The first item discussed on the agenda was GFI Monitor Equipment for XD-1 and the Production Machine, Specification D-78-3, P-188-2. Standard GFI monitor equipment spelled out for use in auxiliary consoles will refer to D-65, P-127, Auxiliary Consoles Specifications, as amended. For console layouts future equipment lists (IM-67 and IM-102, as amended) will be used for reference. IBM-SO concurrence on the GFI monitor specifications will be given with the concurrence letter containing clarifying revisions; however, concurrence will be held up to the next meeting due to further investigation on a power problem.

D-10-2, Card Machine Input-Duplex Central, received concurrence with a small revision.

D-69, Tape Power Supply Unit for AN/FSQ-7, was reviewed. As a result, enough comments on the specification by the MIT power group warranted a further investigation and possible rewrite before concurrence.

D-65-5, P-127-2, Auxiliary Console Specifications, was reviewed and will be revised. D-65-5 and its concurrence letter will supersede and incorporate all previous D-65 documents. Both IBM and Group 61 are investigating features of the specifications.

D-25-4, Supplement 4 to the Display Console Specifications, which supersedes D-25-3, was still being investigated by both Group 61 and IBM. Concurrence was deferred again to the next concurrence meeting.

The Command Post DD Desk physical appearance will be reviewed at the next IBM-SO concurrence meeting scheduled for 1 June 1955.
