General Information Medallion windows in armatures - they furnish armatures. - probably no figures - large simple areas, with spots of color.

Eggers would like something between the lighter and darker background suggestion, that will not be too light, but will keep the medallions from standing out so strong.

To be all decorative scheme, without figure medallions - Alternating color in the three windows. We should have two of the blue medallion windows, and one red. Mr. Hartford liked deep red.

For addresses of those to be notified as window progresses, see other side.
