General Information To have simple patterns, without figures.

As the window will be faced by the congregation, the glass is to provide as little glare as possible.

Price for nave windows given in letter of 10/30/52).

completed our studies of the chancel windows in the First Methodist Church and Chapel, Oak Ridge, and are sending the rough color sketches to you herewith.

We have designed the main chancel window in flowing foliated pattern, coming to flower in the white fleur-de-lys of purity. Stars around the center suggest heavenly steadfastness, and the number eight of both stars and fleur-de-lys might well be interpreted to symbolize the Beatitudes.

The design for the Chapel window is a little more geometric in character, and a little warmer in general tone. The design forms a cross accented at the center with the white fleur-de-lys of purity, while the enrichment of the arms suggest the red roses of divine love.

In both cases we have in mind deep, rich color, with sufficient texture to prevent glare in the eyes of the congregation.
