ACTION

1. Staff Terminations and Hirings

Everett reviewed current status of staff terminations and hiring as summarized by Group 60 for the Division.

Everett urged continued emphasis on recruiting.

2. Associate Leader Group 67

Everett announced appointment, effective 1 July, of Atridge as Associate Group Leader, Group 67.

3. IM 99B Specifications

McVicar summarized the status of IM 99B specifications which are nearly completed and which are subject to ADSID rather than 4620th ADW concurrence.

Everett scheduled a meeting 24 June to be attended by Everett, Jacobs, Brown, and Zraket to discuss system specifications and to allocate Lincoln responsibility.

A general discussion of Lincoln system specification activity followed, in which Jacobs emphasized the need for early preparation by Lincoln Laboratory of broad system specifications emphasizing system integration rather than detailed implementation.

4. McDonnell Aircraft

Daggett summarized results of Holmes' negotiations with McDonnell Aircraft for tests of F-101's, and for loan of a McDonnell engineer to work with Group 64 in the area of intercept direction.

5. SABRE

McVicar stated that Jeffery and Boyd had been assigned to SABRE and had recently met with Major Walmer of CAC&W Office -- Lincoln has accepted the responsibility for implementation of a breadboard model -- Jeffery will be ready to make a Division VI presentation within approximately one week (presentation date will be established, making allowance for McGuire dedication and 4 July holiday). Major Walmer will handle NORAD test group liaison.

Memorandum 6L-349

Page 3

Rich expressed concern about the NORAD test group load -- Everett and Jacobs observed that SABRE effort is only one of a series of test activities which will make demands upon ESS.

6. Union Negotiations

Papian commented on the status of union negotiations.

7. McGuire Dedication

Everett summarized Lincoln's plans for participation in the McGuire dedication Thursday and Friday of this week.

8. BOMARC Test Planning

Rich stated that the BOMARC test concept is ready for release to Group 68 for processing approval and release -- Boeing representative Binnegar will be assigned to Eglin -- Uddenberg will be assigned to Seattle -- Rich and Grandy will meet both representatives with Colonel Walker at Eglin next week.

Rich also reported on Grandy's visit to Kingston last Friday, commenting favorably on IBM's program which will include writing data reduction programs such as the adaption of BISEPS -- Groce is reporting temporarily to Dan Ross, but expects Ross will make decisions as needed in spite of the temporary nature of his assignment.

SIGNED

C. W. Farr
