General Information Perhaps one of the big transept windows to be devoted to St. Peter or St. Paul. The south window is on 159th Street. This one gets a good light. The other one is almost up against a tall building, and gets very little light. In fact, all the north side is very poorly lighted; although the aisles get more light than the transept. There

There is some light amber glass in the protection glass that must be changed when we install permanent windows.
