General Information To be a rich and colorful decoration with the descending dove of the Holy Spirit as the central symbol.

Architect writes: "We would suggest that the design of the window be rather simple and strong in character."

The building has a stone exterior and very simple in design.

For addresses of those to be notified as window progresses, see other side.

circular window in the chancel of your church at Western Springs, and are sending you the color design herewith.

We think it has worked out very successfully in a direct and forceful manner which will be entirely legible in the distance from which it is seen. At the same time, it conveys the impression of rich design involving a full color palette.

The dominant symbol of the Descending Dove of the Holy Spirit is complemented by stars of divine steadfastness, and fleur-de-lis of purity.

The window will stand as a bright jewel of color and light in its quiet setting.
