Inscription
Design wanted Staging
Shipping address Blue-prints Received
Bill to Templets
Photos of Cartoons Mailed Put in date of installation

General Information His father, with his partner, brought out the Scientific American when it was a trivial two-sheet affair in the year 1846. It was only a few months old when he bought it and it has been in the family ever since. His father a real lover of humanity, and Mother a very lovely character.

Have not thought of any special text or emblem, but perhaps well to have an inscription as indicated below

In Memorium

Orson Desaix Munn
died 1907

Julia Augusta Munn
died 1894.

} see letter of Feb 4 for
change

Mr. Connick suggested emblem of St. John the Evangelist, the eagle and perhaps verse of the seventeenth chapter "The love wherewith Thou hast

loved ~~He~~ may be in them, and I in them."

C. J. C. suggested small cartouche with decorative eagle with the words
Mr. Munn felt most appropriate around it..

Mr. Munn replied that he likes the emblem ~~xxx~~ but was somewhat averse
to making use of any verse or motto. (~~As matter of fact~~)

Be sure to make window light enough
