General Information Mr. Dearing is one of the important members of the First Church in Newton, and they want a window - a small window - changed from opalescent to clear leaded glass. It is in the office of Dr. Boynton's Secretary, Miss Dunham.

Our man can look at the window in Dr. Boynton's study, in the office directly above this one, which has been changed, and the same thing id to be done to the one in Miss Dunham's Office.

Change it as spon as possible, and bill to The First Church in Newton at Mr. Dearing's authorization.

For addresses of those to be notified as window progresses, see other side.
