store, but will be on the lower level.

Membership in the Coop is available to all who work at MIT, in addition to students, and the new store will certainly invite attention when it opens around the first of September.

IN TUITION

Beginning this fall, tuition assistance offered by the Institute will be available to more people and will cover more educational costs than ever before. For the first time, full-time members of the research and administrative staff will be eligible to receive tuition assistance

for approved work-related courses. Also, the Institute will reimburse staff members and employees up to 75% of tuition and allowable costs, to a maximum of \$300 per calendar year, for successfully completed courses. Revised descriptions of the Tuition Assistance Plan and revised application forms soon will be available from supervisors or from the Office of Personnel Relations.

EVERY DRIBBLE BIT HURTS

All over the Institute venerable fans have returned from years of storage in dusty closets to replace, as best they can, the now forbidden waterwasting type air conditioners. Except for small, room-size air conditioners and large cooling plants using re-circulated water, all water-cooled systems New glass pipes in Life Sciences are needed only for comfort are being turned off until

reminders to save water.

MDC water restrictions are removed. Water-cooled systems needed for research facilities affecting the national security are still permitted, but may be curtailed if the water shortage continues.

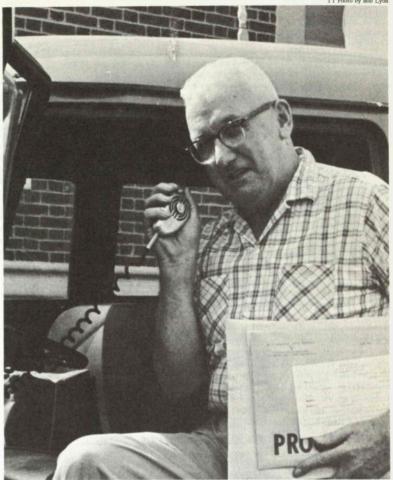

Please get in touch with Mr. Barraford (Ext. 756) or Mr. Webber (Ext. 748) for questions and information about water restrictions which may affect your work, and avoid wasting a single drop.

MESSENGER EMERITUS

"Oh, I'll keep busy," Frank Conlan said when he retired as a Graphic Arts messenger last week. On his immediate list of things to do is a top-to-bottom redecorating job on his house, wallpapering, painting and refinishing floors.

Spare time has never meant idle time to Frank. For years he has been a meat cutter for a packing house on Friday nights, rising early Saturday morning to work at the egg market in Faneuil Hall. In off hours at home he busies himself turning out woodworking novelties.

Frank was a member of the Boston Police Department for 42 years before his first retirement. While there he headed up a 1,000 member division of junior police, supervising organized sports and sightseeing trips throughout the Boston area. Once on a hike through the Museum of Fine Arts a missing boy was found sound asleep in a mummy case.

Signing off at Graphic Arts: Frank Conlan.

When he first came to MIT seven years ago, Frank was the only Graphic Arts messenger. He covered the whole campus on foot, sometimes hiking as much as 19 miles in a day. Now three messengers cover three separate routes by truck. In the five years since Frank has been motorized, he's gained a pound.

In the evenings Frank frequently is found as far away as Pittsfield or Holyoke participating in meetings and social occasions of the 104th Yankee Division Veterans Association, of which he is an officer. He went with General Pershing to fight in the Mexican revolution in 1916, then spent about three years in France during World War I, returning with the Croix de Guerre, a Purple Heart and a Silver Star.

Sightseeing around Boston and frequent trips to northern New England and Canada have made Frank a "walking map," a title he intends to uphold in retirement. "You have to keep going or you'll get old," he says.

WESTGATE WINNERS

The Westgate Athletic Club softball team won the MIT Summer Softball League competition when the season closed August 12. Maintenance (Ed Nordstrom, Manager) and Westgate (Ed Pollard, Manager) were tied for first place at the end of the regular schedule. Westgate won the ensuing playoff, 10 to 5, to take the league championship, then went on to win three contested playoff games to become playoff champion as well. All together, Westgate won 14 games, lost one, and scored 209 runs to 60 for their opponents from the other eleven teams in the league.

FOR SALE, ETC.

Corona Zephyr port typewriter, \$10; Columbia record player, \$15; 4-drw wooden desk, \$15. Call Ed Caress, ext 454l or 868-9133.

