Memorandum 6L-355

Page 1 of 3

Division 6 - Lincoln Laboratory
Massachusetts Institute of Technology
Lexington 73, Massachusetts

Subject: Group Leaders' Meeting - 4 August 1958

To: Group Leaders and Associate Group Leaders

From: J. C. Proctor

Date: 5 August 1958

Present: R. R. Everett, W. S. Attridge, W. J. Canty, N. L. Daggett, R. S. Fallows,
J. B. Goodenough, D. R. Israel, K. E. McVicar, W. N. Papian, J. C. Proctor,
P. Youtz and C. A. Zraket.

- Agenda:
1. Special Projects
 2. Space
 3. Air Traffic Control
 4. SAGE II Computers
 5. ESS Gap Fillers
 6. Technicians, Group 62

1. This document has been prepared for internal use only. It has not been reviewed by Office of Security Review, Department of Defense, and therefore, is not intended for public release. Further dissemination or reproduction in whole or in part of the material within this document shall not be made without the express written approval of Lincoln Laboratory (Publications Office).

2. The research reported in this document was supported jointly by the Department of the Army, the Department of the Navy, and the Department of the Air Force under Air Force Contract No. AF 19 (122)-458.

ACTION

1. Special Projects

The Director's Office requested names of any Division 6 staff members working on special projects this summer. It was concluded we have none.

Proctor will notify the Director's Office.

2. Space

SDC and Boeing have expressed a desire to send representatives to work with Group 61 on the preparation of the BOMARC B specs. This would involve 8 to 10, maybe as many as 16 people for whom we have no immediately available accommodations.

Proctor will investigate space in the SDC buildings and the Field Station.

3. Air Traffic Control

Israel reported the CHARM program approximately 80% complete. September 1 still looks like the ops date. WWI time is tight, but reliability good. Relationships with ADSID and AMB are good. A general discussion of Mode III operation was held.

4. SAGE II Computers

Lincoln should provide some means of following the development of the specifications for the IBM transistorized computers and not wait for the completed specs to be submitted for approval. It was agreed that this is important and that the appointment of a few people, probably in Group 68, as a committee to monitor the IBM effort seems the best approach.

Fallows and Zraket will discuss with IBM.

5. ESS Gap Fillers

The geographical location of the present ESS Gap Fillers is not realistic and does not permit very meaningful tests. We should not deactivate any of the sites at present. We will investigate the possibility of tying in one or more ADC sites to permit more realistic tests.

Groups 67, 64, and 21 to confer and make recommendations.

ACTION

6. Technicians, Group 62

Group 62 needs additional technicians for the SABRE job. We are entitled to additional non-staff to go with the ADSID Reserve staff slots, so this presents no problem.

Proctor to make any necessary arrangements for adjustment to the ceiling.

SIGNED

J. C. Proctor
