SUBJECT: BI-WEEKLY REPORT, Project 6751, November 10, 1950

To: J. W. Forrester

1.0 GENERAL

(J. D. Porter)

Our letter to Dr. T. V. Moore of the Standard Oil Development Company requesting further pertinent information on the oil production problem was mailed out on November 2, 1950. It is hoped that this information will include an explicit statement of the method of solution which is to be programmed.

In the meantime, I am continuing to study the reports on hand and to investigate general methods for solving partial differential equations together with estimates of the rate of convergence of various iterative types of numerical methods.
