Division 6 - Lincoln Laboratory
Massachusetts Institute of Technology
Cambridge 39, Massachusetts

SUBJECT: COMPONENTS FOR XD-1
To: Electronics Components Sub-committee
From: C. W. Watt, Co-chairman
Date: August 11, 1953

In the "Preliminary Report of Action at ECSC Meeting, July 21 and 22," a memo from Paine, dated July 23, a request for clarification of the procurement of components for XD-1 was expressed in paragraph 7.

Let it be clearly understood by everyone that XD-1 must be built of the most reliable components obtainable. To implement this, the Components Sub-committee must expect to advise IBM procurement people on the specification and purchase of components over the next few months. Any deviation from the use of the highest quality components in XD-1 must be specifically approved by the Central Standards Committee.
