General Information Panel with Angel.
The size of the pane in the window in my study (not including the leads,
which are one half inch in width) is 5 3/8" by 8 7/8". I presume the
actual size is another 8th all around under the leads. (Dr. Mitchell, Nov. 25,
1932.)
.....
The diagram on the reverse side of this page, shows the particular panel
for insertion.
