General Information "My idea is that with the medallion for the Chancellor's
room, are also to be four little rectangular oblong medallions that can
be set into the present shapes for the other windows in his room. They are
to suggest Spring, Summer, Fall and Winter in little birds, done in jewelled
colors like Sandwich Glass medallions.
Medallion to be worked into the metal work of the principal window.
Medallion subject: "I stood tiptoe on a little hill."

For addresses of those to be notified as window progresses, see other side.
