To be devoted to the Calling of the Disciples to be Fishers of Men, similar to the left panel of the Mt. Baker Park, Seattle group - the fishermen to be lowered, making the composition more like the windows at St. Mark's, Glen Ellyn.

**In the second design, devoted to the Calling of the Disciples
Fishers of Men, Our Lord stands on the shore and beckons to
apostles in the boat as they draw their nets.**

Important note: The Rector writes: "...As I looked at the design I just wonder if this is going to turn out to be quite so colorful as the two windows along side; that is the Crucifixion and the Resurrection. You should know because of course you have the full story there..." We replied "...It is quite possible that the sketch is not as colorful as the actual windows near it, and we are glad to have your comment so that we will be sure to study it in this relation..."
