Memo to All Guards Room

Hood Building Guard Center

Number to be called every Hour, at Twenty-Five
Minutes after the Hour; - 2370.

If busy 2441, 2442, 2443. Ki. 7-6900

First call At 6.25 P.M. Last Call 7.25 A.M.

from Room

(Hood in Desk Book - WSE Rogers)

11-19-48

BARTA BUILDING SECURITY ALARM SYSTEM

The Security Alarm System consists of two separate circuits. One circuit lights a specific pilot light while the other sounds an audio tone on the public address system. Two micro-switches in each door make and break simultaneously when the door is opened. The use of micro-switches was decided upon to insure complete closing and latching of each door.

INSTRUCTIONS FOR OPERATION OF THE SECURITY ALARM SYSTEM

There are 10 pilot lights and 10 toggle switches across the top of the control panel. The first 8 lights and switches, counting from left to right, correspond to the 8 outside doors. The last two are spares and have no connection with the system at present. Each light, and the switch directly beneath it, is connected to a specific door.

When an outside door is opened, the pilot light corresponding to that door will light, and an audio tone will be heard on the public address system.

AT THAT TIME THERE MAY BE UNAUTHORIZED PERSONNEL IN THE BUILDING !!

In order to determine which door has been opened refer to chart. (LOCATION)

When the door which has been opened is closed, the audio tone will stop but the light referring to the opened door will remain lighted.

To put out the light after the door has been closed, press the reset button in the center of the panel.

(OVER)

From _____ Room _____

First call At 6.25 P.M. Last call 7.25 A.M.
 If busy 2441, 2442, 2443. K: 7-6900

Memo to AllGuards Room _____
 Hood Building Guard Center

If the door is closed but not LATCHED, pressing the reset button will not put out the light.

EACH DOOR MUST BE LATCHED!!

The normal position for the switches under the pilot lights is down. When a switch is in the up position it is possible to open the outside door corresponding to that switch and not sound the audio tone.

THIS DOES NOT AFFECT THE OPERATION OF THE PILOT LIGHTS.

The two switches and the pilot light in the lower left center of the panel are for the fire alarm bells.

The first switch is the general alarm switch ~~for the fire~~ ^{to sound the alarm} bells.

The pilot light signifies power to the bell transformer.

The second switch is the master or muting switch for the bells and also lights the pilot.

THE PILOT LIGHT MUST BE ON AT ALL TIMES!!

The fuse and pilot light in the lower right center are for the security alarm.

THE PILOT LIGHT MUST BE ON AT ALL TIMES!!

A special switch ^{inside the box} in the lower right hand corner makes it possible for the fire alarm bells to be rung when a door is opened instead of sounding the audio tone.

This switch is up when in the normal position.

L. W. Forbey
