General Information This chapel is about the size of the Chapel at Nazareth Hall.  
(Earlier, Mr. Maginnis liked our suggestions for about \$8000 or \$9000 for  
the entire group, with a design something like Wernersville, without the  
wide border,)  
BUT the new sketches are to be made something like the apse windows in  
Trinity College Chapel - ornamental - for \$20.00 per foot.

Note to Maginnis of Jan. 29, 1935, with sketch - "These designs in rich color  
symbolize the Grape and the Lily in a manner somewhat related to the apse  
windows of Trinity College Chapel, Washington."

For addresses of those to be notified as window progresses, see other side.