3-piece home metal workshop: lathe, shaper & miller, many extras. First \$1200 takes the lot. EX 5-4235 evgs.

US and misc foreign coins, some in folders, gd start for collector, circulated to fine cond, reas. Also, wanted by collector: stamps from foreign mail, will buy or trade with other collectors. Bob, ext 3868.

Brutal Beast class 14' sailboat, wonderful for youngsters & oldsters, \$95. Bob Sherwood, ext 6573.

Must sell: dbl bed, 5-drw chest, desk, bookcase, etc. Call 324-8079.

Magnavox hi fi, exc sound, like new, table/floor model, leather top, \$34, will haggle. Mark, ext 30557.

Blue silk sofa, with slipcovers, reasonable, BE 2-0959.

Brand new fiberglas cover for compact car, \$15. Judy, ext 737.

Skinner (baby) box with repurchase option, \$50. VO 2-3844. Tonneau cover for '58 Chevy convert. Joe Wolf, ext 3772.

Brand new carry case for all new Polaroid colorpack cameras. List \$10.50, will sell for \$5. Don Dewey, ext 82-201

Solid maple rocker, will haggle, moving, must sell. Call 491-4125.

Brown studio couch, almost new, sleeps 2, \$35. Call ext 3566 or 265-7603.

s ski boots, Rogg, size 7 1/2 M, exc cond. Orig \$100, now \$15. Ski poles, \$3; 2 ski racks for VW, \$4, assorted lift tickets thrown in free. E. Sullivan, ext 422 Linc

Marimekko dress, sleeveless, dk brown print, size 8-10, never worn. Mary, ext 2436.

3 Free kittens, 9 weeks old. Ext 2758, Betty McCarroll.

Leaving country, must sell household furn & appliances. Elaine, ext 5496 or 547-8518 evgs.

uggage, brand new, still in cartons. Retail \$86, asking \$70. Also 8 cu ft Servel Mrs. Ryan, 762-6095. gas refrig, \$35. Mrs. Ryan,

Roberts 770 tape recorder with crossfield heads, 2 AR3 spkrs, unused. Call 254-7541.

Royal port typewriter, \$35; butterfly chair, \$4; sectional sofa, \$25; baby carriage, \$14; chest, \$10; window fan \$10, scales \$2; '62 VW, 35,000 mi, \$900 or best offer. KI 7-0238.

2 6.00xl5 tires and rims, like new; 2 6.00xl5 snow tires and rims, \$35 for the lot. Ext 5274.

Port sewing mach, \$30; K table, 5 chairs, \$10; dresser, \$6. Call 547-8919.

House lots, 1 acre, West Andover. Ext. 5434.

4 mc/s Heathkit scope with probe. Bob Norander, 893-9200, ext 2209.

3 beds, 2 bureaus, couch, coffee table, side table, bar, fireplace set. Maggie, ext 2661.

Maytag dryer, electric, like new, sell \$50 or trade for gas dryer. Ext 2489.

Coins for sale, US, Canadian, British. Alan Kessler, ext 5853 Linc.

Remington office model typewriter, gd cond. Ext 4061 or 625-1762 evgs.

Man's bike, gd cond, \$25. Cameron Smith, TR 6-8996 evgs

Upright piano, gd cond, \$40. Ext 5275 or UN 8-9766.

m cleaner, attachments, \$25; coffee maker, new, \$10; Polaroid camera, access, bag. \$15.

Taylor-tot deluxe stroller, \$15. Kiddie-koop crib & matt, \$25, both exc cond. H. Curtis, ext 6116.

Man's 10-spd bicycle, 27xl 1/4 tires, exc cond, best reas offer. Douglas, ext 3584.

Single bed, with box spring and matt, exc cond, \$30. L. Brekka, ext 8049 or 862-602l, ext 49.

Small clothes dryer, brand new. WA 4-7914.

Transcription turntable, viscous damped tone arm with diamond cartridge, EICO, HFT90, FM tuner all in table top cab; Pioneer PAX 12C speaker in Gately corner horn, all gd cond, \$100. Fisher, ext 3968.

2 large wooden desks, suitable for filing (6 drw), \$25 or best offer. Call 547-3064.

Hercules 3 spd lt weight racer bike, \$25. Also wanted: riders to Calif in Sept, any route. Stoecker, ext 2888.

