General Information Floor plan on #3573.

These have 1" horizontal bars in the protection glass, half way in the space above the vents.

All Phillips sizes are full 1/2" stops.

Light and brilliance is essential.

Father Dillon would like something in the style of the Sacristy Vestibule windows in Saint Mary's Church, Cambridge, with the liles as feature.

Beginning with the two vestibule windows, we have designed these in such the same manner as those you liked in Saint Mary's Church, Cambridgeport, Massachusetts, but, of course, adjusting the design to the difference in the shape of the openings. We have kept these light and brilliant, so that they will not darken the vestibule. At the same time, we have introduced enough pure color to assure their rich appearance.
