General Information Repair for Mr. Robb.
Two windows in Parish House are badly bulged at the bottom. Take them
out and straighten. Take several strings of new lead - the size of sample
Ernest has. Janitor knows workmen are coming, and will have things in
readiness - with benches to work on. Take electric soldering iron. Broken
pieces can be repaired with leads.
We can leave the piece that has an air-gun bullet through it, but if we
think there is any chance of matching this color, possible we could get
a little sample and we could find it. Otherwise, just leave it as it is.

For addresses of those to be notified as window progresses, see other side.
