General Information 10 little windows in Cathedral or antique glass. A little enrichment in pure color, such as is indicated in the border and color spots of the design. These require a painted texture to subdue the strong light. We should vary the spots of enrichment, having an interesting series throughout the group; for instance, the fleur-de-lys, the rose, the lily and the pomegranate.

* Wooden frames - \$60.00; ventilators \$60.00; Actual leaded glass - \$630.00 - making a total of \$750.00 .They to have the frames and glass set.