Metal K cab; man's golf clubs; Wharfedale, Garrard components, asorted drapes. Call 782-9864.

Dbl bed, spring & matt, gd cond, \$25. Call MI 3-3843.

Winchester national match model 70, 30-06 with case & 200 rounds ammo, shooting coat & glove, \$125. Call ext 5363 Linc or 369-6646.

Brand new f/1.2 Canon Pellix, \$325 or best offer. Dihek, 868-9593 evgs.

Free: new tan cat collar, size 6. Call ext 5391.

Owens Seaskiff cruiser, 1961, 25', sleeps 4, 185 hp, exc cond, always on fresh water, \$3,795. Ext 30317.

Regis German shepherd puppy, ext 30202 or 256-7582.

Man's bike, 4 spd, generator & light; girl's bike; Corona Zephyr port typewriter, \$20 each. Bdb, ext 3772.

K table with 6 chairs, \$30; 8x10 brown tweed reversible rug & cushion, \$25; chest, \$25. Call 862-4511.

Hickory skis, 6'9", \$10; Norelco shaver used 1 month, \$8. Call 442-2887 evgs.

German Olikoff string bass with case, \$220. R. Metzinger, ext 30437.

12' Lapstrake runabout boat, 15 hp Evinrude motor & trailer, all in gd running cond, \$200. WA 6-2781.

Blue sofa, 80", exc cond. Carol, ext 4936 or 762-1126 evgs.

Beautiful blue and white English style baby carriage; also car bed, both nearly new, both for \$33. Call 354-5496.

16' Sniper sailboat, good daysailer, \$395. Call 523-4668 evgs.

HH Scott LT 10 FM tuner, Mux adaptor, Garrard signature 400 changer with stereo diamond stylus, dual channel all trans 20w amp, 2 RJ sandlewood encs with panasonic 8 PWI spkrs, \$150. Fisher, ext 3968.

Complete dbl bed, dressers, desk, sofa, chairs, rugs, K cab, curtains, shades. Call ext 5939 or 354-1028.

Citizen band equipment, 2-way radios for sale. Ken, ext 30541.

13" rim for Falcon or Comet. Lou Goldish, ext 3584.

Dressmaking, alterations, invisible mending, etc. Call 625-0539.

Modern style desk with formica top, \$19. Call 924-3707. Slide ruler, K&E "log log decitrig," 1 yr old, \$20. David, ext 2250.

AMERICAN ROULETTE

The 1965 edition of Accident Facts, compiled by the National Safety Council, devotes considerable space to motor vehicle accidents. Some arresting statistics selected from this publication show that 535 persons died during the 1964 three-day Labor Day holiday. Within the following 12 months, 180 more deaths were directly attributable to injuries sustained during this same period, bringing the final total to 715. Only the Fourth of July and the Christmas holidays exceeded this figure during 1964.

Last year's total motor vehicle accident death toll was 47,700, of which 8,950 involved pedestrians, 24,050 resulted from collisions and 14,600 resulted from non-collision type accidents such as overturning or running off roadways. Only 100 involved collisions with animals, street cars and animal drawn vehicles.

Since nearly two-thirds of all accidental deaths away from work arise out of motor vehicle accidents, you may want to brush up on your driving techniques next Monday evening.

IF AT FIRST YOU DON'T SUCCEED...

The first run of the National Driver's Test on CBS-TV last spring was a smashing success (no pun intended). An estimated 26,000,000 participated in the original showing. In response to a great demand from the public, the test will be shown again on Monday, August 30, at 10 p.m. E.D.T. If you missed the original test and heard everyone talking about it, or if you would like a chance to improve your score (most were lower than many people care to admit), here's your chance.

The enclosed form is the official test that will be shown on TV. Additional copies for other drivers in your family are available in the Safety Office. We thought it might be interesting to see how MIT drivers compare with the rest of those taking the test. Please mark your anonymous score sheets (M)ale or (F)emale and send them by interdepartmental mail to the Safety Office (MIT, E19-251; Lincoln A 218). A later issue of Safe Talk will report the scores.

COLD BLAST

9.8

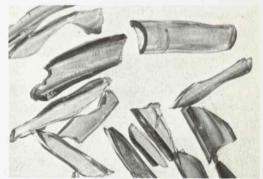

43

-

739

A recent incident illustrates the importance of using the proper materials and equipment for cryogenic operations.

