General Information 7 Sanctuary windows - about 5 feet wide, 18 feet high. We  
propose to put on stop beads and putty up everything in the inside -  
from \$300 to \$500.

Proceed with this work at once - one at a time, taking off the protecting  
boards as we go along. We do not have to replace them.

We are to report any further work on the windows, which we may encounter,  
as we progress with the work.

For addresses of those to be notified as window progresses, see other side.
