General Information "Angel Holding Shield". ✓  
They would like to have the blue part of the shield as dark as possible,  
although we told her it should be kept light enough so that it will not  
go black.  
Note: This window frame sticks near the top. Speak to our craftsman who  
installed it, and have him loosen it (the first window).  
See photograph of previous window.  
There are Sanborn windows at either side of the altar. They fill long  
French doors. They are in very dark muddy fields, with medallions devoted  
to the Annunciation and Nativity.

For addresses of those to be notified as window progresses, see other side.
