General Information "4 vestibule windows are totally inside, being partitions of the vestibule, and hence will have no light other than the light from inside. Later I will send drawings of these windows. I feel that tan or lavender will be appropriate if in light shades, and tone in with the little windows that abut on them from the outside."

For the present,Fr.Johnson wants only the 2 doors,each containing 6 panels. ~~Father Johnson wrote: "I have decided to have the 8 little panels in the front door taken out and lead glass put in~~ — it occurs to me that these should syncretise with the other work. Of course as the idea would be to give light to the vestibule, they would be most likely of very light-yielding tints."(8/5/46 - They are going to have the small rectangular groups,with blues in place of the lavender.)

Refer *to* designs for other windows there.

For addresses of those to be notified as window progresses, see other side.

6 squares each door.

When other vestibule openings come up — see report of August 5, 1946.