An experimental dewar filled with liquid helium was being drained at the conclusion of the experiment by means of a metal tube with soft plastic tubing attached to it. When all the liquid helium was drained, the experimenter decided to flush the system with gas. When the gas at room temperature contacted the hose at liquid

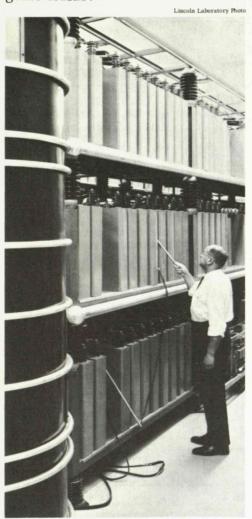

LL Photo by Roy Mitchell

Shattered plastic tubing

helium temperature (-453.8° F.), the hose violently disintegrated, sending sharp slivers flying all over the laboratory area. While the hose is normally soft and pliable, it becomes very much like glass when frozen solid by cryogenic fluids, presenting a considerable hazard

to personnel. It is believed that a thermal shock from the warm gas contacting the cold tubing caused it to react in this violent manner.

A preferred material for this use is gum rubber tubing which does not shatter as violently as plastic. It is also important to remember to wear eye protection when working with cryogenic fluids.

Mil Leavy, assistant in Lincoln Group 31, using hand held short-circuiting bar.

SHOCKING

All high-grade capacitors and, in particular, large-energy storage capacitors, as used in pulsed capacitor banks, will recover a considerable proportion of the original charging energy if left on open circuit after discharge. Experience at Culham Laboratory has shown that recovery may be as much as 10% of the original voltage, and a 30-kv capacitor may build up to 2 or 3 kv in 10 minutes. Further, dangerous voltages can build up on open-circuited high-voltage capacitors over a period of many months after they have been discharged.

This phenomena is known either as the "residual effect," "dielectric hysteresis," or "dielectric absorption" effect and a capacitor is said to have an "absorptive capacity." The mechanism of charge is complex.

It has been found that a discharge of energy exceeding 10 joules into the human body can be hazardous to life, while 1/4 joule gives a heavy shock. 10 joules would be obtained by complete discharge of a capacitor charged as in the following table:

It is essential that each spare or disconnected capacitor should be kept individually short-circuited by a robust connection when not in use.

It should also be remembered that "new" capacitors have already been energized for test purposes, and should also be kept short-circuited when stored. Capacitors built into equipment which is not in use must be similarly short-

circuited individually, otherwise, hazard may exist when they are connected in series, or if there is a circuit fault on a bank of parallel connected capacitors.

It is recommended that all such capacitors should carry a label adjacent to their terminals, e.g.: 'WARNING: Keep short-circuited when not in use.''*

At Lincoln Laboratory's Haystack Hill Site, the energy storage bank is composed of three decks, each consisting of 124 capacitors rated at 1.68μ F each at 40 kv, which may be connected in various configurations. Thus $625\,\mu$ F at 40 kv may be obtained with all decks in parallel, 70μ F at 120 kv with all decks in series, and 156μ F with a series-parallel combination of decks. The capacitor bank is designed with mechanical short-circuiting bars, which discharge the capacitors whenever the system is de-energized. In addition, there are hand held shorting bars which are used before anyone works on the system.

FIND OUT HOW GOOD A DRIVER YOU REALLY ARE

Because of unprecedented public response Shell Oil Company is sponsoring a repeat showing of

THE NATIONAL DRIVERS TEST

Monday, August 30, 10-11 PM EDT over the CBS Network.

Over 32 million people tuned in for this revealing Test when the first home audience participation show in TV history ran before last Memorial Day.

Millions more missed it. And many want to try to improve their first-time scores, and, more importantly, their driving skills. For them—and for you—the Test will be run again before the Labor Day weekend.

See high-speed, head-on collisions develop (you are the driver!) and judge how best to avoid them.

Drive down a village street filled with potential traffic hazards—how many can you spot?

Compare your answers with those of a studio audience of motorists, with friends' and family scores, and with correct answers provided by law and expert drivers.

Use this Official Test Form to find out how good a driver you really are—right in your own living room on August 30!
